| 4 | Ambála | 0·10 at Jagádhri ... 0·12 at Naráingarh. 0·07 at Kharar. 0·12 at Rúpar. | 1. Sufficient. 2. (a) Do. (b) Adequate. 3. Generally good. | Wheat, 8½ seers .. Gram, 13 seers. Barley, 11¾ seers. Maize, 12 seers. Bajra, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane in progress. Yield normal. | Rain was insufficient. Standing crops generally good. Toria is being harvested. Yield below normal. White ants have appeared in parts. |
| 5 | Jullundur ... | 0·04 at Sadr ... 0·05 at Nawashahr. | 1. Insufficient to some extent. 2. (a) Sufficient. 3. Average. | Wheat, 9 seers ... Barley, 11½ seers. Gram, 12½ seers. Maize, 12½ seers. Jowar, 10 seers. Bajra, 8½ seers. Prices between warning and scarcity rates or above scarcity rates. | Standing irrigated sugarcane and cotton crops average. Picking of cotton and pressing of sugarcane continue. Yield normal. | Standing crops average. More rain badly needed. |
| 6 | Ferozepore .. | ... | 1. Sufficient ... 2. (a) Do. (b) Sirhind Canal flowing; supply sufficient 3. Fair | Wheat, 9 seers ... Gram, 12½ seers. Prices between warning and scarcity rates. | ... | Standing irrigated crops normal, unirrigated below normal. Rain badly wanted. |
| 7 | Lahore | ... | 1. Sufficient ... 2. (a) Do. (b) Do. 3. Good. | Wheat, 8¾ seers ... Gram, 12 seers. Maize, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Picking of cotton and pressing of sugarcane in progress. Yield normal. | Wheat and fodder crops sown. Sowings below normal. Standing irrigated crops average and unirrigated below average. Toria being harvested. Yield normal. |
| 8 | Amritsar ... | ... | 1. Sufficient except in Bet of the Ajnala Tahsil. 2. (b) Canals working by rotations. 3. Average. | Wheat, 9¼ seers ... Gram, 12¼ seers. Barley, 12 seers. Jowar, 11½ seers. Maize, 13 seers. Bajra, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane continues. Yield a little below normal. | Standing irrigated crops good and unirrigated average. Rain wanted. Toria being harvested. Yield normal. |
| 9 | Siálkot ... | 0·02 at Pasrúr ... | 1. Scarce. Sugarcane used as fodder. 2. (a) Sufficient. (b) Aik stream flowing 3. Weak owing to hard work. | Wheat, 8 to 9 seers. Barley, 11 to 12 seers. Maize, 11 to 12 seers. Gram, 10½ to 11 seers. Prices generally at scarcity or above scarcity rates. | Pressing of sugarcane, picking of cotton and threshing of rice in places continue. Yield of rice and sugarcane above average and of cotton slightly below average. | Standing [illegible]ted crops ave[illegible]nd unirrigated slightly below [illegible]age. Rain badly needed. Yield of toria above average. |

| No. | Reporting station. | Rain | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring |
|---|---|---|---|---|---|---|
| 10 | Shahpur | ... | 1 Scarce in Khushâb<br>2. (a) Sufficient, except in Khushâb Tahsil, where it is seriously short,<br>(b) Lower Jhelum Canal flowing; supply sufficient<br>3. Fair, except in Khushâb Tahsil. | Wheat, 9 to 10½ seers.<br>Barley, 12 to 14 seers.<br>Gram, 11 to 12 seers.<br>Jowar, 9 to 12 seers.<br>Bajra, 10½ to 11 seers.<br>Maize, 11 to 13 seers.<br>Prices between warning and scarcity rates. | Condition of cotton poor owing to damage by boll-worm. Yield very small. Sugarcane being pressed. Yield below normal. | Sowings of wheat and barley completed. Standing irrigated crops fair and unirrigated poor. Reaping of toria commenced. Yield normal. |
| 11 | Râwalpindi ... | ... | 1. Sufficient ...<br>3. Good. | Wheat, 8¾ seers ...<br>Barley, 11½ seers.<br>Gram, 11⅛ seers.<br>Maize, 11½ to 12 seers.<br>Bajra, 9¾ seers.<br>Prices between warning and scarcity rates or above scarcity rates. | ... | Standing irrigated crops good and unirrigated crops are withering. Rain badly wanted. |
| 12 | Miânwâli | ... | 1. Scarce ...<br>2. (b) Kurram and Nammal Canals flowing. Supply sufficient in former and insufficient in latter.<br>3. Bad. | Wheat, 9 to 9½ seers.<br>Barley, 11 seers.<br>Gram, 11½ seers.<br>Bajra, 9¾ seers.<br>Prices generally above scarcity rates. | ... | Standing irrigated crops average and unirrigated below average. |
| 13 | Lyallpur | ... | 1. Dry generally procurable; green scarce.<br>2. (b) Canal works by rotational closures; supply normal.<br>3. Good. | Wheat, 9½ seers ...<br>Gram, 13½ seers.<br>Maize, 13½ seers.<br>Barley, 12½ seers.<br>Bajra, 10½ seers.<br>Prices between warning and scarcity rates or above scarcity rates. | Picking of cotton nearly finished; and pressing of sugarcane and harvesting of maize continue. Yield of cotton below normal and of other crops good. | Late sowings of wheat continue and are below normal. Standing irrigated crops average and unirrigated poor. Rain badly wanted. Reaping of toria commenced. Yield below normal in Toba Tek Singh Tahsil owing to severe cold. |
| 14 | Multân | ... | 1. Scarce. Bhusa, dry jowar and turnips available.<br>2. (b) Canals dry.<br>3. Good, but becoming weak. | Wheat, 9¼ seers ..<br>Gram, 12¼ seers.<br>Maize, 12 seers.<br>Prices between warning and scarcity rates. | Picking of cotton and harvesting of sesamum continue to some extent. Yield below normal. | Standing crops average. Rain badly wanted. Toria being harvested. Yield below normal. |

## *GENERAL REMARKS.*

EXCEPT for slight showers in parts of the submontane tract weather remained dry. Picking of cotton and pressing of sugarcane continue. Yield generally normal on irrigated area and below normal on unirrigated area. Sowings of spring crops nearly completed. Condition of standing crops is fair on irrigated area, but unirrigated crops are suffering for want of rain, which is urgently needed everywhere. Toria is being harvested. Yield generally normal. Cattle are generally healthy, but are becoming weak owing to scarcity of fodder in parts of the south-east and west. Water for drinking and irrigation generally sufficient. Prices are generally stationary and range between warning and above scarcity rates. Prices of wheat—Ambala 8¾, Lahore and Râwalpindi 8¾, Ferozepore 9, and Lyallpur 9½ seers per rupee.

L. FRENCH,

*Remarks by the Sanitary Commissioner, Punjab.*

DURING the week ending 25th December 1915, there were 1,060 births registered in the 38 large municipal towns (557 males and 503 females) giving a birth-rate of 46 *per mille* of population, and 942 deaths were registered (506 males and 436 females), giving a death-rate of 41 *per mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 47 against 28 in the corresponding week of the previous year; Amritsar 30 against 63; and Multán 63 against 36.

There were 2 deaths reported from plague in Báwalpindi. Of the 11 deaths from small-pox, 5 were registered in Multán, 4 in Batála and Lahore.

SANITARY COMMISSIONER'S OFFICE,
LAHORE;
*The 5th January* 1916.

### WEATHER, HEALTH AND CROP REPORT FOR WEEK ENDING 8 A.M., TUESDAY THE 11TH JANUARY 1916.

[ Fourteen out of 28 districts are dealt with. ]

| No. | Reporting station | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Autumn. | Spring |
| 1 | Hissar ... | ... | 1. Scarce; being imported. 2. (b) Sufficient. 3. Getting lean. | Wheat, 8 seers ... Gram, 11¾ seers. Bajra, 9 seers. Bejhar, 12 seers. Prices at scarcity or above scarcity rates. | ... | Standing irrigated crops fair. Unirrigated crops are withering. Rain urgently needed. |
| 2 | Rohtak ... | ... | 1. Scarce ; being imported. 2. (a) Getting short in places. (b) Adequate. 3. Getting weak in places | Wheat, 8½ seers ... Gram, 12½ seers. Barley, 10 seers. Jowar, 11½ seers. Bajra, 9½ seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane and picking of cotton on irrigated area continue. Yield about normal. Crops slightly damaged by frost in parts of Sonepat Tahsil. | Standing irrigated crops fair to good, and unirrigated below average. Sowings of extra spring crops commenced on irrigated area in parts of the Sonepat Tahsil and are restricted. |

2040

| No. | Reporting station | Rain | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon | ... | 1. Scarce, being imported 2. (b) Sufficient. 3. Fair, but becoming weak owing to want of fodder. | Wheat, 8½ to 9½ seers. Barley, 11 to 11½ seers. Gram, 12 seers. Jowar, 10 to 12 seers. Bajra, 9½ to 11 seers. Maize, 10 to 12 seers. Prices between warning and scarcity rates or above scarcity rates. | ... | Standing irrigated crops generally fair and unirrigated bad. Rain urgently wanted. |
| 4 | Ambála | ... | 1. Sufficient 2. (a) Do. (b) Adequate. 3. Generally good. | Wheat, 8½ seers. Gram, 13 seers. Barley, 11¾ seers. Maize, 12 seers. Bajra, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane in progress. Yield normal. | Standing irigated crops good and unirrigated average. White ants have appeared in unirrigated area. Toria is being harvested. Yield below normal. |
| 5 | Jullundur ... | ... | 1 Insufficient to some extent. 2. (a) Sufficient. 3. Average. | Wheat, 9 seers. Barley, 11½ seers. Gram, 12½ seers. Maize, 12½ seers. Jowar, 10 seers. Bajra, 8½ seers. Prices between warning and scarcity rates or above scarcity rates. | Picking of cotton completed and pressing of sugarcane continues. Yield normal. | Rain badly needed. Standing irrigated crops average and unirrigated below average. |
| 6 | Ferozepore ... | ... | 1. Sufficient ... 2. (a) Do. (b) Sirhind Canal flowing; supply sufficient. 3. Fair. | Wheat, 9 seers ... Gram, 12½ seers. Prices between warning and scarcity rates. | ... | Standing irrigated crops satisfactory and unirrigated below average. |
| 7 | Lahore | ... | 1 Sufficient ... 2. (a) Do. (b) Do. 3. Good. | Wheat, 8¾ seers ... Gram, 12 seers. Maize, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Picking of cotton and pressing of sugarcane in progress. Yield normal. | Standing irrigated crops average and unirrigated below average. Late sowings of wheat and fodder continue and are below normal. |
| 8 | Amritsar ... | ... | 1. Sufficient except in Bet of the Ajnala Tahsil. 2. (b) Canals working by rotations. 3. Average. | Wheat, 9½ seers ... Gram, 12¾ seers. Barley, 12 seers. Jowar, 11½ seers. Maize, 13 seers. Bajra, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane continues. Yield a little below normal. | Rain wanted. Standing irrigated crops good and unirrigated average. Toria being harvested. Yield below normal on irrigated area and normal on unirrigated area. |
| 9 | Sialkot | ... | 1. Scarce; sugarcane used as fodder. 2. (a) Sufficient. (b) Aik stream flowing. 3. Weak owing to hard work. | Wheat, 8 to 9 seers. Barley, 11 to 12 seers. Maize, 11 to 12 seers. Gram, 9½ to 12 seers. Prices generally at scarcity or above scarcity rates. | Pressing of sugarcane continues. Yield affected by frost and is normal. | Rain badly needed. Standing irrigated crops average and unirrigated slightly below average. Yield of toria affected by frost and is normal. |

| No. | Reporting station. | Rain | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring |
|---|---|---|---|---|---|---|
| 10 | Shahpur | ... | 1. Scarce ... 2. (a) Sufficient, except in Khusháb where it is seriously short. (b) Lower Jhelum Canal flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, 9 to 10 seers. Gram, 11½ to 12½ seers. Barley, 12½ to 14 seers. Jowar, 10 to 12 seers. Bajra, 10½ to 11 seers. Maize, 11 seers. Prices between warning and scarcity rates. | Sugarcane being pressed. Yield below normal. | Standing irrigated crops fair and unirrigated poor. Reaping of toria in progress. Yield normal. |
| 11 | Ráwalpindi ... | ... | 1. Sufficient ... 3. Good. | Wheat, 8½ seers ... Barley, 11½ seers. Gram, 11½ seers. Maize, 11¾ to 12 seers. Bajra, 9¾ seers. Prices between warning and scarcity rates or above scarcity rates. | ... | Standing irrigated crops good and unirrigated withering. Rain badly needed. |
| 12 | Miánwáli ... | ... | 1. Scarce ... 2. (b) Kurram and Nammal Canals flowing. Supply sufficient in former and insufficient in latter. 3. Bad. | Wheat, 8¾ to 9 seers. Barley, 11 seers. Gram, 11¾ seers. Bajra, 9¾ seers. Prices generally at above scarcity rates. | ... | Standing irrigated crops average and unirrigated crops poor. |
| 13 | Lyallpur ... | ... | 1. Dry generally procurable; green scarce. 2. (b) Canal works by rotational closures; supply normal. 3. Good. | Wheat, 9½ seers ... Gram, 12½ seers. Maize, 13½ seers. Barley, 12¼ seers. Bajra, 10½ seers. Prices between warning and scarcity rates, or above scarcity rates. | Picking of cotton and harvesting of maize finished; and pressing of sugarcane continues. Yield of cotton below normal, and of other crops good. | Late sowings of wheat continue and are below normal. Standing irrigated crops average and unirrigated poor. Rain badly needed. Toria being reaped. Yield below normal owing to damage by severe cold. |
| 14 | Multán ... | ... | 1. Scarce. Bhusa, dry jowar and turnips available. 2. (b) Canals dry. 3. Fair, but becoming weak. | Wheat, 8½ seers ... Gram, 12 seers. Maize, 12 seers. Prices between warning and scarcity rates. | Picking of cotton and harvesting of sesamum continue to some extent. Yield below normal. | Rain badly wanted. Standing crops average. Toria being harvested. Yield below normal. Ploughings for extra spring crops commenced. |

## GENERAL REMARKS.

WEATHER dry. Picking of cotton and pressing of sugarcane continue in some districts. Yield generally normal on irrigated area and below normal on unirrigated area. Condition of standing spring crops on irrigated area average to good, but unirrigated crops are suffering for want of rain, which is urgently needed everywhere. Toria is being harvested. Yield generally below normal. Cattle are generally healthy, but are becoming weak owing to scarcity of fodder in parts of the south-east and west. Water for drinking and canal irrigation generally sufficient. Prices are generally stationary, and range between warning and above scarcity rates. Prices of wheat—Ambála and Ráwalpindi 8½, Lahore 8¾, Ferozepore 9, and Lyallpur 9½ seers per rupee.

*Not reduced to sea-level.

(a) Mean of 29 days.

(c) Aneroid.

Weather was unusually settled and dry.

*Pressure and Winds.*—Barometric pressure was low at most stations in the North-West Frontier Province, and approximately normal over the Punjab. Winds were, as is ordinarily the case in November, light and variable; at Cherát their recorded velocity was almost half of the normal amount—an indication that the outflow of air from the Afghan hills into the Punjab was of less volume than usual.

*Temperature.*—There was nothing strikingly abnormal in the temperature conditions of the month.

The following table shows for each day of the month the departure from the n[ormal] of the mean temperature of the Punjab and the North-West Frontier Province, wit[h] highest maximum temperature registered and the name of the station recording it :—

| Date. | | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at registere[d] |

| " | 16th ... | + 2·2 | 87·3 | Do. | | | | | |

*Humidity and Cloud.*—The air was distinctly dry at the level of Murree, and Páráchinár as well as at Hissar and Khusháb. There was even less than the cus[tomary] amount of cloud

*Rainfall.*—The month was absolutely rainless, whereas under ordinary con[ditions] a quarter of an inch is recorded over the North-West Frontier Province and a fifth [of an] inch over the Punjab

The following table gives the rainfall data for the Punjab and the Nort[h-West] Frontier Province stations for November 1915 :—

| Station. | Actual rainfall in November 1915. | Normal rainfall in November. | Departure from normal in November 1915. | Station. | Actual rainfall in November 1915. | Normal rainfall in November. |

The sky was unusually clear and no rainfall occurred.

Compared with the birth-rate for the corresponding month of the previous year, there was a decrease of 3,057 births or 2·02 *per mille* of population which affected Lahore, and the province, but most marked in the Lahore Division where it was 4·55.

Compared with the death rate for the corresponding month of the previous year, there was a decrease of 8·59 per 1,000 of population which was shared by all the rate for the previous month, there was an increase of 3·81 *per mille* of population which also was general throughout the Province, and due principally to the greater

There were only 8 deaths recorded under the head of cholera during the month under report, as against 150 in the corresponding month of the previous year and 29

| 12 | Miânwâli ... | ... | 1. Scarce ...<br>2. (a) Scarce in Thal.<br>(b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter.<br>3. Bad. | Wheat, 8¾ to 9 seers.<br>Barley, 11 seers.<br>Gram, 12 seers.<br>Prices between warning and scarcity rates or above scarcity rates. | ... | Standing irrigated crops average and unirrigated below average. |
| 13 | Lyallpur .. | ... | 1. Dry generally procurable; green scarce.<br>2. (b) Canal works by rotational closures; supply normal.<br>3. Good. | Wheat, 9½ seers ...<br>Gram, 12¾ seers.<br>Maize, 13½ seers.<br>Barley, 12¼ seers.<br>Bajra, 10 seers.<br>Prices between warning and scarcity rates, or above scarcity rates. | Picking of cotton almost finished and pressing of sugarcane continues. Yield of cotton below normal, and of sugarcane good. | Sowings of wheat are below normal. Standing irrigated crops average and unirrigated poor. Rain badly needed. Toria being reaped. Yield normal. |
| 14 | Multân .. | 0·06 at Shujâbad.<br>0·07 at Kabîrwâla | 1. Scarce. Bhusa, dry, jowar and turnips available.<br>2. (b) Canals closed.<br>3. Fair, but becoming weak. | Wheat, 9½ seers ...<br>Gram, 11½ seers.<br>Maize, 12 seers.<br>Prices between warning and scarcity rates. | Harvesting of sesamum continue to some extent. Yield below normal. | Standing crops average. Ploughings for extra spring crops continue and sowings commenced in parts. |

*GENERAL REMARKS.*

WEATHER generally dry. Picking of cotton completed. Yield generally normal on irrigated area and below normal on unirrigated area. Pressing of sugarcane continues in some districts. Yield generally normal. Condition of standing spring crops on irrigated area is average to good, but unirrigated crops are withering for want of rain which is urgently needed everywhere. Toria is being harvested. Yield generally normal. Cattle are generally healthy, but are becoming weak owing to scarcity of fodder in the south-east and west. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambâla. Prices are generally stationary, but are rising slightly in some districts owing to absence of rains, and range between warning and above scarcity rates. Prices of wheat—Ambâla 8½, Râwalpindi 8½, Lahore 8¾, Ferozepore 9, and Lyallpur 9½ seers per rupee.

rain-gauge station.

B. D. SINGH, HEAD ASSISTANT, STATI

*Office of Director of Land Records, P*

# Notes on the condition and prospects of crops, etc., in each district of the Punjab during the month of December 1915.

## 1.—Hissar District.

Irrigated and unirrigated kharif crops reaped and housed. Outturn of cotton eight annas and of others fourteen annas in a rupee on irrigated area, and two annas only on unirrigated area. Sowing finished. Irrigated sowings normal and unirrigated nearly one-third of the normal. Rain urgently wanted. Standing crops in fair condition. Fodder scarce, and is being largely imported. Cattle getting lean. Water supply in perennial canals sufficient. Grain stock sufficient to meet local requirements.

## 2.—Rohtak District.

Rainfall much below average. It is badly wanted. No sowings took place on unirrigated tracts. Sowings of wheat, gram and barley took place on irrigated lands, area sown is about normal. Condition of irrigated spring crops fair to good and of unirrigated crops below average. Picking of cotton, pressing of sugarcane and cutting of indigo continued, yield on irrigated lands is about average and on unirrigated poor. Cattle getting thin for want of fodder in some parts. Fodder is scarce and dear. Public health good. Supply of canal water adequate.

## 3.—Gurgaon District.

Very slight rain fell during the month. Rain wanted urgently. Wheat, barley, gochni (wheat and gram mixed) being sown on irrigated area. Sowings normal. Standing rabi crops on irrigated area generally in fair condition, but those on unirrigated lands are poor. Sugarcane being pressed: outturn below the normal. Cattle in fair condition, but becoming weak for want of fodder. Green grass and fodder generally deficient. Health of people good. Supply of canal water sufficient. No flood by hill torrents.

## 4.—Karnal District.

Slight rain fell during the month. Wheat has been sown. The condition of irrigated crops is average, and that of unirrigated below average. Rain is needed. Condition of cattle is good. Fodder and water is sufficient except in Tahsil Kaithal. Public health is generally good. Canals worked, but supply of water was deficient. Prices gradually rising.

## 5.—Ambala District.

Very little rain fell during the month. Sowing finished. Owing to deficiency in rain whiteants have appeared on unirrigated area. Standing crops on unirrigated area in normal condition. Sugarcane crop good. Yield of *rabi* crops is expected to be good, provided there is an early fall of rain. Yield of sugarcane is average. Cattle in good condition, fodder and water sufficient. Public health good. Western Jumna Canal flowed continually. No river inundations or torrent floods. Prices are almost stationary.

## 6.—Simla District.

The rainfall during the month was insufficient. A small area in the Kot Khái Tahsil was sown with poppy. The condition of crops in both tahsils is good. Condition of cattle good in both tahsils. Fodder and grazing sufficient. Public health good. Water supply from hill streams sufficient.

7.—KANGRA DISTRICT.

Rainfall sufficient for standing crops. Sowings finished, except in Kángra, Dehra and and Saráj Tahsils, where some area has yet to be sown. The condition of crops is good at present. Condition of cattle is good and fodder is sufficient. Public health is generally good. Water in kuhls is sufficient for irrigation purposes.

8.—HOSHIARPUR DISTRICT.

No sowings were made during the month. Rain is wanted. Condition of rabi crops average. Sugarcane is being pressed and the outturn is estimated to be 10 maunds per acre. Condition of cattle generally good. Fodder sufficient. Public health generally good. Shah Nahr Canal remained closed. Prices of food grains stationary.

9.—JULLUNDUR DISTRICT.

Rainfall much below average. More rain is badly needed. No sowings were made during the month. Standing rabi crops and irrigated cotton, sugarcane and chillies are in average condition. The outturn of irrigated kharif crops is average. Cattle in average condition. Fodder somewhat insufficient. Public health is generally good.

10.—LUDHIANA DISTRICT.

Rainfall below normal, rabi sowings completed. Condition of crops satisfactory. Rain badly wanted. Outturn of sugarcane normal. Condition of cattle satisfactory. Fodder available, but is dear. Public health is generally good. Canal irrigation usual, no flood reported. Prices of foodstuffs are stationary.

11.—FEROZEPORE DISTRICT.

Rainfall very slight. In the beginning of the month wheat was sown to some extent on irrigated area. Rabi sowing finished. The condition of standing crops on irrigated area is satisfactory, unirrigated crops are beginning to suffer for want of rain. In Fázilka crops are being damaged by rats. Subject to timely rainfall the yield of rabi crops is expected to be good. Cattle in good condition. Fodder and water sufficient. Public health is good. The Sirhind Canals have been flowing well. Stocks of food grain are sufficient.

12.—LAHORE DISTRICT.

Weather remained practically dry. Wheat, barley and senji sown on irrigated lands. The extent of sowing was normal. General condition of the standing crops so far is fair, but rain is badly wanted. Cotton being picked, outturn was normal. Yield of toria and sugarcane is good. Condition of cattle good. Fodder is sufficient. The state of the pubilc health is good. Canals are working satisfactorily.

13.—AMRITSAR DISTRICT.

Wheat, barley, sarson, etc., were sown on irrigated areas. Sowings were normal. Condition of rabi crops on irrigated area good and on unirrigated average. Rain wanted. Yield is expected to be good on irrigated area. Unirrigated crops are in need of rain. Condition of cattle good. Public health is generally good. Canals working by rotations. No floods.

14.—GURDASPUR DISTRICT.

Practically there was no rain during the month. Rabi sowings completed. Rain is wanted. Condition of standing spring crops good. Pressing of cane continued, outturn

average to good. Cattle generally in good condition. Fodder is sufficient. Public health generally good. Rivers and canals are flowing. No flood. Prices stationary.

15.—SIALKOT DISTRICT.

Rain needed. Sowings of wheat, barley, sarshaf, etc., continued. Irrigated crop good and unirrigated average. Pressing of cane in progress. Yield of cane and rice above average, but of cotton slightly below it. Cattle weak owing to hard work. Public health good. Raya Branch closed during the month. Some irrigation from the Aik continued.

16.—GUJRANWALA DISTRICT.

Very little rainfall during the month. Rabi sowings almost finished. The condition of irrigated crops is normal and that of unirrigated is below average. Rain is badly needed. Picking of cotton finished. Harvesting of toria commenced late : outturn is estimated to be average. Cattle healthy, but are becoming weak owing to scarcity of fodder. Sugarcane being used as fodder. Public health generally good. Canal water supply sufficient.

17.—GUJRAT DISTRICT.

Slight showers received during the month. Sowings finished. The condition of crops on irrigated and sailab lands average to good, and that of barani crops bad to fair. Rain is badly wanted. Cotton picking in progress. Estimated yield much below average. Sugarcane pressing in progress, but the greater part of cane has been used as fodder. Yield is estimated to be about average. Cattle are generally in good condition, but in many tracts they are getting weak for want of fodder. Cattle are being sent to river belas from certain tracts. Public health generally good. Canal flowing.

18.—SHAHPUR DISTRICT.

No rainfall during the month. Sowings of wheat a little below normal on irrigated area and much below it on unirrigated area. Condition of standing crops was fair on irrigated and poor elsewhere. Yield of cotton very little owing to appearance of boll-worms. Sugarcane was pressed, yield 6 maunds per acre. Cattle in fair condition, except in Khushab Tahsil, where there is a serious scarcity of fodder and water, and consequently some cattle are dying or being slaughtered. Fodder generally scarce. Public health is generally good. The Lower Jhelum Canal continued to flow with sufficient supply of water.

19.—JHELUM DISTRICT.

No rain and so no further rabi sowings. Standing crops growing bad owing to lack of rain. Wheat crop shows signs of withering on barani land. The outlook of spring crops is gloomy. Condition of cattle generally bad owing to lack of fooder. It is extremely bad in parts of Pind Dádan Khan Tashil. Public health excellent. Prices generally stationary.

20.—RAWALPINDI DISTRICT.

Slight showers were received. Rain badly wanted. Standing wheat and other rabi crops withering for want of rains. Condition of cattle good, dry fodder available, price of bhusa stationary. State of public health good.

21.—ATTOCK DISTRICT.

Rainfall quite insufficient and far below the average, hence no more sowings could be made. Standing crops fair and have begun to suffer for want of rains. Cattle in fair condition, a number of cattle have been sold for scarcity of fodder and a few have died of starvation. Public health fairly good. Water is generally available. Prices are rising.

22.—MIANWALI DISTRICT.

Rabi sowings finished. Rain badly wanted. Standing spring crops good on irrigated and below average on unirrigated lands. There is fear of damage to crops from chill. Cattle are doing very badly owing to the scarcity of fodder. Public health good. The Kurram irrigation in Isa Khel Tahsil was timely and sufficient. Nammal Canal watered lands in Miánwáli. Supply was insufficient.

23.—MONTGOMERY DISTRICT.

Rabi sowings (wheat and barley) continued to some extent, but have practically ended now. The condition of the standing rabi crops is nearly moderate. Rain is badly wanted. The cold weather has damaged the crops to some extent. Yield expected to be average if there are timely rains. Scarcity of fodder has weakened cattle. General health is good. The Lower Bari Doab Canal is now running after a closure. The river Ravi is dried up while Sutlej flows with ordinary water, but its canals are closed. No inundations. Prices are ordinarily high.

24.—LYALLPUR DISTRICT.

Slight showers were received. Wheat sowings have been in progress. The area under wheat up to date is about normal. Cotton picking is in progress. The yield of American cotton has been normal and of country cotton below normal. Maize cutting finished and outturn above normal. Sugarcane pressing in progress. Outturn average. Condition of cattle is good. Fodder sufficient. State of public health is good. Canal water normal. Stock sufficient.

25.—JHANG DISTRICT.

Rainfall below average in Jhang and Shorkot Tahsils, but above average in the Chiniot Tahsil. Wheat, senji, &c., are being sown. Crops are in average condition. Cattle generally healthy. Green fodder is scarce. Bhusa is also becoming scarce. Public health good. Canals flowing, water increasing in the rivers. There has been no innudation. Prices stationary.

26.—MULTAN DISTRICT.

There was a slight rainfall in three tahsils, but it was beneficial. Rain is badly wanted. Late sowings of wheat made to some extent. Sowings of zaid rabi crops commenced. Condition of rabi crops normal, but cotton suffered to some extent from cold. Outturn of *cotton* and *til* was below average. Condition of cattle fair, but they are becoming weak owing to scarcity of fodder. Fodder scarce throughout the district. Bhusa and turnips available as fodder. Health of people fair. Canals stopped. Prices of food grains stationary. Stock of food grains, specially wheat, decreasing.

27.—MUZAFFARGARH DISTRICT.

Slight rain accompanied with hail fell in Muzaffargarh. Wheat and vegetables sown. Condition of crops average. Cotton being picked and sugarcane are being pressed, the average yield per acre being two and eight maunds respectively. Cattle generally in fair condition. Fodder scarce in all tahsils. No floods. All canals are now dry. Prices of food grains still high.

28.—DERA GHAZI KHAN DISTRICT.

No rainfall in the district. Sowings for rabi crops finished. Condition of standing crops average, but cold has done some damage. Yield is expected to be average. Condition of cattle good on the whole. Fodder is scarce and grazing *nil*. Public health on the whole good. No water in the canals and no floods in the hill torrents. No flood in the river.

| 14 | Multán .. | ... | 1. Scarce. Bhusa, turnips, &c., available.<br>2. (b) Canals closed.<br>3. Fair, but becoming weak. | Wheat, $9\frac{1}{2}$ seers ...<br>Gram, $11\frac{1}{2}$ seers.<br>Maize, 12 seers.<br>Prices between warning and scarcity rates. | .. | Rain badly wa Standing c r average. Plo ings for and ings of spring crops c nue. |

## *GENERAL REMARKS.*

WEATHER generally dry. Pressing of sugarcane continues in some districts. Yield generally normal. Condition o standing spring crops on irrigated area is average to good, but unirrigated crops are withering for want of rain, which is urgentl wanted everywhere. Toria is being harvested. Yield generally normal. Cattle are generally healthy, but are becoming weak owing t scarcity of fodder in the south-east and west. Water for drinking and canal irrigation generally sufficient, but shortage of canal wate is reported from Ambála and Miánwáli. Prices are generally stationary, and range between warning and above scarcity rates. Price of wheat—Ambála $8\frac{1}{2}$, Ráwalpindi $8\frac{1}{2}$, Lahore $8\frac{3}{4}$, Ferozepore 9, and Lyallpur $9\frac{1}{2}$ seers per rupee.

### WEATHER, HEALTH AND CROP REPORT FOR WEEK ENDING 8 A.M., TUESDAY, THE 1ST FEBRUARY 1916.

[ Fourteen out of 28 districts are dealt with. ]

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Autumn | Spring. |
| 1 | Hissar ... | 0·02 at Sadr ... | 1. Scarce; being imported.<br>2. (b) Water-supply sufficient in perennial canals. Inundation canals dry.<br>3. Getting lean. | Wheat, 8 seers ...<br>Gram, 12 seers.<br>Bajra, 9 seers.<br>Bejhar, 11½ seers.<br>Prices at scarcity or above scarcity rates. | ... | Standing irrigated crops fair, but unirrigated crops withered or are withering for want of rain. Expected yield on irrigated area is 12 annas in a rupee and on unirrigated area 2 annas if some rain falls soon. |
| 2 | Rohtak ... | 0·04 at Sadr ... | 1. Scarce; being imported.<br>2. (a) Scarce.<br>(b) Canal closed.<br>3. Fair, but getting weak in places. | Wheat, 8½ seers ...<br>Gram, 12 seers.<br>Barley, 10 seers.<br>Jowar, 11½ seers.<br>Bajra, 9½ seers.<br>Prices between warning and scarcity rates. | Pressing of sugar-cane continues. Yield about normal. | Standing irrigated crops average and unirrigated below average. Yield on irrigated area expected to be average, but unirrigated crops are withering, and unless some rain falls now, they will be total failure. Sowings of extra spring crops continue on irrigated area in parts of the Sonepat Tahsil and are below normal. |

2743 PGG

| No. | Reporting station. | Rain | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3 Condition of cattle. | Prices in seers per rupee. | Prospects of — Autumn. | Prospects of — Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon | ... | 1. Scarce, being imported. 2. (b) Canals flowing in Palwal and Ballabgarh Tahsils; supply sufficient. 3. Fair, but becoming weak for want of fodder. | Wheat, 8¼ to 9½ seers. Barley, 10¾ to 11½ seers. Gram, 11½ to 12½ seers. Jowar, 11 to 12 seers. Bajra, 10 to 10½ seers. Maize, 10½ to 11½ seers. Prices between warning and scarcity rates or above scarcity rates. | ... | Condition and prospects of standing irrigated crops generally fair, and of unirrigated crops bad. Expected outturn of wheat normal on irrigated area and below normal elsewhere. Unirrigated crops somewhat damaged by whiteants in parts of the Gurgaon Tahsil. Rain urgently wanted. |
| 4 | Ambála ... | 0·32 at Sadr ... 0·11 at Naráingarh. 0·19 at Kharar. 0·25 at Rúpar. 0·20 at Kasauli. | 1. Sufficient. 2. (a) Do. (b) Inadequate. 3. Generally good. | Wheat, 8¼ seers ... Gram, 12¾ seers. Barley, 11¾ seers. Maize, 12 seers. Bajra, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane in progress. Yield normal. | Rain was insufficient, more is badly needed. Standing irrigated crops average and unirrigated crops below average. Toria being harvested. Yield below normal. |
| 5 | Jullundur ... | 0·64 at Sadr ... 0·07 at Nakodar. 0·08 at Phillaur. 0·15 at Nawashahr. | 1. Insufficient to some extent. 2. (a) Sufficient. 3. Average. | Wheat, 9 seers ... Barley, 11½ seers. Gram, 12 seers. Maize, 12½ seers. Jowar, 10 seers. Bajra, 9 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane continues. Yield normal. | Condition and expected yield of standing irrigated crops average and of unirrigated below average. More rain badly needed. |
| 6 | Ferozepore ... | 0·50 at Sadr ... 0·03 at Moga. 0·10 at Muktsar. 0·36 at Fázilka. | 1. Sufficient ... 2. (a) Do. (b) Do. ... 3. Good. | Wheat, 9 seers ... Gram, 12½ seers. Harvesting o[f toria] completed. Yield normal. Ploughing and sowings of spring crops continu[e]. |

## GENERAL REMARKS.

SLIGHT rain has fallen in all the reporting districts except in parts of the south-east and west. It was quite insuffici[ent] and more rain is urgently wanted everywhere. Condition and prospects of standing wheat and other spring crops on irrigated [land] are generally normal, but unirrigated land crops are poor, and on higher lands are drying up for want of rain. Pressing of sug[ar]cane and harvesting of toria (*Brassica campestris*) continue in some districts: yield normal. Ploughings for and sowings of e[arly] spring crops have commenced in a few districts. Cattle are generally healthy, but are becoming weak owing to scarcity of fod[der] in the south-east and west. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported f[rom] Ambála. Prices are generally stationary, and range between warning and above scarcity rates. Prices of wheat—Ambála 8¼, Lah[ore] and Ráwalpindi 8¾, Ferozepore 9 and Lyallpur 9¾ seers per rupee.

C. A. H. TOWNSEND,

*Director of Agriculture and Industries, Punjab*

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 22nd January 1916, there were 893 births registered in the 38 large municipal towns (462 males and 431 females), giving a birth-rate of 39 *per mille* of population, and 863 deaths were registered (470 males and 393 females), giving a death-rate of 38 *per mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 46 against 29 in the corresponding week of the previous year; Amritsar 32 against 63; and Multán 48 against 26.

There were 2 deaths reported from plague in Ráwalpindi. Of the 6 deaths from small-pox, 2 each were registered in Amritsar and Batála and 1 each in Lahore and Gujránwála.

Sanitary Commissioner's Office,
Lahore:
*The 1st February* 1916.

Yield normal. | Standing irrigated average and uni below average, and ing for want of rai is badly wanted. of extra spring crop tinue. |

## *GENERAL REMARKS.*

LIGHT rain was received in parts of the south-east, sub-montane and western tracts, but it was insufficient, and rain is urgently wanted everywhere. Condition and prospects of standing wheat and other spring crops on irrigated are generally normal, but unirrigated crops are poor and withering for want of rain. In parts of the south-east crops have been dam by strong cold winds. Pressing of sugarcane and harvesting of toria (*Brassica campestris*) continue in some districts; yield nor Ploughings for and sowings of extra spring crops in progress in a few districts. Cattle are generally healthy, but are beco weak owing to want of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is repo from Ambála. Prices are generally stationary, and range between warning and above scarcity rates. Prices of wheat—Ambál Lahore 8½, Ráwalpindi 9, and Lyallpur 9½ seers per rupee.

MAHBUB SHAH, SUPDT.,

for *Director of Land Records, Punjab.*

# SUMMARY OF METEOROLOGICAL CONDITIONS PREVAILING OVER THE PUNJAB AND THE NORTH-WEST FRONTIER PROVINCE DURING DECEMBER 1915.

*Not reduced to sea-level.

(a) Mean of 30 days.

(b) Mean of 27 days.

(e) Aneroid.

A winter disturbance occasioned fairly widespread though light rainfall in the Punjab and a light shower at Cherat on the 15th. With the exception of light falls of snow at Murree and Simla this was the only precipitation that occurred in the Punjab and the North-West Frontier Province during December.

*Pressure and Winds.*—Pressure was slightly in excess in the hills and practically normal in the plains. Winds were irregular. As in November, winds were considerably lighter than usual at Cherat, probably indicating that snowfall in Afghanistan was below the average.

*Temperature.*—In the North-West Frontier Province and the north Punjab minimum temperature was considerably lower than usual, probably owing to the small amount of cloud present.

The following table shows for each day of the month the departure from the norma[l] of the mean temperature of the Punjab and the North-West Frontier Province, with th[e] highest temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. |

The mean temperature of the Punjab and the North-West Frontier Province w[as] generally below normal until the 26th when temperature rose and remained above norm[al] for the rest of the month.

*Humidity and Cloud.*—There was less cloud than usual and humidity was belo[w] the average. The mean percentage of saturation for the whole month was only 22 [at] Cherat.

*Rainfall* was in defect at every station, except Lyallpur where the rain receiv[ed] on the 15th exceeded the total normal fall for the month. The deficiency was largest [at] Parachinar and Cherát.

The following table gives the rainfall data for the Punjab and the North-We[st] Frontier Province stations for December 1915 :—

| Station. | Actual rainfall in December 1915. | Normal rainfall in December. | Departure from normal in December 1915. | Station. | Actual rainfall in December 1915. | Normal rainfall in December. | Depart[ure] from normal [in] Decem[ber] 1915. |

A winter disturbance gave fairly general but light rainfall over the Punjab on the 15th and there was a light fall of snow at Simla on the 29th. No other precipita[tion] ... of the total normal fall of the month.

There was a decrease of 1·90 *per mille* of population in the birth rate as compared with the rate for the corresponding month of the previous year, the decrease w[as] shared by all the divisions in the province except Multán but most marked in the Ambála Division where it was 3·85.

Compared with the death-rate for the corresponding month of the previous year, there was a decrease of 3·77 *per mille* of population which was shared by all t[he] ... marked (4·81 *per mille*) under the head of plague.

Compared with the death-rate for the previous month there was an increase of 6·06 per 1,000 of population, which was general throughout the province, and ...

There was no death recorded under the head of cholera during the month under review.

...ITARY COMMISSIONER'S OFFICE, LAHORE :

*The 4th February, 191*

*of 20,000 or upwards) in the Punjab for the month of December* 1915.

MARKS.

occurred during the month which was consequently much drier than usual. All stations showed a deficiency in rainfall except Lyallpur, where the fall of the 1[illegible]
confined to the Lahore, Ráwalpindi and Multán divisions. Compared with the birth rate for the previous month there was a decrease of 1·05 per 1,000 of popu[illegible]
divisions in the province except Ambála, and recorded under every head of mortality except fevers, respiratory diseases and "all other causes," the dim[illegible]
principally to the greater mortality registered under the heads of fevers and respiratory affections.

Good. | Wheat, 9¾ seers ... Gram, 13 seers. Maize, 14 seers. Barley, 12 seers. Bajra, 11 seers. Prices between warning and scarcity rates, or above scarcity rates. | Pressing of sugarcane continues. Yield good. | Rain was beneficial, but more is still needed. Standing irrigated crops average and unirrigated poor. Toria being harvested. Yield normal. |
| 14 | Multán | 0·05 at Mailsi ... | 1. Scarce; turnips, &c., available. 2. (b) Canals dry. 3. Weak, owing to scarcity of fodder. | Wheat, 9½ seers ... Gram, 12½ seers. Maize, 12 seers. Prices generally between warning and scarcity rates. | Pressing of sugarcane continues. Yield normal. Ploughings for sugarcane commenced. | Rain wanted badly. Standing irrigated crops average and unirrigated below average, and withering for want of rain. Sowings of irrigated extra spring crops in progress and are normal. |

## *GENERAL REMARKS.*

Light rain was received in all reporting districts, except in Multán and parts of Miánwáli Districts. It has benefitted the standing crops, but is not sufficient, and more is urgently wanted everywhere. Condition and prospects of wheat and other crops are generally fair on irrigated area and below average on unirrigated area. In parts of the south-east and west unirrigated crops are withering for want of rain. Pressing of sugarcane and harvesting of toria (*Brassica campestris*) continue in some districts; yield normal. Sowings of extra spring crops in progress in a few districts and are normal. Cattle are generally healthy, but are becoming weak owing to want of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambála. Prices are generally stationary, but have fallen slightly in some districts and still range between warning and above scarcity rates. Prices of wheat—Ambála 8¼, Lahore 8¾, Ferozepore 9, Ráwalpindi 9½, and Lyallpur 9¾ seers per rupee.

MAHBUB SHAH, Supdt.,

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 5th February 1916, there were 879 births registered in the 38 large municipal towns (454 males and 425 females), giving a birth-rate of 38 *per mille* of population, and 717 deaths were registered (373 males and 344 females), giving a death-rate of 31 *per mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 37 against 24 in the corresponding week of the previous year; Amritsar 30 against 66; and Mulián 57 against 20.

Of the 6 deaths from small-pox, 2 each were registered in Lahore and Amritsar and 1 each in Batála and Bhera.

Sanitary Commissioner's Office,
Lahore:
*The 10th February 1916.*

W. H. MILLS, Suptd.,
*for Sanitary Commissioner,* [illegible] Panjab.

Yield normal. Ploughing for sugarcane in progress. | Rain badly wanted. Sc of extra spring continue on irrigated and are normal. |

## *GENERAL REMARKS.*

Weather was generally dry, except in parts of the south-east and submontane tracts, where light or moderate showers were recei and were beneficial for the standing crops. More rain is urgently wanted everywhere. Condition and prospects of irrigated wheat other crops are generally fair and of unirrigated below average. In parts of the south-east unirrigated crops are withering. Pres of sugarcane and harvesting of toria continue in some districts. Yield normal. Extra spring crops being sown. Area sowi generally normal. Cattle are generally healthy, but are becoming weak owing to scarcity of fodder. Water for drinking and ca irrigation generally sufficient, but shortage of canal water is reported from Ambála. Prices are generally stationary and range betw warning and above scarcity rates. Prices of wheat—Ambála $8\frac{1}{4}$, Lahore 9, Ferozepore and Ráwalpindi $9\frac{1}{4}$, and Lyallpur $9\frac{3}{4}$ seers rupee.

rain-gauge station.

MAHBUB SHAH, SUPERINTENDENT,

*Office of Director of Land Records, Punjab.*

# Notes on the condition and prospects of crops, etc, in each District of the Punjab during the month of January 1916.

## 1.—HISSAR DISTRICT.

Rabi sowings finished. Irrigated area is a little below normal and unirrigated about one-third of the normal. Irrigated standing crops in fair condition. Unirrigated crops withered or are withering for want of rain. Expected outturn of irrigated crops including wheat 12 annas and of unirrigated crops *nil* or 2 annas in the rupee if there is some rain. Fodder scarce and being imported at concession rates. Cattle getting lean. Water-supply in perennial canals sufficient. Inundation canals dry. Grain stock sufficient for local requirements.

## 2.—ROHTAK DISTRICT.

No rain fell during the month. Rain is very badly wanted. Some sowings of extra spring crops took place in parts of irrigated tracts of tehsil Sonepat but the area sown is below normal. Standing irrigated crops are in fair condition but unirrigated crops are suffering from draught and have sustained a loss of 50 per cent. Yield of irrigated rabi crops is expected to be normal but of unirrigated crops very poor. Pressing of sugarcane and picking of cotton on irrigated tracts continued. Yield is about average. Cattle in fair condition but at places getting weak for want of fodder. Dry fodder is being imported at concession rates and is a great help. Health of people good. Supply of canal water inadequate at places.

## 3.—GURGAON DISTRICT.

No rain although wanted urgently. Tobacco and onion being sown on irrigated area. Sowings below normal. Standing rabi crops specially wheat on irrigated area generally in fair condition but on unirrigated area bad. Prospects of rabi crops on irrigated area expected to be average, but on unirrigated area bad. Sugarcane being pressed. Outturn below normal. Cattle in fair condition but becoming weak for want of fodder. Green grass and fodder scarce. Fodder being imported from other provinces. Health of people generally good. Canal was running except in tehsil Ferozepore. Supply of water sufficient. No flooding by hill torrents during the month.

## 4.—KARNAL DISTRICT.

The rainfall was scanty and did no good. Rain is badly wanted. No crops were sown during the month. The condition of irrigated rabi crops is average and that of unirrigated backward in some places. Crops have begun to wither. If rain is received within a fortnight, the yield of the irrigated area would be an average one. In the absence of rain the unirrigated crops will fail and the yield would hardly be one-fourth of the average. The condition of the irrigated wheat is normal, but that of unirrigated below average. The condition of cattle is still fair but the scarcity of fodder is being felt. Leaves of trees used as fodder. No grass is procurable. Water is insufficient in tehsil Kaithal. The public health is generally good. The canals worked but supply of water was deficient. No flood.

## 5.—AMBALA DISTRICT.

Rain was insufficient but has proved beneficial to the standing crops which are average on irrigated lands and below average on unirrigated areas. Yield of sugarcane crop both in the irrigated and unirrigated areas is average. Cattle generally are in good condition. Fodder and water supply sufficient at present. Public health good. Western Jumna Canal flowed continually. No river inundation or torrent floods. Prices almost stationary.

## 6.—SIMLA DISTRICT.

Rainfall insufficient. No sowing was made during the month. Condition of crops poor. Condition of cattle good. Fodder and grazing sufficient. Public health good. Water in hill streams sufficient.

## 7.—KANGRA DISTRICT.

Rainfall below the average. There was no sowing during the month. Condition of the standing rabi crops on irrigated area is good at present, but that of unirrigated area is bad for want of rains. Cattle are generally in good condition. Public health is generally good. Water in kuhls was not quite sufficient for irrigation purposes on account of absence of rain.

8.—Hoshiarpur District.

No rain fell. The condition of the standing rabi crops on unirrigated land is awfully precarious while that on irrigated is far from satisfactory. If the drought continues for a fortnight more the wastage on irrigated area will be about 4 annas and on unirrigated about 10 annas in the rupee. Condition of cattle satisfactory but deficiency of fodder is keenly felt. Public health satisfactory. The people are fearing famine. Prices are rising gradually.

9.—Jullundur District.

Rainfall is much below average in all the tehsils of the district and more rain is badly wanted. No sowings were made during the month. Standing irrigated rabi crops and sugarcane are in average condition but the unirrigated crops are getting below average for want of rains. Sugarcane is being pressed and its yield is average. The expected yield of irrigated crops is average and that of unirrigated one's below average. Cattle in average condition. Fodder somewhat insufficient. Public health is generally good.

10.—Ludhiana District.

The slight rainfall at the end of the month has not much benefited the standing crops. No sowings took place during the month except of onion. Lands are being ploughed for extra rabi crops. Condition of rabi crops on irrigated lands satisfactory and that on unirrigated area poor. Condition of cattle is satisfactory. Fodder is scarce and dear. Public health generally good. Irrigation from canals satisfactory. No flood reported. Prices of food-stuffs stationary.

11.—Ferozepore District.

Slight rain fell throughout the district on the last day of the month which will keep the crops alive at least for a fortnight more. Rain urgently wanted. The condition of rabi crops on irrigated lands is satisfactory, but the crops on stiff unirrigated soil showed signs of withering for want of rainfall. The Bet crops seem to have suffered much for want of rainfall. The condition of cattle is good. Fodder is sufficient and green grass is available. Public health is generally good. Working of canals is satisfactory.

12.—Lahore District.

No rain fell in this month. Rain is badly wanted. Wheat, barley and fodder crops continued to be sown in the first week of this month. Ploughing for extra rabi crops going on. Condition of standing crops is average but they are withering for want of rain. Yield of sugarcane and toria good. Condition of cattle good. Fodder is available. Public health good. Canals are working satisfactorily. There were no floods in the rivers.

13.—Amritsar District.

No sowings. Standing irrigated rabi crops good. Sailab poor and barani very bad. If no more rain falls outturn of barani will be *nil*, of sailab very bad, of canal irrigated average and of well irrigated poor. Condition of cattle is below average. Fodder getting scarce in unirrigated tracts. Public health is generally good. Canals working by rotations. No flood.

14.—Gurdaspur District.

No sowings. Slight showers were received in Gurdáspur and Shakargarh tehsils. Rain is very badly wanted. The condition of irrigated and Bet crops is average and of other below average. Crops are suffering for want of rain. It depends on subsequent rainfall. Toria was harvested during the month. The outturn of irrigated crops is good and that of unirrigated average to good. Condition of cattle generally good. Fodder is scarce. Public health generally good. Rivers and canals are flowing. No flood. Prices almost unchanged.

15.—Sialkot District.

Rain needed. Sowings of extra rabi crops in Siálkot tehsil continued. Irrigated rabi crops nearly average but unirrigated poor. Yield of cane 20 maunds (gur) on irrigated and 12 maunds on unirrigated area and that of toria 5 maunds per acre. Barley is withering but wheat is not seriously damaged. If rainfall within a fortnight wheat harvest on irrigated areas should be about normal and on unirrigated slightly below average. Cattle weak owing to hard work. Public health good. Raya Branch closed. Jhallar irrigation from Aick stream continued. Water supply in Aick is sufficient.

16.—GUJRANWALA DISTRICT.

No rain. No sowings. Condition of rabi crops on irrigated lands below normal and on unirrigated getting bad on account of drought. Rain is badly wanted. The expected yield is at present estimated at 65 per cent. of the normal for irrigated and 25 per cent. of the normal for unirrigated crops. Cattle are suffering for scarcity of fodder. Public health generally good. No complaint of water supply. Canals are running by rotational turns. The prices of food grains stationary.

17.—GUJRAT DISTRICT.

Slight showers received in parts of the district. No sowings. Condition of crops on irrigated and sailab lands generally fair. Barani crops withering for want of rain, but fairly good but uneven rainfall received on 1st February 1916 has improved the situation. Sugarcane pressing in progress. Estimated yield below average. Condition of cattle good but are getting weak from scarcity of fodder. Public health good. Canal flowing.

18.—SHAHPUR DISTRICT.

There was very little rainfall. The condition of standing rabi crops is fair on irrigated area and poor elsewhere. The yield of wheat is expected to be 6 to 8 maunds per acre on irrigated area and 2 to 5½ maunds on unirrigated area. The yield of gur is 15 to 28 maunds per acre. Toria was harvested with a yield of 5 to 10 maunds per acre. Cattle in fair condition except in Khushab tehsil where scarcity of water and fodder is serious. Fodder was scarce. The state of public health was generally good.

The Lower Jhelum Canal was closed from 15th to 29th January 1916 for silt clearance. During the remaining days it flowed with sufficient supply of water. One private canal also flowed for a few days.

19.—JHELUM DISTRICT.

A few very slight showers were received during the month, these barely laid the dust. No further sowings took place. Crops withering for want of rain. On February 1st 1·06 inches were recorded at Sadr but there was none at Pind Dadan Khan or Chakwal. Fodder is scarce throughout the district. All rakhs have been opened and large quantities of bhusa imported. Public health good. Prices are generally stationary.

20.—RAWALPINDI DISTRICT.

Rainfall below average. More rain badly needed. No sowings. Crops were withering but the present rainfall (since 31st January up to 4th February) has done some good to the standing crops. The condition of cattle is good. Dry fodder still available. The state of public health is good.

21.—ATTOCK DISTRICT.

Rainfall during the month was far below average and had a little effect on the decaying crops. Tobacco and onion were sown on irrigated lands. Standing rabi crops fair. Yield is expected to be below normal. Condition of cattle fair. Scarcity of fodder is felt and oilseed crops are being grazed. Public health is generally good. Water is available. Prices have again risen.

22.—MIANWALI DISTRICT.

No sowings. Standing rabi crops are average on irrigated and less than average on unirrigated in Miánwáli and Isakhel tehsils, good on irrigated and average on unirrigated in Bhakkar. Cattle in bad condition owing to scarcity of fodder. Public health is good. The Nammal canal is watering lands in Mianwali civil station. Water is insufficient. There is sufficient irrigation from the Kurram in Isakhel tehsil.

23.—MONTGOMERY DISTRICT.

Rain badly needed. Extra rabi sowings have commenced in this month. The condition of rabi crops on chahi lands is average, that on nahri below average and of the unirrigated crops is disappointing. In case of failure of immediate rain the condition of irrigated crops too will fall much below average and that of the unirrigated crops will become hopeless. Scarcity of fodder has weakened the cattle. Public health is on the whole satisfactory. Lower Bari Doab Canal has been running throughout the month though not in full supply. All other canals are closed. Ravi is dried up but Sutlej flows with ordinary water. No floods. Prices continue to be high.

24.—LYALLPUR DISTRICT.

There was no rain in the month at all. Wheat sowings were in progress though late. Standing crops are normal. Cutting and threshing of toria commenced. Cotton pickings were finished. Outturn of cotton crop was below normal on the whole. Sugarcane pressing was in progress. Its juice was getting dry for want of rain. Average outturn was about 20 maunds an acre which is normal. Condition of cattle was generally good but they were getting weak owing to scarcity of green fodder. Leaves and barks of trees were used as fodder in Sayadwala tract in Jaránwála tehsil. Public health was generally good. Canals were working satisfactorily on the whole. Stock of food grains sufficient.

25.—JHANG DISTRICT.

Rainfall below average in the Shorkot tehsil while there was no rainfall in the Jhang and Chiniot tehsils. Vegetables are being sown. The standing rabi crops are in average condition. Green fodder is scarce. Bhoosa also is becoming scarce. Public health good. Prices stationary.

26.—MULTAN DISTRICT.

Slight rain received during the month was useful to some extent to the standing crops. Sowing of tobacco, vegetable, etc., commenced. The condition of rabi crops on irrigated area was normal but that on unirrigated area below average. The outturn of til and cotton below average. Condition of cattle fair but they are weak due to scarcity of fodder which is being felt throughout the district. Bhoosa being exported in large quantities to other districts. Jandal and turnips available as fodder. Health of people fair. Canals closed. Prices of food grains stationary. Stock of food grains especially wheat decreasing.

27.—MUZAFFARGARH DISTRICT.

No rainfall in Leiah and slight rainfall in other tehsils. Tobacco and vegetables being sown. Standing irrigated rabi crops average, and unirrigated below average. Fodder scarce. Public health good. Canals reported dry. No floods. Prices of food grains high as before.

28.—DERA GHAZI KHAN DISTRICT.

A small shower of rain was received in Dera Gházi Khan, Jámpúr and Rájanpúr which benefited the standing crops. Standing rabi crops in average condition. The yield is expected to be average. Condition of cattle on the whole good. Fodder is scarce. Public health good. No water in the canals and no flood in the hill torrents. Prices are rising.

*Remarks by the Sanitary Commissioner, Punjab.*

DURING the week ending 12th February 1916, there were 874 births registered in the 38 large municipal towns (457 males and 417 fem giving a birth-rate of 38 *per mille* of population, and 749 deaths were registered 369) males and 380 females), giving a death-rate of 33 *mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 42 against 24 in the corresponding wee the previous year; Amritsar 33 against 52; and Multán 52; against 29.

Of the 9 deaths from small-pox, 5 were registered in Amritsar and 1 each in Lahore, Batála, Gujránwála, and Jhelum.

### WEATHER, HEALTH AND CROP REPORT FOR WEEK ENDING 8 A.M., TUESDAY, THE 29TH FEBRUARY 1916.

[ Fourteen out of 28 districts are dealt with. ]

| No. | Reporting station. | Rain. | 1. Supply of fodder.<br>2. Water-supply for—<br>(a) Drinking.<br>(b) Canal irrigation.<br>3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Autumn. | Spring |
| 1 | Hissar .. | ... | 1. Scarce; being imported.<br>2. (b) Water-supply sufficient in perennial canals. Inundation canals dry.<br>3. Getting lean. | Wheat, 8 seers ...<br>Gram, 12 seers.<br>Bajra, 9½ seers.<br>Bejhar, 11½ seers.<br>Prices at scarcity or above scarcity rates. | ... | Standing irrigated crops fair, but unirrigated crops withered or withering for want of rain. Expected yield on irrigated area 12 annas in a rupee and on unirrigated area 2 annas, if some rain falls. Sowings of extra spring crops continue and are expected to be normal. |
| 2 | Rohtak .. | ... | 1. Scarce; being imported.<br>2. (a) Village ponds almost dry.<br>(b) Generally adequate.<br>3. Fair. | Wheat, 8½ seers ...<br>Gram, 12 seers.<br>Barley, 10 seers.<br>Jowar, 12½ seers.<br>Bajra, 10½ seers.<br>Prices between warning and scarcity rates or above scarcity rates. | Pressing of irrigated sugarcane in progress. Yield normal. | Standing irrigated crops average to good and unirrigated very poor. Irrigated sowings of extra spring crops continue and are below normal. Crops being damaged by drought. |

| No. | Reporting station. | Rain | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3 Condition of cattle. | Prices in seers per rupee. | Prospects of Autumn. | Prospects of Spring. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon ... | ... | 1. Scarce, being imported. 2. (b) Canals flowing in Palwal, Ballabgarh and Firozpur Tahsils; supply sufficient. 3. Fair. | Wheat, 8½ to 10 seers. Barley, 11 to 11½ seers. Gram, 11½ to 13 seers. Jowar, 11 to 13 seers. Bajra, 10½ to 12 seers. Maize, 11 to 12 seers. Prices generally between warning and scarcity rates. | ... | Condition of standing irrigated crops, specially wheat, fair to good and unirrigated bad. Yield expected to be below average to average on irrigated area and bad on unirrigated area. Germination of extra spring crops good. Crops slightly damaged by strong winds. |
| 4 | Ambála ... | 0·12 at Rúpar ... | 1. Fodder decreasing. 2. (a) Sufficient. (b) Inadequate. 3. Generally good. | Wheat, 8¼ seers ... Gram, 12¾ seers. Barley, 11 seers. Maize, 12½ seers. Bajra, 10 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane nearly finished. Yield normal. Sowings commenced. | Rain badly wanted. Condition and expected yield of standing crops, specially wheat, average on irrigated area and below average on unirrigated area. |
| 5 | Jullundur ... | ... | 1. Insufficient ... 2. (a) Sufficient. 3. Average. | Wheat, 9¼ seers ... Barley, 10 seers. Gram, 12¾ seers. Maize, 14 seers. Jowar, 10 seers. Bajra, 9 seers. Prices between warning and scarcity rates or above scarcity rates. | Pressing of sugarcane continues. Yield normal. | Rain badly needed. Standing irrigated crops average and unirrigated below average. |
| 6 | Ferozepore ... | ... | 1. Sufficient ... 2. (a) Do. (b) Sirhind Canal flowing; supply sufficient. 3. Good. | Wheat, 9½ seers ... Gram, 13 seers. Prices between warning and scarcity rates. | ... | Rain badly wanted. Standing irrigated crops good and unirrigated below average to average. |
| 7 | Lahore ... | ... | 1. Sufficient ... 2. (a) Do. (b) Satisfactory. 3. Good. | Wheat, 9½ seers ... Gram, 12¼ seers. Barley 12¾ seers. Maize 12 seers. Prices between warning and scarcity rates. | ... | Rain badly wanted. Condition and expected yield of standing irrigated crops specially wheat average and unirrigated poor. Sowings of extra spring crops in progress and are normal. |
| 8 | Amritsar ... | ... | 1. Sufficient except in unirrigated tracts. 2. (b) Canals working by rotation. 3. Below average. | Wheat, 10 seers ... Gram, 13¼ seers. Barley, 12 seers. Jowar, 11⅓ seers. Maize, 13 seers. Bajra, 11 seers. Prices between warning and scarcity rates or above scarcity rates. | Irrigated sugarcane being pressed. Yield a little below normal. | Rain badly needed. Standing irrigated crops average and unirrigated bad to below average. |
| 9 | Siálkot ... | ... | Report not received and | will be inserted if | received in time. | |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Autumn. | Spring |
| 10 | Shahpur .. | ... | 1 Scarce ... 2. (a) Sufficient, except in Khushâb Tahsil, where it is seriously short. (b) Lower Jhelum Canal flowing; supply sufficient. 3. Fair, except in Khushâb Tahsil. | Wheat, 9 to 11 seers. Barley, 12 to 12½ seers. Gram, 12 to 12½ seers. Maize, 11 to 13 seers. Jowar, 10 to 12 seers. Bajra, 10½ to 11 seers. Prices generally between warning and scarcity rates. | ... | Standing irrigated crops fair and unirrigated poor. Toria being harvested. Yield normal. |
| 11 | Ráwalpindi ... | 0·26 at Sadr ... 0·33 at Gujar Khan. 0·38 at Kahúta. 1·01 at Murree. | 1. Scarce in parts of the Kahúta Tahsil. 3. Good. | Wheat, 9½ seers ... Barley, 12½ seers. Gram, 12 seers. Maize, 12¼ to 12½ seers. Bajra, 9¾ seers. Prices between warning and scarcity rates or above scarcity rates. | ... | Rain was beneficial. Standing irrigated crops average and unirrigated below average. |
| 12 | Miánwáli .. | 0·18 at Sadr ... 0·35 at Isa Khel. 0·11 at Bhakkar. | 1. Scarce ... 2. (a) Procurable (b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter. 3. Bad. | Wheat, 8½ to 8¾ seers. Barley, 11¼ seers. Gram, 12 seers. Bajra, 9¾ seers. Prices between warning and scarcity rates or above scarcity rates. | ... | Standing irrigated crops average to good and unirrigated average. |
| 13 | Lyallpur .. | ... | 1. Generally procurable. 2. (b) Canal works by rotational closures; supply normal. 3. Good. | Wheat, 10 seers ... Gram, 13 seers. Maize, 14 seers. Barley, 12 seers. Bajra, 11 seers. Prices generally between warning and scarcity rates. | Pressing of sugarcane in progress. Yield good. Ploughings for autumn crops continue and are normal. | Rain badly needed. Standing irrigated crops average and unirrigated below average. Toria being harvested. Yield normal. Extra spring crops being sown. Area sown is normal. |
| 14 | Multán .. | ... | 1. Bhoosa; turnips, and green grass available. 2. (b) Canals dry. 3. Weak, owing to scarcity of fodder. | Wheat, 10½ seers. Gram, 12½ seers. Maize, 12½ seers. Bajra, 11 seers. Prices between warning and scarcity rates. | Pressing of sugarcane continues. Yield normal. Ploughing for sugarcane nearly finished. | Rain badly wanted. Standing irrigated crops average and unirrigated below average and are withering. Irrigated sowings of extra spring crops in progress and are normal. |

## *GENERAL REMARKS.*

Except for light showers in parts of the west, weather was generally dry. Rain is urgently wanted everywhere. Condition and prospects of irrigated wheat and other crops are generally fair, and of unirrigated below average. In parts of the south-east and west unirrigated crops are withering from want of rain. Pressing of sugarcane and harvesting of toria continue in some districts. Yield normal. Extra spring crops being sown. Area sown is generally normal. Cattle are generally healthy, but are becoming weak owing to scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambála. Prices are generally stationary, but have fallen slightly in some districts and range between warning and above scarcity rates. Prices of wheat—Ambála 8¼, Ferozepore and Lahore 9¼, Ráwalpindi 9½ and Lyallpur 10 seers per rupee.

C. A. H. TOWNSEND,

*Director of Agriculture and Industries, Punjab.*

OFFICE OF DIRECTOR OF LAND RECORDS, PUNJAB:
*Lahore, the 28th February* 1916.

B. D. SINGH, HEAD ASST., STATISTICS,
*Office of Director of Land Records, Punjab.*

# SUMMARY OF REMARKS ON THE KHARIF CROP OF THE PUNJAB FOR THE YEAR 1915.

1. *Season.*—The weather was unusually disturbed in the second and third weeks of February during which the rainfall was above normal except in some of the western districts. Widespread and fairly heavy precipitation occurred in the 2nd week of March; but during the rest of the month and throughout April, May and June the rainfall was generally in defect. Sowings were, in consequence, seriously restricted on unirrigated areas. The monsoon was very much less active than usual, and indeed, never penetrated in full strength into the Punjab with the result that the rainfall in July and August was scanty, occurring merely as sporadic showers at lengthy intervals. The deficit was most marked in August, amounting as it did to about 90 per cent. at Lahore and Multán, and 80 per cent at Ludhiána, Siálkot, Lyallpur and Khushab. This impeded sowings and caused damage to the earlier sown unirrigated crops. During the first 11 days of September the Province was practically outside the influence of the monsoon and experienced a spell of abnormally dry weather. After this, apart from minor showers, there were two well-defined periods of rainfall—one from the 14th to the 18th and the other from the 24th to the 29th of the month during which the monsoon extended over the greater part of the Punjab. The result was an invigoration of standing crops except in Shahpur and the whole of the Multán Division which remained unaffected on both occasions. The total monsoon rainfall in the Province during the season fell short of the normal by as much as 41 per cent.

Numerous light falls of rain occurred in most districts during the first week of October but the rest of the month and the whole of November were practically rainless. Light showers on the 15th and 16th of December had a beneficial effect on the sugarcane crop.

The supply of water in perennial canals was barely sufficient: in inundation canals it was generally short and river floods were low. Further, in Muzaffargarh and Dera Gházi Khan canals began to flow late.

To sum up, the climatic conditions for sowings, though promising in the beginning, became distinctly unfavourable owing to the failure of the monsoon. The rainfall of September and showers in October were most opportune and saved the standing unirrigated crops from withering except in parts of the west. Rice and cane fared better than other crops.

2. Affected by the adverse climatic conditions described above the total sown area was less than last year's and the normal sown areas by 27 and 23 per cent., respectively. The figures are as follows:—

| | *Irrigated.* | *Unirrigated.* | *Total.* |
|---|---|---|---|
| | Acres. | Acres. | Acres. |
| 1915 ... ... | 3,767,134 | 5,064,171 | 8,831,305 |
| 1914 ... ... | 4,130,023 | 7,988,412 | 12,118,435 |
| Normal ... ... | 3,507,988 | 7,993,501 | 11,501,489 |

The important variations under the principal crops in 1915 as compared with the previous year are as follows:—

| Crop. | 1915. | 1914. | Difference. | Difference. |
|---|---|---|---|---|
| | Acres. | Acres. | Acres. | Per cent. |
| Rice ... ... ... | 745,898 | 794,277 | −48,379 | −6·1 |
| Jowar ... ... ... | 1,000,515 | 1,275,649 | −275,134 | −21·6 |
| Bajra ... ... ... | 1,906,961 | 2,737,932 | −830,971 | −30·3 |
| Maize ... ... ... | 1,183,550 | 1,046,701 | +136,849 | +13·1 |
| Mung and mash ... ... ... | 355,549 | 497,679 | −142,130 | −28·6 |
| Til ... ... ... | 126,884 | 223,347 | −96,463 | −43·2 |
| Cotton ... ... ... | 826,077 | 1,687,763 | −861,686 | −51·1 |
| Fodder ... ... ... | 1,710,375 | 2,523,057 | −812,682 | −32·2 |

The most important decreases fall under jowar, bajra, til, cotton and fodder.

The main shrinkage in jowar occurred in the three chief jowar-growing districts: and is, of course, attributable to the drought which has caused the huge decline in the bajra figures, this latter crop being cultivated mainly in the south-east and north-western districts.

Decreases under til and cotton are due not only to adverse climatic conditions and inadequacy of canal water, but also to heavy stocks carried from the previous crop and the abnormal drop in prices owing to the contraction of exports. Fodder is important in the unirrigated areas of the south-east and irrigated areas of the west: hence the heavy decrease under that head. Maize, on the other hand shows an advance on last year. This is explained by the fact that it is grown on the unirrigated areas of montane and sub-montane tracts where rainfall was more satisfactory, and on the irrigated areas of the central districts where, owing to the high prices of food grains, the cereal to some extent displaced cotton.

3. *Outturns—Rice.*—The outturn on irrigated land was normal or above normal except in Gujránwála (slightly below) and Muzaffargarh (three-fourths of the normal). In Lahore it was 20 per cent above par. Among districts in which unirrigated rice is important the yield was three-fourths of the normal in Kárnal, Ambála and Siálkot and normal or nearly so elsewhere.

*Jowar.*—Irrigated jowar is important in only a few districts of the Punjab. In Jhang the yield was half the normal while in others it was about 20 per cent. short of the standard. The failure of the monsoon as noted above told very badly on the unirrigatod areas of the south-east which sow more than half the total of such area under jowar and bajra. Except in Kárnal, the outturn of jowar in that tract ranges from 40 per cent. of the normal down to only 10 per cent. in Hissar. In Dera Gházi Khan it was reported to be normal.

*Bajra.*—The irrigated outturn was normal in Shahpur and less than three-fourths of the normal in Ferozepore. Of the districts in which unirrigated bajra is very important the yield was only about half the normal everywhere except in Miánwáli (70 per cent.), Ráwalpindi (30 per cent.) and Hissar (10 per cent.).

*Maize.*—Except in Ferozepore and Gujránwála which report their yield to be 70 and 60 per cent., respectively, of the normal, the outturn was up to or above normal in all districts where the irrigated crop is important. The unirrigated crop is important in the montane and sub-montane tract. Here, thanks to the September rainfall, the yield was normal or slightly below it. In Kárnal alone it fell to 40 per cent. of the normal.

*Sugarcane.*—With the benefit derived from the autumn rainfall the outturn of this crop, both in irrigated and unirrigated tracts was generally normal or thereabouts in all important cane-growing districts.

*Cotton.*—The entirely insufficient amount of monsoon rainfall resulted in damage to this crop, specially in the western districts. Of irrigated cotton a normal yield is reported from Kárnal and some of the central districts, while the percentages of yield vary (from 50 to 80 elsewhere. Shahpur, however in which district cotton was damaged by boll worm) reports a percentage of only 30. The unirrigated crop was normal or about normal in Kárnal and sub-montane districts. Rohtak, Gujrát and Gurgaon return their yields as ranging from 40 to 50 per cent. only.

4. *Area matured and failed.*—The total matured area amounts to 6,445,989 acres as compared with 9,964,413 acres in 1914 and an estimated normal of 9,218,349 acres. The total failed area amounts to 2,385,316 acres or 27 per cent of the sown area as against 18 per cent. last year. But for the timely rainfall of September followed by useful showers in the beginning of October, the percentage of failure must have been higher.

It is to be noted in this connection that the normal matured areas used in this paragraph and in paragraph 6 have been revised since last year. For districts settled after the year 1895 the figures to be found in the Assessment Reports, and for others the averages of the 5 years, 1906-07 to 1910-11, have been used in fixing this normal.

5. *Calamities of season.*—The only calamity of the season was the absence of rainfall after the middle of March which caused serious contraction in unirrigated sowings and affected the standing crops adversely.

6. *Notes by Divisions and Districts—Ambala Division.*—The total sown and matured areas are 72 per cent. and 51 per cent. of the normal, respectively, the decrease being confined to unirrigated area. The irrigated area in both cases is slightly above the normal. Hissar District, which sows over one-fourth of the total unirrigated area in the division, reports, owing to unfavourable conditions, a drop of 53 per cent. in sown and no less than 93 per cent. in matured unirrigated area, as compared with the normal assumed. In other districts the total

sowings amount to between 80 and 90 per cent and total matured area between 55 and 72 per cent. of the normal, accept in Ambála where the matured area is approximately normal. Of the total sowings 48 per cent. failed, the percentage of loss in Hissar being as high as 77.

*Jullundur.*—The total sown and matured areas amount to 79 and 82 per cent. of the normal, respectively. Kángra and Hoshiárpur, which were more fortunate than the other districts of the division, return the percentages, 97 and 95 under sown, and 111 and 97 under matured areas, respectively. On the other hand, Ferozepore in the south east tract reports only 59 per cent. of its normal sowings. Owing to rainfall in September only 11 per cent. of the total sowings failed, Ludhiána with a percentage of 20 being the heaviest proportional sufferer.

*Lahore.*—The total sown and matured areas amount to 87 per cent. of the normal, the decrease being confined to unirrigated area. The percentages vary from 80 to 92 under sown and 80 to 97 under matured areas. The autumn rainfall saved the crops and the total failure amounts to only 10 per cent. of the sown area.

*Rawalpindi Division.*—In this division unirrigated area is important. The total sown and matured areas amount to 63 per cent. and 51 per cent. of the normal. Attock and Miánwáli, which were more unfortunate, return the percentages 41 and 33 for sown and 27 and 34 for matured areas. Of the sowings 35 per cent. failed, the percentage of loss being highest in Attock, amounting to 56.

*Multán Division.*—The great deficiency of rainfall in the division was discounted by the comparative unimportance of the unirrigated area in this tract. The total sown and matured areas amount to 90 per cent. and 94 per cent. of the normal. Montgomery, Jhang and Multán return both sown and matured areas in advance of the normal, the excess being considerable in the case of the first named. Owing to late flowing of canals and failure of floods Dera Gházi Khan shows the percentage of only 55 for both sown and matured areas. Of the sowings 13 per cent. failed.

7. *Summary.*—Taking area and yield together the harvest works out to 30 per cent. below the estimated normal and 35 per cent. below that of last year. The crops that prospered most were the rice and cane crops. As was the case last year, prices were in all cases affected by the war, and generally were appreciably higher. At the close of 1915 the price of maize had fallen by 3 per cent. owing to increase in area put under this crop. The advance in the case of jowar and bajra amounted to 11 per cent., while owing to a rise in world prices and the poor local crop the price of cotton is as much as 77 per cent. higher than at the corresponding period of last year when it had fallen to an abnormally low level. Even with this great advance the price was still 12 per cent. less than that prevailing in 1913. The rise in the price of gur amounted to 43 per cent., attributable to diminished imports of foreign sugar.

L. FRENCH,

*Director of Land Records, Punjab.*

*Remarks by the Sanitary Commissioner, Punjab.*

DURING the week ending 19th February 1916, there were 862 births registered in the 38 large municipal towns (436 males and 426 females) giving a birth-rate of 38 *per mille* of population, and 695 deaths were registered (375 males and 320 females), giving a death-rate of 30 *per mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 28 against 21 in the corresponding week of the previous year; Amritsar 31 against 57; and Multán 50 against 31.

There was 1 death reported from plague in Jagadhri. Of the 5 deaths from small-pox, 2 were registered in Batála and 1 each in Ludhiana, Amritsar, and Pind Dadan Khan.

### WEATHER, HEALTH AND CROP REPORT FOR WEEK ENDING 8 A.M., TUESDAY, THE 7TH MARCH 1916.

[ Fourteen out of 28 districts are dealt with. ]

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring | Autumn. |
| 1 | Hissar .. | ... | 1. Scarce; being imported. 2. (b) Water-supply sufficient in perennial canals. Inundation canals dry. 3. Getting lean. | Wheat, 8¼ seers ... Gram, 12¼ seers. Bajra, 9½ seers. Bejhar, 11¾ seers. Prices at scarcity or above scarcity rates. | Standing irrigated crops fair, but unirrigated crops withered or withering for want of rain. Expected yield on irrigated area 12 annas in a rupee and on unirrigated area nearly 2 annas. Sowings of extra spring crops continue, and are expected to be normal. | ... |
| 2 | Rohtak .. | ... | 1. Scarce; being imported. 2. (a) Village ponds almost all dry. (b) Canals closed. 3. Generally fair. | Wheat, 8½ seers ... Gram, 12½ seers. Barley, 10 seers. Jowar, 12¼ seers. Bajra, 10½ seers. Prices between warning and scarcity rates or above scarcity rates. | Rain urgently wanted. Standing irrigated crops average to good and unirrigated very bad. Irrigated sowings of extra spring crops continue and are below normal. Crops being damaged by drought and strong winds. | Sowings of irrigated sugarcane commenced and are timely but below normal. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon ... | ... | 1. Scarce; being imported. 2. (b) Sufficient. 3. Poor. | Wheat, 8½ to 10 seers. Barley, 11 to 11¾ seers. Gram, 11½ to 13 seers. Jowar, 10½ to 12 seers. Bajra, 10½ to 11 seers. Maize, 11 to 12 seers. Prices generally between warning and scarcity rates. | Condition of standing irrigated crops, specially wheat, fair to good and of unirrigated bad. Outturn expected to be below average on irrigated area and bad on unirrigated area. Extra spring crops being sown on irrigated area. Germination good. Crops slightly damaged by strong winds. | ... |
| 4 | Ambála ... | ... | 1. Decreasing ... 2. (a) Sufficient. (b) Inadequate. 3. Generally good. | Wheat, 9 seers ... Gram, 13¾ seers. Barley, 13 seers. Maize, 14 seers. Bajra, 10 seers. Prices between warning and scarcity rates. | Rain badly needed. Condition and expected yield of standing irrigated crops, specially wheat, average and of unirrigated below average. Extra spring crops being sown. | Sowings of sugarcane in progress. |
| 5 | Jullundur ... | ... | 1. Insufficient ... 2. (a) Sufficient. 3. Average. | Wheat, 9¾ seers ... Barley, 11 seers. Gram, 13¾ seers. Maize, 15½ seers. Jowar, 10 seers. Bajra, 9 seers. Prices between warning and scarcity rates or above scarcity rates. | Rain badly needed. Standing irrigated crops average and unirrigated below average. Sowings of extra spring crops commenced and are below normal. | Pressing of sugarcane finished. Yield normal. |
| 6 | Ferozepore ... | ... | 1. Sufficient ... 2. (a) Do. (b) Sirhind Canal flowing; supply sufficient. 3. Good. | Wheat, 10 seers ... Gram, 13 seers. Prices between warning and scarcity rates. | Rain badly wanted. Standing irrigated crops good and unirrigated below average to average. | ... |
| 7 | Lahore ... | ... | 1. Sufficient ... 2. (a) Do. (b) Satisfactory. 3. Good. | Wheat, 9½ seers ... Gram, 12½ seers. Barley 12¾ seers. Maize 12 seers. Prices between warning and scarcity rates or above scarcity rates. | Rain badly wanted. Condition and expected yield of standing irrigated crops, specially wheat, average and unirrigated poor. Sowings of extra spring crops continue and are normal. | ... |
| 8 | Amritsar ... | ... | 1. Sufficient except in unirrigated tracts. 2. (b) Canals working by rotation. 3. Below average. | Wheat, 10½ seers ... Gram, 14 seers. Barley, 12 seers. Jowar, 11½ seers. Maize, 16 seers. Bajra, 11½ seers. Prices generally between warning and scarcity rates. | Standing irrigated crops average and unirrigated bad to below average. | ... |
| 9 | Siálkot ... | ... | 1. Scarce. Senji &c., used as fodder. 2. (a) Sufficient. (b) Water sufficient in Aik stream. 3. Weak. | Wheat 9 to 9½ seers. Barley 12 to 14 seers. Maize 11½ to 12 seers. Gram 12 to 13 seers. Prices between warning and scarcity rates. | Standing irrigated crops average and unirrigated poor. Sowings of extra spring crops in progress on irrigated area. | Pressing of sugarcane continues in Siálkot and Daska Tahsils. Yield normal. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 10 | Shahpur | ... | 1. Scarce ... 2. (a) Sufficient, except in Khusháb Tahsil, where it is seriously short. (b) Lower Jhelum Canal flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, $9\frac{1}{2}$ to 11 seers. Barley, $12\frac{1}{2}$ to 14 seers. Gram, $12\frac{1}{2}$ seers. Jowar, 10 to 12 seers. Bajra, $10\frac{1}{2}$ to $11\frac{1}{2}$ seers. Maize, $10\frac{1}{2}$ to 14 seers. Prices generally between warning and scarcity rates. | Standing irrigated crops fair, and unirrigated poor. Sowing of tobacco commenced. | |
| 11 | Ráwalpindi ... | 0·64 at Murree ... | 1. Scarce in parts of Kahúta and Murree Tahsils. 3. Good. | Wheat, 10 seers ... Barley, 13 seers. Gram, $12\frac{1}{2}$ seers. Maize, 13 to $13\frac{1}{2}$ seers. Bajra, 10 seers. Prices generally at warning or scarcity rates. | Rain wanted. Standing irrigated crops average and unirrigated below average. Sowings of extra spring crops commenced and are timely. | |
| 12 | Miánwáli ... | ... | 1. Scarce ... 2. (a) Procurable. (b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter. 3. Generally bad. | Wheat, 9 to $9\frac{1}{2}$ seers. Barley, $11\frac{1}{2}$ seers. Gram, 13 seers. Bajra, $9\frac{3}{4}$ seers. Prices between warning and scarcity rates or above scarcity rates. | Standing irrigated crops average to good, and unirrigated average. | |
| 13 | Lyallpur .. | ... | 1. Generally procurable. 2. (b) Canal works by rotational closures; supply normal. 3. Good. | Wheat, $10\frac{1}{2}$ seers ... Gram, $13\frac{1}{2}$ seers. Maize, 16 seers. Barley, 12 seers. Bajra, 11 seers. Prices generally at warning or scarcity rates. | Rain badly needed. Standing irrigated crops average, and unirrigated below average. Harvesting of *toria* completed. Yield normal. Sowings of extra spring crops continue and are normal. | Pressing of sugarcane continues. Yield good. Ploughings in progress and are normal. |
| 14 | Multán ... | ... | 1. Bhusa, turnips, and green grass available. 2. (b) Canals dry. 3. Weak, owing to scarcity of fodder. | Wheat, $10\frac{1}{2}$ seers .. Gram, $12\frac{1}{2}$ seers. Maize, 12 seers. Bajra, 11 seers. Prices between warning and scarcity rates. | Rain badly wanted. Standing irrigated crops average, and unirrigated below average, and are withering. Irrigated sowings of extra spring continue and are normal. | Pressing of sugarcane continues. Yield normal. Ploughings for sugarcane finished. |

*GENERAL REMARKS.*

Weather dry. Rain is urgently wanted everywhere. Condition and prospects of irrigated wheat and other crops generally are fair, and of unirrigated below average. In parts of the south-east and west unirrigated crops are withering for want of rain. Sowings of extra spring crops continue and are generally normal. Pressing of sugarcane completed. Yield normal. Cattle are generally healthy, but are becoming weak owing to scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambála. Prices are falling slightly, and range between warning and above scarcity rates. Prices of wheat—Ambála 9, Lahore $9\frac{1}{4}$, Ferozepore and Ráwalpindi 10, and Lyallpur $10\frac{1}{2}$ seers per rupee.

MAHBUB SHAH, Supdt.,

*Not reduced to sea-level.

(a) Mean of 27 days.

(b) Mean of 26 days.

(c) Aneroid.

Several depressions entered north-west India during the month, but the only one of any importance was the last which gave nearly general rain in the North-West Frontier Province and local rain in the east and north Punjab. Weather was thus unusually dry.

*Pressure and Winds.*—Pressure was above the average especially at the hill stations. Winds were fairly normal.

*Temperature.*—Temperature was higher than usual, especially the maximum which on the average of the whole month was 7° above normal at Rawalpindi and 5° at Hissar and Ambála. At some stations minimum temperature was either normal or below it, the lowest reading recorded being 30·1 at Ráwalpindi on the 4th.

The following table shows for each day of the month the departure from the normal of the mean temperature of the Punjab and the North-West Frontier Province, with the lowest minimum temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Lowest minimum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Lowest minimum temperature recorded during the previous 24 hours. | Station at which registered. |

| „ 16th ... | + 2·6 | 37·1 | Ráwalpindi. | | | | |

During the first half of the month the mean temperature of the two provinces was nearly normal, but it rose steadily during the second half and by the 30th averaged 8° above normal.

*Humidity and Cloud.*—As might be expected from the absence of rainfall humidity was much below the average, but as the depressions were accompanied by cloud the amount of cloud did not differ much from normal

*Rainfall.*—Most of the rainfall occurred in the North-West Frontier Province, and at Drosh was decidedly in excess of the normal, but all the remaining stations show a defect which was largest at the hill stations of Murree, Cherát and Simla and the submontane stations of Ráwalpindi and Siálkot.

The following table gives the rainfall data for the Punjab and the North-West Frontier Province stations for January 1916 :—

| Station. | Actual rainfall in January 1916. | Normal rainfall in January. | Departure from normal in January 1916. | Station. | Actual rainfall in January 1916. | Normal rainfall in January. | Departure from normal in January 1916. |

| | | | | | Spring | Autumn. |
| 10 | Shahpur ... | ... | 1. Scarce ... 2. (a) Sufficient, except in Khushâb Tahsil, where it is seriously short. (b) Lower Jhelum Canal flowing; supply sufficient. 3. Fair, except in Khushâb Tahsil. | Wheat, 10 to 11½ seers. Gram, 12 to 13½ seers. Barley, 13½ to 16 seers. Jowar, 11 to 12 seers. Bajra, 11 seers. Maize, 11 to 14 seers. Prices generally between warning and scarcity rates. | Standing irrigated crops fair, and unirrigated poor. Sowings of extra spring crops in progress and are normal. | |
| 11 | Râwalpindi ... | ... | 1. Scarce ... 3. Good. | Wheat, 9½ seers ... Barley, 13 seers. Gram, 12½ seers. Maize, 13 to 13½ seers. Bajra, 10 seers. Prices generally between warning and scarcity rates. | Rain wanted. Standing irrigated crops average and unirrigated below average. Timely sowings of extra spring crops in progress and are normal. | |
| 12 | Miánwáli ... | ... | 1. Scarce ... 2. (a) Procurable, except in Thal. (b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter. 3. Generally bad. | Wheat, 9¼ to 9½ seers. Barley, 12 seers. Gram, 13 seers. Bajra, 9¾ seers. Prices between warning and scarcity rates or above scarcity rates. | Standing irrigated crops average to good, and unirrigated average to poor. | |
| 13 | Lyallpur ... | ... | 1. Dry generally sufficient; green insufficient. 2. (b) Canal works by rotational closures; supply normal. 3. Good. | Wheat, 11 seers ... Gram, 14½ seers. Maize, 16 seers. Barley, 12 seers. Bajra, 11 seers. Prices generally warning or scarcity rates. | Rain badly needed. Standing irrigated crops average, and unirrigated below average. Sowings of extra spring crops continue and are normal. | Pressing of sugar cane nearly finished. Yield good. Ploughings in progress. |
| 14 | Multán ... | ... | 1. Bhusa, turnips, and green wheat and barley available. 2. (b) Canals dry. 3. Weak owing to scarcity of fodder. | Wheat, 10½ seers .. Gram, 12½ seers. Maize, 12½ seers. Bajra, 11 seers. Prices generally between warning and scarcity rates. | Standing irrigated crops average and unirrigated below average, and are withering. Rain badly wanted. Irrigated sowings of extra spring crops continue and are normal. | Pressing of sugarcane in progress. Yield normal. |

## *GENERAL REMARKS.*

WEATHER dry. Rain is urgently wanted everywhere. Condition and prospects of wheat and other crops on irrigated area are generally fair, and on unirrigated area bad in the south-east and poor elsewhere. In parts of the south-east and west unirrigated crops are withering for want of rain. Sowings of extra spring crops and sugarcane continue in some districts and are generally normal. Cattle are generally healthy, but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambála. Prices show a slight downward tendency and are generally between warning and scarcity rates. Prices of wheat—Ambála and Ráwalpindi 9½, Ferozepore and Lahore 10, and Lyallpur 11 seers per rupee.

rain-gauge station.
rainfall.

report.
that snowfall was considerably below average in January 1916.

MAHBUB SHAH, SUPERINTENDENT.

# Notes on the condition and prospects of crops, etc., of the Punjab during the month of February 1916.

## 1.—HISSAR DISTRICT.

Rabi sowings finished. Irrigated sowings a little below normal and unirrigated sowings between ⅓rd and ¼th of normal. Irrigated standing crops in fair condition. Unirrigated withered or withering for want of rain. Expected outturn of irrigated crops including wheat 12 annas and of unirrigated *nil* or 2 annas in a rupee if there is some rain. Extra *rabi* sowings in hand and are expected to be normal. Fodder scarce and being imported by rail. Cattle getting lean. Water supply in perennial canals sufficient. Inundation canal dry. Grain stock sufficient for local requirements.

## 2.—ROHTAK DISTRICT.

Rain somewhat improved the condition of standing crops, but it was quite insufficient to save the withering unirrigated crops. Sowings of extra *rabi* in parts of irrigated tracts continues, but the area sown is yet below average. Condition of standing irrigated crops average to good, but unirrigated crops are in very bad condition, and will be a total failure in the absence of rain which is urgently wanted. Expected yield of irrigated crops average and of unirrigated *nil*. Cattle in fair condition. Dry fodder is being imported. Health of people generally good. Supply of canal water generally adequate, but village ponds are almost dry.

## 3.—GURGAON DISTRICT.

Good rain fell throughout the district by the middle of the month, and was beneficial to standing crops on irrigated areas, especially in Palwal, Nuh and Firozpur Tahsils. Strong winds blew for the last 10 days of the month and injured the standing crops to some extent. Extra spring crops are being sown on irrigated areas. Rabi crops, especially wheat, on irrigated area are generally in fair condition, but on unirrigated area they are bad. Outturn of irrigated rabi crops is expected to be below average and that of unirrigated crops bad. Cattle in poor condition. Green grass scarce. Fodder is being imported extensively from other provinces. Health of people good. Canal was running in Palwal, Ballabgarh and Firozpur Tahsils. Supply of water sufficient. No flooding by hill torrents during the month.

## 4.—KARNAL DISTRICT.

Rainfall was slight and benefited the standing crops to some extent. The subsequent high westerly wind and unusual cold damaged the gram and rapeseed crops to a considerable extent and dried up the moisture. The ploughing for and sowing of extra *rabi* in progress. The condition of irrigated crops owing to cold and dry weather is ¾ths and that of unirrigated ¼th of the normal. Condition of unirrigated crops in Kaithal Tahsil is worse than other tahsils. Expected yield of irrigated crops is ¾ths and that of unirrigated ¼th of the average. Owing to scarcity of fodder and water and overwork cattle have become weak and are fed on leaves of trees. The supply of canal water was deficient. No flood.

## 5.—AMBALA DISTRICT.

Rain insufficient, but has saved the standing crops from withering. The sowings of sugarcane and of extra *rabi* crops commenced. The condition and expected yield of the standing crops on irrigated land are average and those on unirrigated land below average. Cattle are generally in good condition. Fodder stocks are being used up. Water supply sufficient for the present. Public health generally good. Western Jumna Canal flowed continually, but water was inadequate for irrigation purposes. No river inundations or flood torrents. Prices almost stationary.

## 6.—SIMLA DISTRICT.

Rain in both tahsils insufficient. More rain is needed. No sowings made. Condition of crops in both tahsils poor to average. Conditions of cattle good. Fodder and grazing sufficient. Water in hill streams sufficient.

## 7.—KANGRA DISTRICT.

Rainfall during the month has been below average, except at Palampur where it was above average. This was beneficial to standing crops. No sowings were made during the month. Condition of irrigated standing crops is good, but that of unirrigated is average. Cattle are generally in good condition. Public health is generally good. Water in Kuhls was sufficient for irrigation purposes.

### 8.—HOSHIARPUR DISTRICT.

As a result of rainfall, though insufficient, deterioration in the condition of crops has ceased for some time. The condition of crops is much below average. Half the barani and ⅞ths of irrigated sowings might ripen. Half the barani and ⅞ths of irrigated area might give normal produce. Condition of cattle satisfactory. Scarcity of fodder is felt. Public health satisfactory. Shah Nahr Canal was closed for the whole month. Prices stationary.

### 9.—JULLUNDUR DISTRICT.

Rainfall above average in all the four tahsils except Nawanshahr, where it is a little below average, but more rain is still badly needed. Recent rains temporarily checked withering of barani crops. These crops have again begun to wither, except in Sirwal Circle of Jullundur, and some places in Dona Circles of Jullundur and Nakodar Tahsils. No sowings were made during the month. Standing irrigated rabi crops are in average condition, but the prospects of the unirrigated crops, except in Sirwal of Jullundur and Dona Circles of Jullundur and Nakodar Tahsils, where they are about average, are very bad for want of rains. Sugarcane is being pressed, and its yield is average. Cattle in average condition. Fodder insufficient. Public health is generally good.

### 10.—LUDHIANA DISTRICT.

Rainfall during the month was average but not evenly distributed. It has to some extent benefited the standing crops. More rain is still wanted. Sowings of some of the extra rabi crops commenced during the month. Condition of crops on irrigated area average and on unirrigated area somewhat poor. Condition of cattle is not satisfactory. Green fooder is scarce and dry fooder is still dear. Public health generally good. Irrigation from canals satisfactory. No floods reported. Prices of food-stuffs fell slightly during the month.

### 11.—FEROZEPORE DISTRICT.

Rainfall was inadequate, though it kept the crops alive till the end of the month on unirrigated area. However, it proved beneficial to the crops on irrigated area and on Bet land, adjoining the river bed. The condition of crops on irrigated land and on unirrigated Bet land is satisfactory, but the crops on stiff unirrigated soil are withering for want of rain which is anxiously awaited. The condition of cattle is good. Green fodder is sufficient and straw is available. The public health is generally good. The working of Sirhind Canal is satisfactory. The Perennial Canals are dry. Prices remained stationary.

### 12—LAHORE DISTRICT.

Some rain was received on 13th and 14th, which was not adequate, and afforded only a temporary relief. Sowings of extra rabi crops commenced during the month. Extent of sowings was normal. Condition of standing crops poor for want of rain. Yield of sugarcane and toria has been normal. Expected yield of wheat is normal. Condition of cattle good. Fodder is available. Public health good. Canals are working satisfactorily. There were no floods in the rivers.

### 13.—AMRITSAR DISTRICT.

Statement not received, will be published next week.

### 14—GURDASPUR DISTRICT.

The rainfall during the month was beneficial, but more is wanted. No sowings except some extra spring crops. The condition of crops on irrigated low-lying lands and sailab is average to good, elsewhere it is mostly poor. Pressing of cane continued, and outturn average to good. Expected yield of rabi below average. Cattle generally in good condition. Fodder is scarce. Public health generally good. Rivers and canals are flowing. No flood in Ravi and Beas. Prices slightly easier.

### 15—SIALKOT DISTRICT.

Rain beneficial. Sowings of extra spring crops continued in irrigated tracts. Condition of standing crops average in irrigated and poor in unirrigated tracts. Yield per acre of cane 20 maunds, gur on irrigated and 12 maunds on unirrigated area. If rain falls within a month the outturn of the rabi crops will be about average on irrigated area and poor on unirrigated area. Cattle weak owing to hard work and scarcity of fodder. Public health good. Raya Branch closed. Jhallari irrigation from Aik continued. Water supply in Aik is sufficient.

### 16.—GUJRANWALA DISTRICT.

The rainfall during the month has to some extent benefited the standing rabi crops. It was insufficient, and more is badly wanted. Sowings of extra rabi crops and sugarcame are in progress. The irrigated crops are average, but unirrigated crops are deteriorating on

account of drought after the middle of February. Unfavourable winds affected the gram crop which is withering in some places. State of cattle generally good. Scarcity of fodder is still complained of. Public health generally good. There was some complaint about canal water supply owing to rotational turns.

17.—Gujrat District.

Fairly good but unevenly distributed rainfall received during the month. Sowings of extra rabi crops commenced in a few places. Rainfall received during the first fortnight of the month improved the condition of crops, but the subsequent break is again telling heavily upon them. The condition of crops on irrigated lands is only fair, and on unirrigated lands generally poor. Rain is badly wanted. Cattle weak for want of fodder, otherwise their condition is good. Public health good. Canal flowing.

18.—Shahpur District.

There was very little rainfall. Condition of the standing crops is fair on irrigated area and poor elsewhere. Yield of wheat is expected to be average. Condition of cattle is fair except in Khushab Tahsil where scarcity of fodder and water is serious. State of public health is generally good. The Lower Jhelum Canal continued to flow with sufficient supply of water. One private canal also flowed for a few days.

19.—Jhelum District.

Sowings of melon, jowar and of cotton (to a small extent) were made in parts of Jhelum Tahsil owing to the rain received on 1st and 14th of the month. No sowings elsewhere. Standing crops improved to a good extent in Jhelum Tahsil, in the other tahsils the little rain received only staved off the time for which the crops will wither if no further rain falls shortly. Expected yield will be average on irrigated and sailab lands and about 12 annas in a rupee on barani land in Jhelum Tahsil. Cattle healthy, but fodder is scarce everywhere. Public health good.

Prices are generally stationary.

20.—Rawalpindi District.

Rainfall below average except in the Murree Tahsil where it has been much above the average. This rain has done much good to the standing crops. Condition of the standing crops is not good. They are below average. Cattle are in good condition, dry fodder still available. Public health good.

21.—Attock District.

The rains during the month have improved the condition of the crops which otherwise would have been hopeless. The amount of rain at Talagang Tahsil was too small to benefit the decaying crops. Extra spring crops, etc., were sown during the month. Condition of standing crops poor in Talagang and fair in the remaining tahsils. Yield expected to be below normal. Scarcity of fodder is keenly felt, and in some parts of the district cattle are suffering. Public health good. No canals, water is sufficient. Prices are stationary.

22.—Mianwali District.

Sowings of extra spring crops were restricted. The condition and expected yield of rabi crops on irrigated lands average to good and on unirrigated lands poor to average. Cattle in bad condition owing to scarcity of fodder. Public health good. The Kurram is sufficiently watering lands in Isa Khel. Water in Nammal Canal is insufficient.

23.—Montgomery District.

The extra rabi sowings have been in progress during the month. The condition of standing crops is below average. The recent rain has not so far affected any remarkable improvement in the condition of the crops. Rain is badly needed The yield is expected below normal. Scarcity of fodder has weakened the cattle. General health is satisfactory. No floods. The Lower Bari Doab Canal has continued to run; all other canals are closed.

24.—Lyallpur District.

Rain though insufficient has done good to the rabi crops. Extra spring crops have been sown. Standing crops are normal except gram crop which is below normal for want of rain. Rain is badly wanted. Toria is being threshed and sugarcane pressed. Outturn of toria is fair and of sugarcane good. Condition of cattle is generally good. Green fodder is inadequate. Dry fodder is sufficient

in the district except Sayadwala tract of the Jaranwala Tahsil where leaves and barks of trees are being used as fodder. Public health is generally good. Canals are working satisfactorily. Stock sufficient.

25.—JHANG DISTRICT.

No rain except in Chiniot Tahsil. Extra spring crops being sown. Standing crops are in average condition in the Jhang Tahsil, but below average elsewhere. Cattle healthy. Green fodder is scarce, bhusa is also becoming scarce. Public health good. Prices stationary.

26.—MULTAN DISTRICT.

Practically no rain. Sowings of extra rabi crops were normal. Rain badly wanted throughout the district. The condition of crops on irrigated areas average and on unirrigated areas below average. The crops in latter lands are withering for want of rain. Sugarcane being pressed with average outturn. Condition of cattle was fair though weak due to scarcity of fodder. Bhusa, green grass, turnips, etc., were available as fodder. Stock of bhusa decreased. Health of people good. All canals are dry. Prices of good grains stationary. Stock of wheat has decreased.

27.—MUZAFFARGARH DISTRICT.

Rainfall slight. Extra spring crops sown. Condition of standing crops average on irrigated and below average on unirrigated lands. Condition of cattle fair. Fodder scarce. Public health good. Canals dry. No floods in river. Prices of food grains falling.

28.—DERA GHAZI KHAN DISTRICT.

The small showers received at places benefited the standing crops. Sowings of extra rabi are being made Condition of standing crops average. The yield is expected to be below average. Condition of cattle on the whole good. Fodder is scarce. Public health on the whole good. Canals dry. No floods in the river or hill torrents. Prices are stationary.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 4th March 1916, there were 957 births registered in the 88 large municipal towns (498 males and 459 females) giving a birth-rate of 42 *per mille* of population, and 636 deaths were registered (346 males and 290 females), giving a death-rate of 28 *per mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 33 against 21 in the corresponding week of the previous year; Amritsar 29 against 48; and Multán 29 against 19.

There were 2 deaths reported from plague in Rawalpindi, and 1 each in Jagadhri and Jalalpur. Of the 5 deaths from small-pox, 2 were registered in Amritsar and 1 each in Hoshiárpur, Ludhiána and Lahore.

Sanitary Commissioner's Office,
Lahore;
*The 14th March 1916.*

Weak. | Wheat, 9½ to 10 seers. Barley, 12 to 12½ seers. Maize, 12 to 13 seers. Gram, 11½ to 12 seers. | More rain wanted. Standing irrigated crops average and unirrigated poor. Sowings of irrigated extra spring in progress and are normal. | Sowings of irrigated sugarcane continue and are normal. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of — Spring. | Prospects of — Autumn. |
|---|---|---|---|---|---|---|
| 10 | Shahpur ... | 0·14 at Sadr ... 0·16 at Bhera. 0·29 at Shahpur. 0·40 at Khusháb. | 1. Scarce ... 2. (a) Sufficient, except in Khusháb Tahsil, where it is seriously short. (b) Lower Jhelum Canal flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, 10¾ to 13¼ seers. Gram, 13¼ to 14¼ seers. Barley, 14 to 16 seers. Jowar, 11 seers. Bajra, 11 to 13 seers. Maize, 11 to 15¾ seers. Prices generally between warning and scarcity rates. | Standing irrigated crops fair, and unirrigated poor. Sowings of extra spring crops in progress and are normal. | ... |
| 11 | Ráwalpindi ... | 1·90 at Sadr ... 1·70 at Gujar Khan. 2·31 at Kahúta. 1·83 at Murree. | 1. Insufficient ... 3. Good. | Wheat, 9¾ seers ... Barley, 13 seers. Gram, 13 seers. Maize, 13½ to 14 seers. Bajra, 10 seers. Prices generally between warning and scarcity rates. | Rain was sufficient and beneficial, standing irrigated crops average and unirrigated below average. Sowings of extra spring crops in progress and are normal and timely. | ... |
| 12 | Miánwáli ... | 0·53 at Sadr ... 0·16 at Isa Khel. | 1. Scarce ... 2. (b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter. 3. Bad. | Wheat, 9¼ to 9¾ seers. Barley, 12½ seers. Gram, 13½ seers. Bajra, 9¾ seers. Prices between warning and scarcity rates or above scarcity rates. | Standing irrigated crops average to good, and unirrigated average to poor. | ... |
| 13 | Lyallpur .. | 0·20 at Sadr ... 0·10 at Toba Tek Singh. 0·04 at Jaranwála. 0·06 at Samundri. | 1. Dry generally sufficient; green insufficient. 2. (b) Canals work by rotational closures; supply normal. 3. Good. | Wheat, 11½ seers ... Gram, 14½ seers. Maize, 16 seers. Barley, 12 seers. Bajra, 12 seers. Prices generally at warning and scarcity rates. | Standing irrigated crops average, and unirrigated below average. Sowings of extra spring crops continue and are normal. | Ploughings in progress and are normal. |
| 14 | Multán .. | 0·07 at Sadr .. 0·08 at Shujabad. 0·05 at Lodhrán. 0·04 at Mailsi. 0·04 at Kabírwála. | 1. Bhusa, green wheat, etc., available. 2. (b) Canals dry. 3. Weak owing to scarcity of fodder. | Wheat, 10¾ seers. Gram, 13 seers. Maize, 13 seers. Bajra, 11¾ seers. Prices at warning or scarcity rates. | Rain was somewhat useful. Standing irrigated crops average and unirrigated below average, and are withering. Irrigated sowings of extra spring crops continue and are normal. | Pressing of sugarcane in progress. Yield normal. |

*GENERAL REMARKS.*

SLIGHT showers were received in nearly all the reporting districts, except in parts of the south-east. The fall was moderate in Ráwalpindi. It was insufficient and more rain is wanted everywhere. Condition and prospects of irrigated wheat and other crops are generally average and of unirrigated crops bad in the south-east and poor elsewhere. Strong winds have also damaged the crops in parts of the south-east. Sowings of extra spring crops and sugarcane continue and are generally normal. Germination of extra spring crops is good. Cattle are generally healthy, but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambála and Rohtak. Prices are falling generally. In case of wheat they range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat— Ráwalpindi 9¾, Ambála and Lahore 10, Ferozepore 11, and Lyallpur 11½ seers per rupee.

## *Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 11th March 1916, there were 1,012 births registered in the 38 large municipal towns (531 males and 481 fem[ales]) giving a birth-rate of 44 *per mille* of population, and 692 deaths were registered (364 males and 328 females), giving a death-rate of 30 *p[er] mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 33 against 27 in the corresponding w[eek of] the previous year; Amritsar 33 against 48; and Multán 43 against 21.

There were 3 deaths reported from plague in Ambála, and 1 in Kasúr. Of the 7 deaths from small-pox, 4 were registered in Lu[dhiána,] 2 in Amritsar and 1 in Batála.

Sanitary Commissioner's Office,
Lahore;
*The 21st March 1916.*

W. H. MILLS, Supdt.
for Sanitary Commissioner, Pu[njab].

Registered No. L. 864.

*Remarks by the Sanitary Commissioner, Punjab.*

DURING the week ending 18th March 1916, there were 863 births registered in the 38 large municipal towns (420 males and 443 females) giving a birth-rate of 38 *per mille* of population, and 664 deaths were registered (333 males and 331 females), giving a death-rate of 29 *per mille* of population. The death-rates registered in the three largest towns were as follows:—Lahore 21 against 29 in the corresponding week of the previous year; Amritsar 31 against 73; and Multán 38 against 29.

Of the 2 deaths from plague, 1 each was registered in Ambála and Kasúr. There were 6 deaths reported from small-pox in Ludhiána, 2 in Pind Dadan Khan and 1 each in Hissar, Jullundur and Amritsar.

There was 1 death recorded from cholera in Lahore.

## PART I.

## STATISTICAL.

### Weather, health and crop report for week ending 8 A.M., Tuesday, the 4th April 1916.

[ Fourteen out of 28 districts are dealt with. ]

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 1 | Hissar ... | ... | 1. Scarce; being imported. 2. (b) Water-supply in perennial canals sufficient. Inundation canals dry. 3. Getting lean. | Wheat, 10¾ seers... Gram, 14 seers. Bejhar, 14 seers. Bajra, 10½ seers. Prices generally between warning and scarcity rates. | Crops being reaped. Yield on irrigated area 10 annas and on unirrigated area less than 2 annas in a rupee. Extra spring crops in fair condition. | ... |
| 2 | Rohtak ... | 0·01 at Sadr ... | 1. Available; being also imported. 2. (a) Village ponds almost all dry. (b) Adequate. 3. Generally fair. | Wheat, 10½ seers ... Gram, 14 seers. Barley, 13½ seers. Jowar, 14½ seers. Bajra, 12½ seers. Prices generally between warning and scarcity rates. | Standing irrigated crops fair to good and unirrigated bad except in Sonepat Tahsil, where they are below average. Reaping continues. Yield on irrigated area about average and on unirrigated area very poor. Sowings of irrigated extra spring crops continue and are below normal. | Sowings of sugarcane on irrigated area in progress and are below normal. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon ... | ... | 1. Scarce; being imported.<br>2. (b) Sufficient.<br>3. Poor. | Wheat, 8 to 11 seers.<br>Barley, 13 to 16 seers.<br>Gram, 12½ to 14½ seers.<br>Jowar, 11 to 14 seers.<br>Bajra, 11 to 12 seers.<br>Maize, 11 to 13 seers.<br>Prices between warning and scarcity rates. | Standing irrigated crops fair and unirrigated bad. Reaping commenced. Yield average on irrigated area and ¼th of an average on unirrigated area. Standing crops damaged by strong winds. Condition of extra spring crops good. Yield expected to be average. Extra spring crops being sown in Ferozepore Tahsil. | |
| 4 | Ambála ... | ... | 1. Scarce ...<br>2. (a) Sufficient.<br>(b) Inadequate.<br>3. Generally good. | Wheat, 11 seers ...<br>Gram, 15½ seers ...<br>Barley, 13 seers ...<br>Maize, 18 seers ...<br>Bajra, 10 seers ...<br>Prices generally between normal and warning rates. | Reaping of crops continues. Yield on irrigated area average and on unirrigated area below average. Extra spring crops not good owing to scarcity of rain. | |
| 5 | Jullundur ... | ... | 1. Insufficient to some extent.<br>3. Good. | Wheat, 12¼ seers...<br>Barley, 13 seers ...<br>Gram, 14½ seers ...<br>Maize, 17¾ seers ...<br>Jowar, 10 seers ...<br>Bajra, 10 seers ...<br>Prices generally between normal and warning rates or at scarcity rates. | Standing irrigated crops average and unirrigated much below average. Reaping of wheat, barley and gram commenced. Yield on irrigated area average and on unirrigated area below average. Sowings of extra spring crops continue and are below normal. | Sowings of sugarcane commenced and are below normal. |
| 6 | Ferozepore ... | ... | 1. Sufficient ...<br>2. (a) Do.<br>3. Good. | Wheat, 10½ seers...<br>Gram, 14 seers.<br>Prices between warning and scarcity rates. | Standing irrigated crops average and unirrigated bad. Sowings of extra spring crops continue and are normal. | ... |
| 7 | Lahore ... | ... | 1. Sufficient ...<br>2. (a) Do.<br>(b) Do.<br>3. Good. | Wheat, 11½ seers...<br>Gram, 14½ seers.<br>Maize, 14 seers.<br>Prices between normal and warning rates. | Standing irrigated crops below average and unirrigated poor. Crops being reaped. Yield below normal. Sowings of extra spring crops continue and are normal. | Sowings of sugarcane in progress and are normal. |
| 8 | Amritsar ... | ... | 1. Sufficient except in unirrigated tracts.<br>2. (b) Canals working by rotation.<br>3. Average. | Wheat, 12 seers ...<br>Gram, 14½ seers.<br>Barley, 13½ seers.<br>Jowar, 12 seers.<br>Maize, 18 seers.<br>Bajra, 11 seers.<br>Prices generally between warning and scarcity rates. | Standing irrigated crops average and unirrigated below average to bad. Rapeseed and gram being reaped. Yield of former below average and of latter about average. Sowings of extra spring crops continue and are below normal. | Sugarcane and cotton being sown. Area sown is below normal. |
| 9 | Siálkot ... | 0·12 at Sadr ...<br>0·30 at Pasrúr.<br>0·16 at Daska. | 1. Scarce ..<br>2. (a) Sufficient.<br>(b) Water sufficient in Aik stream.<br>3. Weak. | Wheat, white, 10¼ to 10½ seers.<br>Wheat, red, 11½ to 12 seers.<br>Barley, 13½ to 14 seers.<br>Gram, 12 to 13 seers.<br>Maize, 13¾ to 14 seers.<br>Prices between warning and scarcity rates. | Standing irrigated crops average and unirrigated poor. Barley, gram, &c., being reaped. Yield average on irrigated area and poor on unirrigated area. Sowings of extra spring crops continue on irrigated area and are normal. | Sowings of irrigated sugarcane and cotton in progress and are normal. More rain wanted. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 10 | Shahpur ... | ... | 1. Scarce ... 2. (a) Sufficient, except in Khusháb Tahsil, where it is seriously short. (b) Lower Jhelum Canal flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, 10 to 13½ seers. Barley, 14 to 18 seers. Gram, 13 to 14 seers. Jowar, 10 to 11 seers. Bajra, 11 to 13 seers. Maize, 11 to 16 seers. Prices between warning and scarcity rates. | Standing irrigated crops fair and unirrigated poor. Barley being reaped. Yield about average. Sowings of extra spring crops continue and are normal. | Sowings of sugarcane commenced and are normal. |
| 11 | Ráwalpindi ... | 0·49 at Kahúta ... 0·16 at Murree. | 1. Insufficient ... 3. Good. | Wheat, 10½ seers... Barley, 13¼ seers... Gram, 13½ seers ... Maize, 15 seers ... Bajra, 11 seers ... Prices generally at warning or scarcity rates. | Standing irrigated crops average and unirrigated below average. Sowings of extra spring crops continue and are timely and normal. | ... |
| 12 | Miánwáli ... | ... | 1. Scarce ... 2. (a) Scarce in Isa Khel Thal. (b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter. 3. Bad. | Wheat, 10¼ to 10¾ seers. Barley, 13 seers. Gram, 14 seers. Bajra, 9½ seers. Prices between warning and scarcity rates or above scarcity rates. | Standing irrigated crops average to good and unirrigated poor to average. Reaping of barley, gram and rapeseed continue. Yield average. Sowings of extra spring crops continue and are normal. | ... |
| 13 | Lyallpur ... | ... | 1. Dry sufficient; green scarce. 2. (b) Canals work by rotational closures; supply normal. 3. Generally good. | Wheat, 12½ seers... Gram, 14½ seers. Maize, 17¾ seers. Barley, 12 seers. Bajra, 12 seers. Prices between normal and warning rates or between warning or scarcity rates. | Standing irrigated crops average and unirrigated poor. Reaping of barley, gram, &c., commenced. Yield average. Sowings of extra spring crops continue and are below normal. | Sugarcane being sown. Area sown is below normal. Ploughings continue and are normal. |
| 14 | Multán ... | ... | 1. Bhusa, green wheat, &c., available. 2. (b) Canals dry. 3. Weak. | Wheat 11½ seers ... Gram, 13½ seers. Maize, 16 seers. Bajra, 13 seers. Prices generally at warning rates. | Standing irrigated crops average and unirrigated below average, and are withering. Reaping of irrigated gram and barley commenced. Extra spring crops being sown. Area sown is normal. | Sowings of sugarcane in progress and are normal. |

*GENERAL REMARKS.*

Except for slight showers in parts of a few submontane districts weather was dry. Condition of standing wheat and other crops on irrigated area generally average and on unirrigated area bad in the south-east and poor elsewhere. Reaping of spring crops continues. Yield generally below normal to normal on irrigated area and poor on unirrigated area. Sowings of extra spring crops and sugarcane and cotton continue, and are generally below normal to normal. Germination of extra spring crops is good. Cattle are generally healthy, but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Ambála. Prices are falling gradually. In case of wheat they generally range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat:—Ferozepore and Ráwalpindi 10½, Ambála 11, Lahore 11½ and Lyallpur 12½ seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 25th March 1916, there were 793 births registered in the 38 large municipal towns (387 males and 406 females), giving a birth rate of 35 *per mille* of population, and 682 deaths were registered (374 males and 308 females), giving a death rate of 30 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 31 against 27 in the corresponding week of the previous year ; Amritsar 41 against 49 and Multán 22 against 21.

There were 4 deaths reported from plague in Ambála and 2 in Kasúr. Of the 11 deaths from small-pox, 6 were registered in Ludhiána, 4 in Amritsar and 1 in Hoshiárpur.

Sanitary Commissioner's Office,
Lahore :
*The 4th April* 1916.

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn |
|---|---|---|---|---|---|---|
| 3 | Gurgaon ... | ... | 1. Scarce; being imported. 2. (b) Sufficient. 3. Poor. | Wheat, 9½ to 11 seers. Gram, 12½ to 14 seers Barley, 13 to 16 seers. Jowar, 11 to 14 seers. Bajra, 11 to 12½ seers. Maize, 11 to 13 seers. Prices between warning and scarcity rates. | Standing irrigated crops fair and unirrigated bad. Reaping continues. Yield on irrigated area average and on unirrigated area ¼th of an average. Extra spring crops good. Yield expected to be average. | |
| 4 | Ambála ... | 0·11 at Sadr ... 0·49 at Kasauli. | 1. Insufficient ... 2. (a) Sufficient except in Ambála Tahsil. (b) Inadequate. 3. Generally good. | Wheat, 10¾ seers... Gram 15¼ seers ... Barley, 13 seers ... Maize, 18 seers ... Bajra, 10 seers ... Prices generally between normal and warning rates. | Reaping of crops continues. Yield on irrigated area average and on unirrigated area below average. | Condition of sugarcane below average. |
| 5 | Jullundur ... | ... | 1. Insufficient to some extent. 3. Average, | Wheat, 12½ seers... Barley, 13 seers ... Gram, 14 seers ... Maize, 18 seers ... Jowar, 10 seers ... Bajra, 10 seers ... Prices generally between normal and warning rates or at scarcity rates. | Standing irrigated crops average and unirrigated much below average. Reaping of barley, wheat and gram continues. Yield average on irrigated area and below average on unirrigated area. Sowings of extra spring crops continue and are normal. | Sowings of sugarcane in progress, and are normal. |
| 6 | Ferozepore ... | ... | 1. Sufficient ... 2. (a) Do. 3. Good. | Wheat, 11 seers ... Gram, 14 seers. Prices between normal and warning rates. | Reaping of crops in progress. Standing irrigated crops average and unirrigated crops bad. Extra spring crops being sown on irrigated area. Area sown is normal. | ... |
| 7 | Lahore ... | 0·07 at Kasúr ... | 1. Sufficient ... 2. (a) Do. (b) Satisfactory. 3. Good. | Wheat, 11½ seers... Gram, 14½ seers. Maize, 14 seers. Prices between normal and warning rates. | Standing irrigated crops below average, and unirrigated poor. Crops being reaped. Yield below normal. Sowings of extra spring crops in progress and are normal. | Sowings of sugarcane and cotton continue, and are normal. |
| 8 | Amritsar ... | 0·10 at Sadr ... 0·17 at Ajnála. | 1. Sufficient, except in unirrigated tracts. 2. (b) Canals working by rotation. 3. Average. | Wheat, 11½ seers... Gram, 14 seers. Barley, 16 seers. Jowar, 12 seers. Maize, 18 seers. Bajra, 10½ seers. Prices generally between warning and scarcity rates. | Standing irrigated crops average and unirrigated below average to bad. Wheat and other crops being reaped. Yield of rapeseed below average, and of gram about average. | Sowings of sugarcane and cotton continue, and are below normal. |
| 9 | Siálkot ... | 0·05 at Sadr ... 0·10 at Zafarwál. 0·19 at Pasrúr. | 1. Scarce ... 2. (a) Sufficient. (b) Water sufficient in Aik stream. 3. Weak, owing to hard work. | Wheat, 10½ to 12 seers. Barley, 13½ seers. Gram, 12 to 13 seers. Maize, 13½ seers. Prices between warning and scarcity rates. | Standing irrigated crops average and unirrigated poor. Barley, gram, &c., being reaped. Yield average on irrigated area and poor on unirrigated area. Sowings of extra spring crops in progress on irrigated area, and are normal. | More rain wanted for sugarcane and cotton. Sowings on irrigated area continue, and are normal. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for—(a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring. | Autumn. |
| 10 | Shahpur ... | 0·16 at Sadr ... 0·28 at Khusháb. 0·11 at Shahpur. | 1. Scarce ... 2. (a) Sufficient, except in Khusháb Tahsil, where it is seriously short. (b) Lower Jhelum and 2 private canals flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, 10 to 13½ seers. Barley, 13 to 18 seers. Gram, 13 to 14½ seers. Maize, 11 to 15½ seers. Jowar, 10 to 11¼ seers. Bajra, 12 to 13¼ seers. Prices generally between warning and scarcity rates. | Standing irrigated crops fair and unirrigated poor. Barley being reaped. Yield below average. Sowings of extra spring crops continue and are normal. | Sowings of sugarcane in progress and are normal. |
| 11 | Ráwalpindi ... | 0·09 at Sadr ... 0·07 at Kahúta. 0·34 at Murree. | 1. Insufficient ... 3. Good. | Wheat, 10½ seers... Barley, 14½ seers... Gram, 13 seers, ... Maize, 16 seers ... Bajra, 10¾ seers ... Prices between normal and warning rates or between warning and scarcity rates. | Standing irrigated crops average and unirrigated below average. Threshing of barley and rapeseed commenced. Yield below average. Sowings of extra spring crops continue and are timely and normal. | Rainfall was beneficial for sowings. |
| 12 | Miánwáli ... | 0·11 at Sadr ... 0·50 at Isa Khel. | 1. Scarce ... 2. (b) Kurram and Nammal Canals flowing; supply sufficient in former and insufficient in latter. 3. Bad. | Wheat, 10 to 10½ seers. Barley, 12 seers. Gram, 14 seers. Bajra, 9 seers. Prices between warning and scarcity rates or above scarcity rates. | Standing irrigated crops average to good and unirrigated average to poor. Extra spring crops being sown. Area sown is normal. | |
| 13 | Lyallpur ... | 0·90 at Samundri... 0·25 at Toba Ṭek Singh. 0·60 at Jaránwála. | 1. Dry sufficient; green scarce. 2. (b) Canal works by rotational closures; supply normal. 3. Good. | Wheat, 12½ seers... Gram, 14 seers. Maize, 19 seers. Barley, 13 seers. Bajra, 12 seers. Prices between normal and warning rates or between warning and scarcity rates. | Standing irrigated crops average and unirrigated poor. Reaping of crops continues. Yield on irrigated area average. | Sowings of sugarcane, cotton and fodder in progress, and are normal. |
| 14 | Multán ... | 0·41 at Sadr ... | 1. Bhusa, green wheat, &c., available. 2. (b) Canals dry. 3. Weak. | Wheat, 11½ seers... Gram, 13½ seers. Maize, 16 seers. Bajra, 13 seers. Prices generally at warning rates. | Standing irrigated crops average and unirrigated below average, and are withering. Reaping of barley, gram and wheat continue to a small extent. Sowings of extra spring crops completed. Crops in average condition. | Sowings of fodder commenced to some extent. |

## *GENERAL REMARKS*:

Slight rain has fallen in parts of all the reporting districts, except in the south-east and parts of the central tract. Condition of standing wheat and other crops on irrigated area are generally average, and on unirrigated area bad in the south-east and poor elsewhere. Reaping of spring crops continues. Yield generally below normal to normal on irrigated area and poor on unirrigated area. Sowings of extra spring crops and sugarcane and cotton continue, and are generally normal. Germination of extra spring crops generally good. Cattle are generally healthy, but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Rohtak and Ambála. Prices are generally stationary. In case of wheat they range between normal and warning rates, and in other cases between warning and scarcity rates. Prices of wheat:—Ráwalpindi 10½, Ambála 10¾, Ferozepore 11, Lahore 11½, and Lyallpur 12½ seers, per rupee.

*Not reduced to sea-level.

(a) Mean of 24 days.

(b) Mean of 23 days.

(c) Mean of 16 days.

(d) = Aneroid.

Several disturbances appeared over north-west India in the course of the month, but only one of these, which occurred in the second week, gave rise to fairly widespread rain in the Punjab. Weather was accordingly unusually open, and in the tract represented by Multán and Khusháb there was little or no rain.

*Pressure and Winds.*—Barometric pressure was distinctly below normal everywhere. The direction of wind was very abnormal in the east and north Punjab.

*Temperature.*—Temperature was very unsteady. Thus in the plains of the Punjab and the North-West Frontier Province the mean temperature was appreciably above normal from the 1st to the 3rd, and again on the 19th, 20th, 24th and 25th, and in defect by 4° or upwards from the 6th to the 10th and on the 14th. Temperature for the whole month was nearly normal at almost all the observing stations.

The following table shows for each day of the month the departure from the normal of the mean temperature of the Punjab and the North-West Frontier Province, with the lowest minimum temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Lowest minimum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Lowest minimum temperature recorded during the previous 24 hours. | Station at which registered. |

| " 16th ... | −0·9 | 41·4 | Do. | | | | |

*Humidity and Cloud.*—Humidity was low at most of the plains stations in the Punjab, but the quantity of cloud was on the whole about normal. In the North-West Frontier Province the air was damper and the sky more cloudy than usual.

*Rainfall.*—In the Punjab the total rainfall of the month was short of the normal at all the meteorological stations with the exception of Murree, and in the region represented by Khusháb and Multán the month was rainless or almost so. The deficit was greatest at Ambála where it amounted to about 1½". In the North-West Frontier Province the fall was unevenly distributed, being in excess at Pesháwar, Parachinár and Drosh and in defect at Cherát and Dera Ismail Khan.

The following table gives the rainfall data for the Punjab and the North-West Frontier Province stations for February 1916. :

| Station. | Actual rainfall in February 1916. | Normal rainfall in February. | Departure from normal in February 1916. | Station. | Actual rainfall in February 1916. | Normal rainfall in February. | Departure from normal in February 1916. |

Prices generally at warning rates. | Standing irrigated crops average and unirrigated below average. Reaping of crops continues. Yield average. Irrigated extra spring crops in average condition. | Sowings of cotton, fodder, &c., continue and are normal. |

## *GENERAL REMARKS.*

WEATHER was generally dry. Condition of standing wheat and other crops on irrigated area generally average and on unirrigated area poor. Reaping of spring crops continues. Yield on irrigated area expected to be below normal to normal and on unirrigated area bad in the south-east, and poor elsewhere. Sowings of extra spring crops and sugarcane and cotton in progress and are generally normal. Germination of extra spring crops and sugarcane generally good. Cattle are generally healthy, but are weak in some districts owing to general scarcity of fodder. Water for drinking and canal irrigation generally sufficient, but shortage of canal water is reported from Rohtak and Ambála Prices are generally stationary. In case of wheat they range between normal and warning rates, and in other cases between warning and scarcity rates. Prices of wheat :—Ambála and Ráwalpindi 10¾, Ferozepore 11, Lahore 11¼, and Lyallpur 12¼ seers per rupee.

MAHBUB SHAH, SUPDT.,

that snowfall was below average in February 1916.

MAHBUB SHAH, SUPERINTENDENT,
*Office of Director of Land Records, Punjab.*

# Notes on the condition and prospects of Crops, etc., of the Punjab during the month of March 1916.

## 1.—HISSAR DISTRICT.

IRRIGATED and unirrigated rabi crops being reaped. Outturn irrigated ten annas and unirrigated less than two annas in a rupee on the whole. Extra rabi in fair condition. Area sown normal. Fodder scarce and being imported by rail. Cattle getting lean. Water-supply in perennial canals sufficient. Inundation canals dry. Grain stock sufficient for local requirements.

## 2.—ROHTAK DISTRICT.

No rain during the month. Sowings of sugarcane and extra rabi crops took place in parts of irrigated tracts. Condition of standing irrigated crops fair to good, and of unirrigated bad except in Tahsil Sonepat where it is below average. Yield of irrigated wheat, barley, gram and sarshaf is expected to be about average, and of unirrigated very poor. Cattle generally in fair condition. Fodder is being largely imported. Health of people generally good. Supply of canal water was generally inadequate. Prices fallen owing to large imports.

## 3.—GURGAON DISTRICT.

No rain. Chari and extra spring crops were sown to some extent on irrigated area in Nuh, Fírozpur and Gurgaon Tahsils. Condition of standing irrigated crops fair and of unirrigated crops bad. Crops were damaged by strong winds. Extra rabi crops in good condition. Outturn expected to be average. Wheat, barley, gram and sarshaf are being reaped. Cattle in poor condition. Green grass scarce. Fodder is being imported extensively from other provinces. Canal was running. Supply of water sufficient.

## 4.—KARNAL DISTRICT.

There was no rain except very slight showers in Kaithal and Guhla which were not beneficial to crops. Ploughings for extra rabi in progress in the irrigated area. Sugarcane sowings have started on nahri lands. The rabi crop is being harvested. The condition of crops is below average on the irrigated area and bad on the unirrigated area owing to insufficiency of canal water and drought. The expected yield on irrigated is ¾ths of the average and on unirrigated nearly ¼th for all rabi crops except sarson which was badly affected by the severe cold in January and February. Cattle have become weak for want of sufficient nourishment and are being consequently emancipated. Supply of canal water is deficient. No inundation. Prices are falling.

## 5.—AMBALA DISTRICT.

Rainfall slight. The sowings of sugarcane on irrigated lands in progress and of extra rabi crops finished. Condition of the standing extra rabi crops is average. Sugarcane germinating well. Yield of rabi crops is expected to be below average. Cattle are generally in good condition. Fodder supply moderate. Water supply-sufficient for the present. Public health generally good. Western Jumna Canal flowed continually. No river inundations or torrent floods. Prices are falling.

## 6.—SIMLA DISTRICT.

Rain in both tahsils insufficient. More rain is needed. Paddy, &c., were sown to a small extent in Kot Khai Tahsil. Condition of crops in both tahsils is poor. Condition of cattle good. Fodder and grazing sufficient. Public health good. Water in hill-streams sufficient.

## 7.—KANGRA DISTRICT.

Rainfall much below the average and consequently not much beneficial to the standing crops. Sugarcane and cotton sown to a small extent in Kangra proper. Condition of the standing crops on irrigated area is only average, but that on unirrigated area is bad. Cattle are generally in good condition. Public health is generally good. Water in kuhls was not quite sufficient for irrigation purposes on account of absence of rains.

8.—Hoshiarpur District.

There has been little or no rain during the month. Extra spring crops, sugarcane and cotton were sown to some extent. The general condition of the crops is below average. The expected yield is twelve annas in a rupee on chahi and six annas on barani lands. Cattle healthy. Scarcity of fodder is being somewhat felt. Public health satisfactory. Shah Nahr Canal was closed for the whole month. Prices falling.

9.—Jullundur District.

The rainfall was much below average in the whole district. Sowings of extra rabi crops in progress and are below normal. Condition and expected yield of irrigated crops is about average and that of unirrigated much below average. Cattle in average condition. Fodder somewhat insufficient. Public health is good.

10.—Ludhiana District.

Rainfall too slight to benefit the standing crops. Sowings of extra spring crops and sugarcane in progress. Condition of crops on irrigated area average and on unirrigated lands poor due to insufficient rainfall. Rapeseed crop has been harvested. Yield, irrigated average, and unirrigated below average. Condition of cattle is satisfactory. Fodder imported from other districts at concession rates. Public health generally good. Irrigation from canals satisfactory. No flood reported. Prices have fallen slightly.

11.—Ferozepore District.

Slight rain fell on the 18th March and did some good to the standing irrigated crops. Condition of crops on irrigated and on unirrigated Bet land, especially on those along the river bed, is good, but the crops on stiff unirrigated soil are suffering much. Expected yield of wheat and barley will be normal on irrigated, twelve annas in a rupee on Bet barani and eight annas on unirrigated land. Condition of cattle is good. Green fodder and straw was available. Public health is generally good. The working of Sirhind Canal was average. Prices remained stationary.

12.—Lahore District.

Some rain fell at the end of the month and was of little use. Sowings of extra rabi crops and sugarcane continued. The extent of sowings was normal. Condition of standing irrigated crops fair and of unirrigated crops poor. Harvesting of barley, rapeseed and masar commenced. Expected yield is below normal. Condition of cattle good. Fodder is sufficient. Public health good. Canals are working satisfactorily. There were no floods in rivers.

13.—Amritsar District.

Sugarcane, cotton and tobacco were sown. Condition and expected yield of standing irrigated crops average, sailab below average and barani bad. Condition of cattle below average. Public health is generally good. Canals working by rotation. No flood.

14.—Gurdaspur District.

Rainfall very inadequate. It is much wanted for kharif sowings especially sugarcane sowings. Sowings of cotton, sugarcane, tobacco and melons commenced. Condition of crops on irrigated, low lying and sailab lands is average to good and elsewhere mostly poor. Barley and masar are being harvested in some parts. Expected yield of irrigated crops above average and of unirrigated average to poor. Cattle in poor condition. Fodder very scarce in most parts. Public health generally good. Rivers and canals are flowing. No flood in either the Ravi or Beas. Prices slightly easier.

15.—Sialkot District.

Sowing of extra spring crops and cotton, sugarcane and fodder crops continued on irrigated areas. Condition and expected yield of standing crops average in irrigated but poor in unirrigated areas. Cattle emaciated owing to hard work and scarcity of fodder. Public health generally good. Raya Branch closed. Jhallari irrigation from Aik continued. Water-supply in Aik is sufficient.

16.—Gujranwala District.

Practically no rain during the month. Sowings moderate. The condition of standing rabi crops is nearly average on irrigated and sailab and on unirrigated bad. Rough estimate of irrigated produce is twelve annas and that of unirrigated two annas in a rupee. The health of cattle is generally good. Public health generally good. The insufficiency of canal water is complained of on account of rotational stoppage.

### 17.—Gujrat District.

Fairly good showers received during the month. Sowings of sugarcane, cotton and extra rabi crops in progress. Condition of crops on irrigated lands fair to good and that of the barani crops fair to bad. Expected yield of irrigated crops generally rather below average and that of barani crops half the average. Cattle in good condition. Fodder barely sufficient. Public health good. Canal flowing.

### 18.—Shahpur District.

There was very little rain which did little good to the standing crops. Sowings of extra rabi crops commenced to a normal extent. Condition of standing crops is normal on irrigated area and poor elsewhere. The yield of wheat is expected to be 7 to 10 maunds per acre on irrigated area and 2 to 3 maunds on unirrigated area. Condition of cattle good except in Khushab Tahsil where scarcity of fodder and water is serious. The state of public health was good. The Lower Jhelum Canal continued to flow with sufficient supply of water.

### 19.—Jhelum District.

Rainfall of 18th did a little good to the standing rabi crops. Some sowings of extra spring crops, fodder and cotton were made in Jhelum Tahsil where there was rain on the 18th March. None elsewhere. As general average yield is expected to be twelve annas on irrigated and sailab lands and eight annas on unirrigated. Cattle thin owing to scarcity of fodder. This however is being met by importation of bhusa. Public health good. Hail fell at Jalálpur and its neighbourhood on 19th and did some harm.

### 20.—Rawalpindi District.

Rainfall above average in Kahuta and Murree Tahsils, normal in Rawalpindi and Gujar Khan. The falls were timely and beneficial to the standing crops and to the sowings of extra rabi crops. The condition of standing rabi crops is below average. The condition of cattle is good. Dry fodder insufficient but green fodder is available. Public health good.

### 21.—Attock District.

Except in Tallagang Tahsil the rainfall during the month was below average, but it did much good to the standing crops and caused moisture for kharif sowings. More rains are needed throughout the district. Preparations for kharif sowings have commenced and some area in Fatehjang Tahsil has been sown with moth and jowar. Condition of standing crops average on irrigated and below average on unirrigated areas. Outturn expected normal on irrigated lands and below normal or half the normal on unirrigated lands. Cattle weak. Bhusa is available generally, but green grass is scarce. Public health generally good. No canals. Water sufficient. Prices have fallen slightly.

### 22.—Mianwali District.

Restricted sowings of extra rabi crops continued in Mianwali and Bhakkar Tahsils. Condition and expected yield of rabi crops on irrigated lands average to good and on unirrigated average to poor. Cattle in bad condition owing to scarcity of fodder. Public health is good. The supply in Kurram is sufficient and in Nammal Canal insufficient.

### 23.—Montgomery District.

Extra rabi sowings have been in progress during the month. The condition of the standing crops is generally average, but nahri and barani crops in the Dipálpur Tahsil are below average. An average yield is expected except in Dipálpur. Cattle are weak owing to the scarcity of fodder. General health is on the whole satisfactory. The river Ravi is nearly dry. Supply from Sutlej ordinary. Lower Bari Doab Canal has been running with short supply. There has been a slight fall in the prices of common staple foods.

### 24.—Lyallpur District.

Rainfall is only nominal. Sowings of extra rabi crops finished and of cotton and sugarcane commenced. Standing crops are normal on irrigated and below normal on unirrigated lands. Condition of cattle is generally good. Green fodder nearly sufficient except is Sayadwála tract. Public health generally good. Canals are working well. Stock sufficient.

### 25.—Jhang District.

Rainfall below average. Extra spring crops, cotton and sugarcane being sown. Crops on irrigated lands are in average condition and on unirrigated lands in below average condition. Cattle generally healthy. Health of people generally good. Water is insufficient in the rivers. No inundations. Prices have fallen slightly.

26.—Multan District.

Rainfall, though nominal, has proved useful to some extent to the standing rabi crops and to the sowings of extra rabi crops. The condition of crops on well irrigated areas was average and on unirrigated below average. The condition of cattle was fair though they were weak owing to scarcity of fodder. Fodder insufficient. Bhusa and green grass, etc., available as fodder. Health of people good. Canals dry. Prices of food-grains are falling. Stock of food-grains decreasing.

27.—Muzaffargarh District.

Rainfall was only in name. Sugarcane, vegetables and extra rabi crops being sown. The condition of crops on irrigated area was average and that of unirrigated crops was below average. Some insects have injured the roots of the wheat plant. Health of cattle good except in Sinánwan where it is reported to be bad. Fodder available except in Sinánwan where it is scarce. Public health generally good. No inundations. Canals dry. Prices of food-grains falling.

28.—Dera Ghazi Khan District.

There has been practically no rainfall. Crops fairly good on the whole. The yield is estimated to be below normal generally. The cattle are in very poor condition. They are overworked and underfed. Fodder is not abundant and grazing is not available at all. The health of the people is good on the whole. Only one of the canals was opened on 27th March, but the supply of water in it is very meagre. No floods or hill torrents. Prices have a tendency to fall.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 8th April 1916, there were 800 births registered in the 38 large municipal towns (402 males and 398 females), giving a birth rate of 35 *per mille* of population, and 786 deaths were registered (410 males and 376 females), giving a death rate of 34 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 30 against 37 in the corresponding week of the previous year ; Amritsar 49 against 54, and Multán 30 against 35.

There were 4 deaths reported from plague in Kasur and 1 each in Ambála and Jagadhri. Of the 18 deaths from small-pox, 12 were registered in Ludhiána, and 2 each in Amritsar, Jhelum and Pind Dádan Khan.

Yield average. Sowing of extra spring crops in progress and are normal. Standing spring and extra spring crops average on irrigated area and below average on unirrigated area. | Sowings of cotton and fodder continue and are normal. |

## GENERAL REMARKS

Light rain has fallen in parts of all the reporting districts, and has been useful for sowings of cotton and sugarcane. Condition of standing crops on irrigated area average and unirrigated area generally poor. Harvesting of spring crops continues. Yield on irrigated area below normal to normal and on unirrigated area bad in the south-east, and poor elsewhere. Sowings of extra spring crops nearly completed and of sugarcane and cotton in progress and are generally normal. Crops sown on irrigated area are generally doing well. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from Rohtak and Ambála. Prices are generally stationary and in case of wheat range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Ambála 10¾, Ráwalpindi 11, Ferozepore and Lahore 11½, and Lyallpur 12 seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 15th April 1916, there were 680 births registered in the 38 large municipal towns (328 males and 352 females), giving a birth rate of 30 *per mille* of population, and 796 deaths were registered (422 males and 374 females), giving a death rate of 35 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 29 against 33 in the corresponding week of the previous year; Amritsar 49 against 49, and Multán 30 against 37.

There were 3 deaths reported from plague in Kasur. Of the 29 deaths from small-pox, 21 were registered in Ludhiana, 5 in Amritsar, 2 in Batála, and 1 in Jhelum.

There were 2 deaths recorded from cholera in Lahore.

Sanitary Commissioner's Office,
Lahore:

Sowings of extra spring crops continue and are normal. | Sowings of cotton and fodder in progress and are normal. |
| 14 | Multán ... | 0·02 at Lodhrán ... 0·15 at Kabirwála. | 1. Bhusa, &c., available. 2. (b) Canals dry. 3. Weak. | Wheat, 12½ seers... Gram, 13½ seers. Maize, 15½ seers. Bajra, 13¼ seers. Prices generally at warning rates. | Harvesting of wheat continues; yield average. Condition of irrigated extra spring crops average. | Sowings continue on irrigated area and are normal. Standing crops average on irrigated area. |

## *GENERAL REMARKS*

Except for light showers in parts of a few submontane and western districts, weather was generally dry. Harvesting of wheat and other spring crops in progress. Yield on irrigated area below normal to normal and on unirrigated area bad in the south-east and poor elsewhere. Sowings of extra spring crops nearly completed and of sugarcane, cotton and fodder continue and are generally normal. Condition of crops sown on irrigated area generally fair. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from Ambála and Rohtak, and in Siálkot the Aik supply is deficient. Prices are generally stationary, and in case of wheat range between normal and warning rates, and in other cases between warning and scarcity rates. Prices of wheat:—Ferozepore Lahore and Ráwalpindi 11½; Ambála 11¾, and Lyallpur 13 seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 22nd April 1916, there were 724 births registered in the 38 large municipal towns (389 males and 335 females), giving a birth rate of 32 *per mille* of population, and 767 deaths were registered (412 males and 355 females), giving a death rate of 33 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 29 against 42 in the corresponding week of the previous year ; Amritsar 43 against 65, and Multán 24 against 43.

There were 4 deaths reported from plague in Kasúr and 3 in Pánipat. Of the 12 deaths from small-pox, 5 were registered in Ludhiána, 4 in Amritsar, 2 in Batála, and 1 in Lahore. There was 1 death recorded from cholera in Amritsar.

| 3 | Gurgaon ... | ... | 1. Green grass scarce; fodder being imported. 2. (b) Canal flowing; in Palwal and Ballabgarh tahsils; supply insufficient in the latter tahsil. 3. Very poor. | Wheat, 9¾ to 11½ seers. Barley, 12½ to 15 seers. Gram, 12 to 13 seers. Jowar, 12 to 13 seers. Bajra, 11 to 12 seers. Maize, 11 to 12 seers. Prices between warning and scarcity rates. | Condition of extra spring crops fairly good. Yield expected to be average. | ... |
| 4 | Ambála ... | ... | 1. Scarce, except in Rúpar Tahsil. 2. (a) Do. ... (b) Inadequate. 3. Generally good. | Wheat, 12 seers ... Gram, 14¼ seers. Barley, 15 seers. Maize, 20 seers. Bajra, 10 seers. Prices generally between normal and warning rates. | Threshing of spring crops nearly completed. Yield, specially of wheat, below average. Extra spring crops average on irrigated area and below average on unirrigated area. | Rain wanted. Condition of sugarcane average on irrigated area and below average on unirrigated area. Ploughings in progress and are normal. |
| 5 | Jullundur ... | ... | 1. Sufficient ... 2. (a) Do. 3. Good. | Wheat, 13 seers ... Barley, 14 seers Gram, 13¾ seers ... Maize, 18½ seers ... Jowar, 10 seers ... Bajra, 8½ seers ... Prices generally between normal and warning rates, or at scarcity rates. | Threshing of wheat and mixed wheat and gram continue. Yield on irrigated area average, and on unirrigated area below average. Sowings of extra spring crops continue and are normal. Germination good. | Sowings of cotton in progress and are normal. Germination good. |
| 6 | Ferozepore ... | ... | 1. Sufficient ... 2. (a) Do. 3. Good. | Wheat, 11½ seers... Gram, 13 seers. Prices between warning and scarcity rates. | Threshing of crops nearly completed. Yield on irrigated area normal and on unirrigated area below normal. Irrigated extra spring crops good. | ... |
| 7 | Lahore ... | ... | 1. Sufficient ... 2. (a) Do. (b) Satisfactory. 3. Good. | Wheat, 11½ seers... Gram, 14½ seers. Maize, 14 seers. Prices generally between warning and scarcity rates. | Harvesting of crops continues. Yield below average on irrigated area and poor on unirrigated area. Irrigated extra spring crops average. | Sowings of irrigated cotton and fodder in progress and are below normal. Condition of irrigated sugarcane average. |
| 8 | Amritsar ... | ... | 1. Sufficient ... 2. (b) Canals working by rotations: supply sufficient. 3. Good. | Wheat, 13 seers ... Gram, 13 seers. Barley, 15½ seers. Jowar, 11½ seers. Maize, 17 seers. Bajra, 10½ seers. Prices generally between warning and scarcity rates. | Wheat being threshed. Outturn on irrigated area below average and on unirrigated area poor. Condition of irrigated extra spring crops good, and of unirrigated bad. | Sowings of cotton continue, and are normal. |
| 9 | Siálkot ... | 0·32 at Sadr. | 1. Insufficient ... 2. (a) Sufficient. (b) Water in Aik stream insufficient. 3. Weak. | Wheat, 11 to 12 seers. Barley, 13 to 15 seers. Gram, 10½ to 11¾ seers. Prices generally between warning and scarcity rates. | Threshing of wheat continues. Yield on irrigated area average and on unirrigated area poor. Standing irrigated crops average and unirrigated poor. | Sowings of irrigated cotton continue. Germination average. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 10 | Shahpur ... | ... | 1. Sufficient on irrigated area only. 2. (a) Sufficient, except in Khusháb Tahsil, where it is seriously short. (b) Inundation canals flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, 11¼ to 13¾ seers. Barley, 15 to 16¼ seers. Gram, 12 to 12¼ seers. Jowar, 10 seers. Bajra, 10 to 13 seers. Maize, 12½ to 16 seers. Prices generally between warning and scarcity rates. | Wheat being threshed, yield average. Sowings of extra spring crops continue and are normal. Condition of standing irrigated crops fair and of unirrigated poor. | Sowings of cotton in progress and are normal. |
| 11 | Ráwalpindi ... | 0·04 at Kahúta ... | 1. Sufficient ... 3. Good. | Wheat, 11½ seers... Barley, 13 seers. Gram, 11¾ seers. Bajra, 10½ seers. Maize, 14¼ seers. Prices generally between warning and scarcity rates. | Threshing of wheat and barley continues. Yield below average. Condition of irrigated extra spring crops average and of unirrigated below average. | ... |
| 12 | Miánwáli ... | 0·23 at Sadr ... 0·02 at Isa Khel. | 1. Scarce ... 2. (b) Kurram canal flowing, supply sufficient. 3. Bad. | Wheat, 10 to 10½ seers. Barley, 12 seers. Bajra, 9 seers. Jowar, 8 seers. Gram, 12 seers. Prices between warning and scarcity rates or above scarcity rates. | Condition of irrigated extra spring crops average to good and of unirrigated average. | ... |
| 13 | Lyallpur ... | 0·28 at Sadr ... 0·11 at Samundri. 0·32 at Toba Tek Singh. 0·04 at Jaránwála. | 1. Dry fodder sufficient; green scarce. 2. (b) Canals work by rotational closures; supply normal. 3. Good. | Wheat, 12¾ seers... Gram, 14 seers. Maize, 18¾ seers. Barley, 12 seers. Bajra, 12 seers. Prices between normal and warning rates or between warning and scarcity rates. | Reaping of wheat completed. Yield below average. | Sowings of cotton and fodder continue and are normal. Standing crops average. |
| 14 | Multán ... | ... | 1. Bhusa, &c., available. 2. (b) Canals dry. 3. Fair. | Wheat, 13½ seers... Gram, 13¾ seers. Maize, 15½ seers. Bajra, 13½ seers. Prices generally between normal and warning rates. | Harvesting of wheat continues. Outturn of wheat, barley and gram average. Condition of irrigated extra spring crops average. | Sowings of irrigated cotton and jowar continue and are normal; condition of standing crops average on irrigated area. |

## GENERAL REMARKS.

Light showers fell in parts of a few submontane and western districts: elsewhere weather was dry. Threshing of wheat and other spring crops continues, except in the south-east, where it has been completed. Yield on irrigated area below normal to normal and on unirrigated area poor. Sowings of extra spring crops completed and of cotton and fodder in progress and are generally normal. Condition of standing extra spring and autumn crops is generally fair on irrigated area and below average on unirrigated area. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from Ambála, Rohtak and parts of Gurgaon, and in Siálkot the Aik supply is deficient. Prices are generally stationary, and in case of wheat range between normal and warning rates, and in other cases between warning and scarcity rates. Prices of wheat:—Ferozepore, Lahore and Ráwalpindi 11½; Ambála 12, and Lyallpur 12¾ seers per rupee.

D. J. BOYD,

*Director of Land Records, Punjab.*

Rainfall was scanty except at Ráwalpindi and Murree, and in general the air was abnormally dry and warm with skies clearer than usual.

As compared with the corresponding month of the previous year there was a decrease of 1,303 births or 0·76 per 1,000 of population which affected all the divisions ex-
shared by Ambála, Jullundur and Multán Divisions only.

As compared with the corresponding month of the previous year there was a decrease of 46,147 deaths or 29·47 *per mille* which was general throughout the province

As compared with the previous month there was a decrease of 3·78 *per mille* which was shared by every division in the province and was due entirely to fewer deaths

There was one death reported from cholera (in Lahore) during the month under report as against 6 in the corresponding month of the previous year.

[illegible] (of 20,000 or upwards) *in the Punjab for the month of March* 1916.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 29th April 1916, there were 730 births registered in the 38 large municipal towns (362 males and 368 females), giving a birth rate of 32 *per mille* of population, and 828 deaths were registered (442 males and 386 females), giving a death rate of 36 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 35 against 45 in the corresponding week of the previous year; Amritsar 52 against 53, and Multán 36 against 49.

There were 4 deaths reported from plague in Kasúr and 1 in Ráwalpindi. Of the 11 deaths from small-pox, 5 were registered in Ludhiána, 2 in Amritsar, and 1 each in Sirsa, Lahore, Batála and Lyallpur. There was 1 death recorded from cholera in Khusháb.

| 13 | Lyallpur ... | 0·03 at Sadr ...<br>0·06 at Toba Tek Singh.<br>0·06 at Jaránwála.<br>0·04 at Samundri. | 1. Dry fodder sufficient; green scarce.<br>2. (b) Canals work by rotational closures; supply normal.<br>3. Good. | Wheat, 12¾ seers...<br>Gram, 13 seers.<br>Maize, 18 seers.<br>Barley, 15 seers.<br>Bajra, 11 seers.<br>Prices between normal and warning rates or between warning and scarcity rates. | Harvesing of wheat completed. Yield below average. | Sowings of fodder continue and are normal. |
| 14 | Multán ... | 0·55 at Sadr ...<br>0·44 at Mailsi.<br>0·26 at Lodhrán.<br>0·25 at Shujábád.<br>0·69 at Kabirwála. | 1. Bhusa, &c., available.<br>2. (b) Canals dry.<br>3. Generally fair. | Wheat, 12¼ seers...<br>Gram, 12¾ seers.<br>Maize, 15½ seers.<br>Bajra, 12½ seers.<br>Prices generally at warning rates. | Harvesting of wheat nearly completed. Outturn of wheat, barley and gram average. Irrigated extra spring crops average. | Sowings of irrigated cotton and jowar continue and are normal; condition of irrigated standing crops average. |

## *GENERAL REMARKS.*

Light rain was general except in a few central districts, and in parts of the submontane and western tracts the fall was fairly good. It was beneficial for extra spring crops, sugarcane and cotton. It will also facilitate ploughing for the autumn harvest. Threshing of wheat continues in some districts. Yield on irrigated area below normal to normal and on unirrigated area poor. Sowings of sugarcane, cotton and fodder continue, and are generally normal. Condition of standing extra spring and autumn crops is generally fair on irrigated area and below average on unirrigated area. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but a shortage of canal water is reported from the south-east. Prices are generally stationary, but have risen slightly in some districts. In case of wheat they range generally between normal and warning rates, and in other cases between warning and scarcity rates. Prices of wheat:—Ferozepore and Ráwalpindi 11, Lahore 11¼, Ambála 12 and Lyallpur 12¾ seers per rupee.

D. J. BOYD,

*Director of Land Records, Punjab.*

# SUMMARY OF METEOROLOGICAL CONDITIONS PREVAILING OVER THE PUNJAB AND THE NORTH-WEST FRONTIER PROVINCE DURING MARCH 1916.

| Station. | Pressure. | | Wind. | | Temperature in shade. | | | | | | Humidity at 8 hrs. | Vapour tension at 8 hrs. | Amount of cloud, 10 = overcast. |

*Not reduced to sea-level.

(a) Aneroid.

(b) = Mean of 7 days.

Widespread rain fell over the Punjab and the North-West Frontier Province between the 17th and the 19th in connection with a disturbance of the cold weather type; but during the rest of the month, apart from a few isolated falls, the weather was dry.

*Pressure and Winds.*—There was a marked defect of barometric pressure in the plains and an excess at the level of the hill stations. Winds varied considerably from the normal direction at most of the recording stations in the Punjab.

*Temperature.*—Temperature was higher than usual during nearly the whole month, and rose to 101° at Hissar on three days.

For the month as a whole temperature, by both day and night, was considerably above normal at all the recording stations with the exception of Siálkot and Drosh.

The following table shows for each day of the month the departure from the normal of the mean temperature of the Punjab and the North-West Frontier Province, with the highest maximum temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. |

*Humidity and Cloud.*—The air was very dry, and there was on the whole less than the customary amount of cloud.

*Rainfall.*—In the Punjab Ráwalpindi and Murree were the only recording stations which received more than the normal quantity of rain ; the defect amounted to 1¾″ at Simla where it was greatest, and was also large at Ambála, Ludhiána and Siálkot. In the North-West Frontier Province the fall was deficient everywhere, the shortage being most pronounced at Parachinár where it was as much as 3½″.

The following table gives the rainfall data for the Punjab and the North-West Frontier Province stations for March 1916. :—

| Station. | Actual rainfall in March 1916. | Normal rainfall in March. | Departure from normal in March 1916. | Station. | Actual rainfall in March 1916. | Normal rainfall in March. | Departure from normal in March 1916. |

MAHBUB SHAH, SUPERINTENDENT,
*Office of Director of Land Records, Punjab.*

# Notes on the condition and prospects of Crops, &c., of the Punjab, during the month of April 1916.

## 1.—Hissar District.

Irrigated and unirrigated crops harvested. Outturn irrigated ten annas and unirrigated less than two annas in a rupee on the whole. Extra rabi crops in fair condition. Area sown normal. Sowings of cotton commenced. Cattle getting lean. Fodder scarce and being imported by rail. Water-supply in perennial canals sufficient. Inundation canals dry. Grain stock sufficient for local requirements.

## 2.—Rohtak District.

Rainfall below average. No unirrigated sowings took place. Sowings of sugarcane, indigo, cotton and chari in parts of irrigated lands took place ; area sown is below normal. Condition of standing irrigated kharif and extra rabi crops is fair to good. Yield of extra rabi crops generally good. Cattle generally in fair condition. Fodder is being imported. New fodder available. State of public health generally good. Supply of water from Darbandi Canal generally inadequate. Prices of food-grains are stationary.

## 3.—Gurgaon District.

Rainfall too late to be beneficial to standing crops. Cotton, sugarcane and chari were sown on irrigated areas, and germinated well. Condition of the standing extra rabi crops is fairly good, and yield is expected to be average. Estimated outturn of the important rabi crops on leading classes of soil in maunds per acre is as follows :—

| | *Chahi.* | *Nahri.* | *Abi.* | *Alabarani* | *Dahri.* |
|---|---|---|---|---|---|
| Wheat ... | 4½ to 13 | 8 to 12 | 4 to 12 | 1½ to 3 | 1½ to 2 |
| Barley ... | 6 to 16 | 8 to 15 | 2 to 15 | 1 to 4 | 1½ |
| Gram ... | 2 to 11 | 4 to 10 | 2 to 6 | 1½ to 3½ | 1½ |
| Sarshaf ... | 3½ to 7 | 4 to 7 | 1½ to 7 | 1 to 2½ | 1½ |

Cattle in very poor condition, green grass not procurable. Fodder is being imported extensively from other provinces. Public health generally good. Canal was running ; supply of water sufficient.

## 4.—Karnal District.

Rainfall slight. Sowings of sugarcane, chari, and vegetables are in progress. Ploughings for cotton have commenced. Condition of crops is below average on irrigated and poor on the unirrigated area. The yield on irrigated land is 14 annas and on unirrigated 6 annas Fodder and water insufficient. Public health is generally good. Supply of canal water is deficient. No inundation. Prices are falling.

## 5.—Ambala District.

Rainfall slight but benefited the standing extra rabi and sugarcane crops. Sowings of sugarcane finished. The condition of the standing extra rabi and sugarcane crops on the irrigated lands is average and that on unirrigated below average. Yield of rabi crops below average. Cattle are generally in good condition. Fodder supply moderate. Water-supply insufficient. Public health good. Western Jumna Canal flowed continually though water was inadequate. No river inundations or torrent floods. Prices have fallen to some extent.

## 6.—Simla District.

The rainfall during the month was insufficient. The condition of crops is poor. Condition of cattle good ; fodder and grazing sufficient. Public health good. Water in hill streams insufficient.

## 7.—Kangra District.

The rainfall during the month was below the average, except at Pálampur, Dharmsála and Kángra. Some sowings of rice, cotton and sugarcane took place. The condition of standing crops on irrigated area is only average, while that on unirrigated area is bad. The yield of the rabi crop is expected to be below average. Cattle are generally in good condition. Public health is generally good. Water in kuhls was not quite sufficient.

## 8.—Hoshiarpur District.

There was little or no rain during the month. Extra rabi crops, sugarcane and cotton were sown. Rabi crops cut, and are being threshed. The outturn of irrigated and unirrigated areas are twelve and six annas, respectively. Condition of extra rabi crop is average on irrigated area and bad on unirrigated. Condition of cattle good. Dry fodder is sufficient. Public health good. Irrigation from Shah Nahr was resorted to during the month. Prices of food-grains falling.

### 9.—Jullundur District.

The rainfall much below average except in Nawashahr Tahsil where it is a little above average. Sowings of sugarcane, cotton and extra rabi crops were in progress and were normal. Sowings of sugarcane practically finished. Condition of irrigated crops is about average and that of unirrigated ones below average except in Sirwal where it is average. The yield of irrigated rabi crops is average and that of unirrigated was poor. Cattle in good condition. Fodder sufficient. Public health good.

### 10.—Ludhiana District.

Rainfall in tahsils Ludhiána and Jagráon was too slight to be beneficial for the standing crops. Sowings of chari, rice, and other extra rabi crops in progress. Condition of crops on irrigated area good and of that on unirrigated area normal. Harvesting of rabi crops completed. Yield of irrigated crops nearly normal and that of unirrigated crops nearly half the normal. Condition of cattle is satisfactory. Bhusa available. Irrigation from canals satisfactory. No floods reported. Prices of food grains stationary.

### 11.—Ferozepore District.

Rainfall too slight to produce any effect on the standing crops. Sowings of extra rabi crops completed and were normal in unirrigated land. Condition of early sown extra rabi crops is satisfactory. Harvesting of rabi crops completed. Outturn of wheat and barley will be sixteen annas on irrigated and from 10 to 12 annas on bet barani and from 4 to 8 annas on unirrigated land. The expected yield of gram on sandy unirrigated soil will be from 8 to 12 annas, on other unirrigated land from 4 to 8 annas and on irrigated land from 12 to 16 annas per rupee. The condition of cattle is satisfactory. Green fodder not available, straw sufficient. The public health is generally good. The working of Sirhind Canal was average. Prices remained stationary.

### 12.—Lahore District.

Statement not received. Will be published in next week's Gazette.

### 13.—Amritsar District.

Sugarcane, cotton, melons and chara were sown. Standing irrigated crops average and unirrigated bad. Yield is expected to be average on irrigated and bad on unirrigated areas. Condition of cattle average. Public health is generally good. Canals working by rotation.

### 14.—Gurdaspur District.

There were slight showers during the month. Sowings of cane, cotton, tobacco and melons continued. Cane and cotton have germinated and their condition is good at present. Wheat and gram crops were cut and some were threshed. The outturn of irrigated lowlying and sailab crops is good to average and of other unirrigated crops much below average. The grain is however full and of good quality. Cattle generally good. The supply of bhusa is relieving the fodder scarcity. Rivers and Government canals are flowing. No flood. Prices falling.

### 15.—Sialkot District.

Will be published in next week's Gazette.

### 16.—Gujranwala District.

Practically no rain during the month. Sowings normal. The condition of extra rabi crops is fair. Harvesting of rabi crops almost finished. Outturn of gram much below normal. The state of cattle good : fodder sufficient. Public health generally good. No complaint of canal water supply : opening of Raya Branch is badly wanted for kharif sowings.

### 17.—Gujrat District.

1. Practically no rainfall during the month. Sowing of cotton, sugarcane and extra rabi crops on irrigated lands and moist barani lands were in progress. Germination of cotton, sugarcane and extra rabi crops generally fair. Threshing of wheat in progress. The yield is estimated to be about average on irrigated and much below average on unirrigated lands. Cattle in good condition. Fodder sufficient for the present. Public health good. Canal flowing.

### 18.—Shahpur District.

There was very little rainfall and it did no good to the standing crops. Sowing of extra rabi crops and cotton continued to normal extent. The condition of standing crops is above normal on irrigated area and poor elsewhere, but most of them have been cut. Wheat

was harvested with a yield of 7 to 16 maunds per acre on irrigated area and 6 to 8 maunds elsewhere. The condition of cattle is fair except in Khushâb Tahsil where there is a continued scarcity of fodder and water. The state of public health was good. The Lower Jhelum Canal continued to flow with sufficient supply of water. The inundation canals also began to flow.

19. JHELUM DISTRICT.

Rainfall much below average in Pind Dádan Khan and Jhelum Tahsils, and consequently sowing of moth, jowar, melons, &c., was small. Extra rabi crops are generally poor save on irrigated and sailab lands. Rabi reaping completed and threshing in progress. Yield of crops is generally below average. Cattle in good health generally. Fodder still scarce in Thal illaqua. Public health good. Pind Dádan Khan Canal is dry. This is attributed to opening of Upper Jhelum anal.

20.—RAWALPINDI DISTRICT.

Light rainfall throughout the district, which benefited the extra rabi sowings. Yield of barley, rapeseed and wheat below average. Condition of cattle good : dry fodder available. Public health good.

21.—ATTOCK DISTRICT.

Rainfall above average in Attock and Talagang, but much below average in the remaining two tahsils. Sowings of melons were carried out throughout the district, and those of jowar, moth and cotton have commenced in Talagang only. Some damage was done in a number of villages by hailstones to tobacco and melon crops, wheat also suffered to some extent. Rabi crops are off the ground now. They were normal on irrigated and below normal on unirrigated lands. Extra rabi crops are fairly good. The expected estimate of yield is as follows :—

| | *Irrigated.* | *Unirrigated.* | |
|---|---|---|---|
| Wheat ... | 375 seers per acre ... | Talagang | 65 seers per acre. |
| | | Pindigheb | 130 „ „ „ |
| | | Fatehjang | 110 „ „ „ |
| | | Attock | 150 „ „ „ |
| Taramira ... | ... ... | | 90 to 105 „ „ „ |
| Gram ... | ... ... | | 6 to 8 mds. „ „ |

Cattle in fair condition. Fodder available. Public health good. No canals. Water is available though not sufficient enough. Prices have slightly fallen.

22.—MIANWALI DISTRICT.

Sowings of extra rabi crops continued to the normal extent except on barani lands of tahsil Bhakkar. Condition and expected outturn of rabi and extra rabi crops on irrigated lands average to good and on unirrigated poor to average. Cattle in bad condition owing to scarcity of fodder. Public health is good. The Kurram is watering lands sufficiently in Isa Khel Tahsil. Nammal Canal remained closed during the last few days of the month.

23.—MONTGOMERY DISTRICT.

xtra rabi sowings continued during the month. The standing crop is in good condition. Wheat crop has almost been reaped. Cattle healthy, fodder scarce. General health good. Very little water in rivers. Canals dry, except the Lower Bari Doab Canal.

24.—LYALLPUR DISTRICT.

Rainfall only nominal. Sowings of cotton, fodder and vegetables were in progress. Wheat, barley and gram crops were harvested. Extra rabi crops are generally in good condition. Condition of cattle is generally good. Fodder sufficient. Public health was generally good. Canals have been working well. Stock sufficient.

25.—JHANG DISTRICT.

Rainfall below average throughout the district. Cotton, tobacco, vegetables, etc., are being sown. Crops on irrigated lands are average, and on unirrigated lands below average. Gram and wheat were being harvested during the month. Cattle healthy. Bhusa and green fodder are becoming scarce. Public health good. Canals flowing. Water is increasing in the rivers, but there has been o inundation. Prices stationary.

26.—MULTAN DISTRICT.

The rainfall in four tahsils proved somewhat useful to standing extra rabi crops and in the preparation o land f r kharif crops. The condition of rabi and extra rabi crops on well irrigated areas average and that on unirrigated areas below average. Wheat, barley and

gram, etc., harvested on well irrigated lands with outturn average. On unirrigated land the outturn is below average. The condition of cattle was generally good. Fodder sufficient. Jandal and bhusa of barley and wheat available as fodder. Health of people good. Sidhnai and inundation canals dry. Prices of food-grains, specially wheat, falling.

27.—MUZAFFARGARH DISTRICT.

Very slight rainfall in the three northern tahsils. Cotton, indigo and extra spring crops sown. Condition of standing crops average. Outturn per acre of wheat on irrigated 8 maunds, and on unirrigated 5 maunds, per acre. Condition of cattle generally good. Fodder sufficient. Public health good. Indus Canals in Muzaffargarh and Alipur tahsils have begun flowing. There is a falling off in prices of food-grains.

28.—DERA GHAZI KHAN DISTRICT.

There were a few showers of rain which did little good to the crops, but may produce some grass fodder. Rabi harvest has been cut and grain is being threshed. Yield is expected to be average. The condition of cattle is on the whole good. Fodder is generally scarce. Public health good. Some of the canals have begun to flow with a small supply of water. A few of the hill torrents have also brought down some water. The supply is however inadequate. Prices are falling.

| 13 | Lyallpur ... | ... | 1. Dry fodder sufficient; green scarce 2. (b) Canals closed for annual repairs. 3. Good. | Wheat, 12½ seers... Gram, 13 seers. Maize, 17½ seers. Barley, 15 seers. Bajra, 11 seers. Prices generally between warning and scarcity rates. | Threshing of wheat in progress. Yield average. | Sowings of fodder continue and are below normal. Standing crops average. |
| 14 | Multán ... | ... | 1. Bhusa, &c., available. 2. (b) Canals dry. 3. Generally fair. | Wheat, 12 seers ... Gram, 12½ seers. Maize, 15½ seers. Prices generally between warning and scarcity rates. | Harvesting of wheat, barley and gram continue. Yield average. Irrigated extra spring crops average. | Sowings of irrigated jowar and cotton continue and are below normal. |

## *GENERAL REMARKS.*

WEATHER was generally dry. Rain is wanted for extra spring crops, sugarcane and cotton and the ploughings for the autumn crops. Threshing of wheat nearly completed. Yield on irrigated area below normal to normal and on unirrigated area poor. Sowings of sugarcane, cotton and fodder continue, and are generally normal. Condition of standing extra spring and autumn crops is generally fair on irrigated area and below average on unirrigated area. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from the south-east. Prices are generally stationary, but are rising slightly in some districts. In case of wheat they range generally between normal and warning rates, and in other cases between warning and scarcity rates. Prices of wheat :—Ráwalpindi 10½, Lahore 11, Ambála 11⅝, Ferozepore 12 and Lyallpur 12½ seers per rupee.

MAHBUB SHAH, SUPDT,

*Office of Director of Land Record, Punjab.*

# Notes on the condition and prospects of Crops, &c., in the Lahore and Sialkot Districts of the Punjab, during the month of April 1916, received too late for insertion in the "Supplement to Punjab Gazette" dated 19th May 1916.

### 12.—Lahore District.

No rain worth the name fell in this month. Cotton, sugarcane and extra rabi crops were sown to normal extent. Condition of standing crops good. Harvesting of barley, rapseed, masar, wheat and gram are in full swing, and the yield on irrigated area is expected to be normal and on unirrigated area poor. Condition of cattle good and fodder is sufficient. The state of the public health is good. Both perennial and inundation canals are working satisfactorily and there were no floods in the rivers.

### 15.—Sialkot District.

Sowing of vegetables, tobacco, cotton, sugarcane, melons and fodder crops continued in irrigated areas. Condition of standing crops average in irrigated but poor in unirrigated tracts. Yield of wheat is average in irrigated but poor in unirrigated areas. Cattle healthy. Public health generally good. Raya branch of the canal remained closed. Water in Aik insufficient. No Jhallari irrigation from Aik.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 13th May 1916, there were 792 births registered in the 38 large municipal towns (408 males and 384 females), giving a birth rate of 35 *per mille* of population, and 762 deaths were registered (372 males and 390 females), giving a death rate of 33 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 29 against 47 in the corresponding week of the previous year; Amritsar 34 against 58, and Multán 19 against 42.

There were 4 deaths reported from plague in Jhang-Maghiána, 2 in Ráwalpindi and 1 in Kasúr. Of the 7 deaths from small-pox, 4 were registered in Amritsar and 1 each in Batála, Ráwalpindi and Multán.

| 7 | Lahore ... | .. | 1. Sufficient ...<br>2. (a) Do.<br>(b) Perennial canals flowing; supply insufficient inundation canals dry.<br>3. Average. | Wheat, 10½ seers ...<br>Gram, 12½ seers.<br>Prices between warning and scarcity rates or above scarcity rates. | Irrigated extra spring crops average. | Sowings of cotton, fodder and moth continue and are normal. Condition of irrigated sugarcane average. |
| 8 | Amritsar ... | ... | 1. Sufficient ..<br>2. (b) Canals working by rotations; supply sufficient.<br>3. Good. | Wheat, 12 seers ...<br>Gram, 12¾ seers.<br>Barley, 14½ seers.<br>Jowar, 12¼ seers.<br>Maize, 17 seers.<br>Bajra, 10½ seers.<br>Prices generally between warning and scarcity rates. | Irrigated extra spring crops average and unirrigated bad. | Sowings of irrigated cotton continue and are normal. |
| 9 | Siálkot ... | ... | 1. Dry fodder sufficient.<br>2. (a) Sufficient.<br>(b) Water in Aik stream sufficient.<br>3. Fair. | Wheat, 11¼ to 12½ seers.<br>Barley, 12 to 12¾ seers.<br>Gram, 11 to 12 seers.<br>Prices generally between normal and warning or between warning or scarcity rates. | Threshing of wheat continues. Yield average. | |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 10 | Shahpur ... | ... | 1. Sufficient on irrigated area only. 2. Lower Jhelum and inundation canals flowing; supply sufficient. 3. Fair except in Khushâb Tahsil. | Wheat, 10¾ to 13 seers. Barley, 13¾ to 15 seers. Gram, 11½ to 12 seers. Jowar, 10 to 11¾ seers. Bajra, 10 to 11 seers. Maize, 13 to 16 seers. Prices between warning and scarcity rates or at above scarcity rates. | Threshing of wheat nearly completed. Yield average. | Sowings of jowar bajra, and maize, continue and are normal. Standing irrigated crops good and unirrigated fair. |
| 11 | Ráwalpindi ... | ... | 1. Sufficient ... 2. (b) Scarce in parts of Gujar Khan Tahsil. 3. Good. | Wheat, 10½ seers... Barley, 13 seers. Gram, 12½ seers. Bajra, 10 seers. Maize, 14 to 14½ seers. Prices generally between warning and scarcity rates. | Threshing of wheat finished. Yield below average. Condition of extra spring crops average. | ... |
| 12 | Miánwáli ... | ... | 1. Scarce ... 2. (b) Kurram Canal flowing; supply sufficient. 3. Fair, except in Bhakkar. | Wheat, 10 to 10½ seers. Barley, 12 seers. Gram, 12 seers. Bajra, 8 seers. Prices between warning and scarcity rates or at above scarcity rates. | Sowings of extra spring crops continue in Isa Khel Tahsil and are normal. Condition of irrigated extra spring crops average to good and of unirrigated average in Bhakkar and Miánwali tahsils. | ... |
| 13 | Lyallpur ... | 0·04 at Sadr ... | 1. Green grass scarce; dry fodder sufficient. 2. (b) Canals working by rotational closures; supply normal. 3. Good. | Wheat, 12½ seers... Gram, 12½ seers. Maize, 17½ seers. Barley, 15 seers. Bajra, 11 seers. Prices generally between warning and scarcity rates. | Threshing of wheat nearly finished. Yield average. | Sowings of fodder continue and are below normal. Standing crops average. |
| 14 | Multán ... | ... | 1. Bhusa, available. 2. (b) Canals generally dry. 3. Generally fair. | Wheat, 11½ seers... Gram, 11½ seers. Maize, 12½ seers. Bajra, 12½ seers ... Prices generally between warning and scarcity rates. | Harvesting of wheat continues. Yield average. Condition of irrigated extra spring crops average. | Sowings of cotton and jowar on irrigated area continue and are below normal. |

## *GENERAL REMARKS.*

Except for light showers in parts of the south-east weather was dry. Threshing of wheat continues in a few districts. Yield is on irrigated area below normal to normal and on unirrigated area poor. Sowings of sugarcane, cotton and other autumn crops continue and are restricted in parts of the south-east and west and normal elsewhere. Condition of standing extra spring and autumn crops is generally fair on irrigated area and below average on unirrigated area. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from Lahore and the south-eastern districts. Prices are generally stationary, and in case of wheat range generally between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Lahore and Ráwalpindi 10½, Ferozepore 11½, Ambála 11½, and Lyallpur 12½ seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 20th May 1916, there were 793 births registered in the 38 large municipal towns (439 males and 354 females), giving a birth rate of 35 *per mille* of population, and 775 deaths were registered (411 males and 364 females), giving a death rate of 34 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 28 against 55 in the corresponding week of the previous year ; Amritsar 46 against 54, and Multán 25 against 26.

There were 2 deaths reported from plague in Ráwalpindi and 1 in Kasúr. Of the 5 deaths from small-pox, 3 were registered in Amritsar and 1 each in Jhelum and Lyallpur. There were 5 deaths recorded from cholera in Rohtak and 1 in Lahore.

Sanitary Commissioner's Office,
Lahore :
*The 30th May* 1916.

W. H. MILLS, Supdt.,
for *Sanitary Commissioner, Punjab*

Standing irrigated crops average and un-irrigated poor. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for—(a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring. | Autumn. |
| 10 | Shahpur ... | 0·21 at Sadr ... 0·15 at Bhera. 0·25 at Khusháb. | 1. Sufficient on irrigated area only. 2. (a) Scarce in Khusháb Tahsil. (b) Lower Jhelum and inundation canals flowing; supply sufficient. 3. Fair except in Khusháb Tahsil. | Wheat, 11 to 13 seers. Barley, 10 to 15 seers. Gram, 11 to 12 seers. Jowar, 8 to 10 seers. Bajra, 10 to 11 seers. Maize, 11 to 15 seers. Prices between warning and scarcity rates or at above scarcity rates. | Standing crops average. | Sowings of jowar, bajra, and maize continue and are normal. Standing crops average |
| 11 | Ráwalpindi ... | 0·04 at Sadr ... 0·5[illegible] at Gujar Khan 0·05 at Kahúta. | 1. Sufficient ... 2. (a) Scarce in parts of Gujar Khan, Kahúta and Murree Tahsils. 3. Good. | Wheat, 10½ seers... Barley, 13 seers. Gram, 11¼ seers. Bajra, 10 seers. Maize, 14 to 14½ seers. Prices generally between warning and scarcity rates. | Standing extra spring crops average. | More rain wanted. Condition of cotton average. |
| 12 | Miánwáli ... | 0·52 at Bhakkar ... | 1. Scarce ... 2. (b) Kurram Canal flowing. 3. Bad. | Wheat, 10¼ to 10½ seers. Barley, 12 seers. Gram, 12 seers. Bajra, 8 seers. Prices between warning and scarcity rates or at above scarcity rates. | Condition of irrigated extra spring crops average to good and of unirrigated average. | Sowings of jowar, bajra and moth continue and are normal. |
| 13 | Lyallpur ... | 0·46 at Jaranwála... | 1. Green grass scarce; dry fodder sufficient. 2. (b) Canals working by rotational closures; supply normal. 3 Good. | Wheat, 12½ seers... Gram, 12¾ seers. Maize, 17½ seers. Barley, 15 seers. Bajra, 11 seers. Prices generally between warning and scarcity rates. | ... | Sowings of fodder continue and are normal. Standing crops average. |
| 14 | Multán ... | 0·18 at Shujábad. 0·12 at Lodhrán. 0·14 at Mailsi. 0·40 at Kabirwála. | 1. Insufficient. 2. (b) Canals generally dry. 3. Generally fair. | Wheat, 11½ seers... Gram, 11¼ seers. Maize, 15½ seers. Bajra, 12½ seers ... Prices between normal and warning rates or between warning and scarcity rates. | Harvesting of wheat nearly completed. Yield average. Condition of irrigated extra spring crops average. | Rain was useful for standing crops. Sowings of irrigated cotton and jowar in progress and are below normal. Standing crops below average. |

## GENERAL REMARKS:

LIGHT or moderate rain has fallen in parts of all the reporting districts and has been useful for standing extra spring crops and for cotton and sugarcane, as also for sowings and ploughings of other autumn crops. Threshing of wheat completed. Yield on irrigated area below normal to normal and on unirrigated area poor. Sowings of autumn crops continue and are restricted in parts of the south-east and west and normal elsewhere. Condition of standing extra spring and autumn crops is generally fair on irrigated area and below average on unirrigated area. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from parts of the south-east. Prices are generally stationary, and in case of wheat range generally between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Ráwalpindi 10½, Lahore 11, Ambála 12, Ferozepore and Lyallpur 12¼ seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 27th May 1916, there were 838 births registered in the 38 large municipal towns (440 males and 398 females), giving a birth rate of 37 *per mille* of population, and 766 deaths were registered (435 males and 331 females), giving a death rate of 33 *per mille* of population. The death rates registered in the three largest towns were as follows:—Lahore 31 against 50 in the corresponding week of the previous year; Amritsar 39 against 45, and Multán 18 against 21.

There were 7 deaths reported from plague in Ráwalpindi. Of the 7 deaths from small-pox, 3 were registered in Amritsar, 2 in Hissar and 1 each in Batála and Lyallpur. There were 8 deaths recorded from cholera in Rohtak.

*Erratum*—Weekly return of births and deaths registered in the 38 municipal towns in the Punjab during the week ending Saturday, the 29th April 1916, published at pages 338 and 339 in the supplement to *Punjab Gazette* for 12th May 1916—

1. Serial No. 31 Khusháb town in the Shahpur district, instead of "1" in sub-column 11 *read* "nil" and for "30" in column 18 *read* "4."

2. Grand total, instead of "1" in sub-column 11 *read* "nil" and instead of "303" in sub-column 18 *read* "304."

3. *Delete* the last sentence from the remarks by the Sanitary Commissioner, Punjab, *viz.*: "There was 1 death recorded from cholera in Khushab."

| 11 | Ráwalpindi ... | 1·04 at Sadr ... 0·75 at Gujar Khan 2·26 at Murree. | 1. Sufficient ... 2. (a) Scarce in parts of Gujar Khan and Murree Tahsils. 3. Good. | Wheat, 10½ seers... Barley, 13¾ seers. Gram, 11½ seers. Bajra, 10½ seers. Maize, 14½ to 15 seers. Prices generally between warning and scarcity rates. | Standing extra spring crops average. | Rain was beneficial for standing crops, but more is wanted. Condition of cotton average. Sowings of moth, mung and jowar commenced and are timely. |
| 12 | Miánwáli ... | 0·87 at Sadr ... 0·83 at Isa Khel. 0·43 at Bhakkar | 1. Scarce ... 2. (b) Kurram and Nammal canals flowing; supply sufficient. 3. Bad. | Wheat, 10 to 10½ seers. Barley, 12 seers. Gram, 12 seers. Bajra, 8 seers. Prices between warning and scarcity rates or at above scarcity rates. | Condition of irrigated extra spring crops average to good and of unirrigated average. Outturn average. | Sowings of jowar and moth continue, and are normal. |
| 13 | Lyallpur ... | 0·40 at Sadr 0·86 at Toba Tek Singh. 0·80 at Samundri. | 1. Green grass insufficient; dry fodder sufficient. 2. (b) Canals working by rotational closures; supply normal. 3. Good. | Wheat, 12½ seers... Gram, 12¾ seers. Maize, 17½ seers. Barley, 15 seers. Bajra, 11 seers. Prices generally between warning and scarcity rates. | ... | Condition of standing crops average. |
| 14 | Multán ... | 0·16 at Lodhrán ... | 1. Insufficient. 2. (b) Some inundation canals flowing; supply generally sufficient. Sidhnai canal dry. 3. Generally fair. | Wheat, 12½ seers... Gram, 12 seers. Maize, 15½ seers. Bajra, 12½ seers. Prices between normal and warning rates or between warning and scarcity rates. | Rain was useful for standing extra spring crops which are average on irrigated area. Harvesting of wheat completed. Yield average. | Sowings of irrigated cotton, fodder and indigo continue, and are below normal. Standing irrigated crops below normal. |

## GENERAL REMARKS.

Light or moderate rain has fallen in all the reporting districts. The fall was heavy in Ambála. It was beneficial for standing crops and autumn sowings, but more rain is wanted everywhere. Sowings of cotton, sugarcane and other autumn crops continue and are restricted in the south-east and west and normal elsewhere. Condition of standing extra spring and autumn crops is average to good on irrigated area and generally below average on unirrigated area. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder and over work. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from parts of the south-east. Prices are generally stationary, and in case of wheat range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Ráwalpindi 10½, Lahore 11½, Ambála 12, Ferozepore and Lyallpur 12½ seers per rupee.

rain-gauge station,
rainfall,
report,
that snow-fall was below average in April 1916.

MAHBUB SHAH, SUPERINTENDENT,
*Office of Director of Land Records, Punjab.*

# Notes on the condition and prospects of crops, &c., in each district of the Punjab during the month of May 1916.

### 1.—Hissar District.

The rainfall has not been general. Sowings of barani autumn crops very slow owing to want of rain. Sowings of cotton on irrigated land continue, and are much below normal owing to insufficient supply of canal water. Extra rabi crops in fair condition. Tobacco, onion, etc., being harvested; estimated outturn annas 12 per rupee. Fodder scarce, and is being imported by rail. Cattle getting lean. Water supply in perennial canals insufficient; inundation canals dry. Grain stock sufficient for local requirements.

### 2.—Rohtak District.

Rainfall below average. No unirrigated sowings took place. Sowings of sugarcane, fodder, cotton, and indigo in some parts of irrigated lands continued, and are below normal. Condition of kharif and extra rabi crops is fair to good. Yield of extra rabi crops is generally average. Cattle generally in fair condition. Fodder is being imported. New fodder is also available at some places, especially in Sonepat Tahsil. Health of people generally good. Supply of canal water was generally inadequate. Village ponds are dry. Prices almost stationary.

### 3.—Gurgaon District.

Rainfall was too insufficient to be beneficial for standing crops and for kharif sowings. Cotton, sugarcane and chari were being sown on irrigated areas and germinated well, but the area sown was much below normal. Condition of the standing zaid rabi and kharif crops is fairly good, but the insufficient supply of canal water is damaging the crops on canal areas to some extent. Yield of the zaid rabi crops expected to be average. Cattle in very poor condition. Green grass not procurable. Fodder being imported from other provinces. Stock of fodder in villages is insufficient. Health of the people good. Canal was closed in Firozpur and Nuh Tahsils, and the supply of water in Palwal and Ballabgarh Tahsils was insufficient.

### 4.—Karnal District.

There was good rainfall on 30th which will be beneficial to standing crops. Grass is already beginning to grow, and the ponds and wells are in better state. Rabi crops have been harvested. The yield of irrigated crop is average and unirrigated is below average. Sowing of cotton in progress. The condition of sugarcane and extra rabi crops is good. Fodder and water insufficient but improved by rainfall. The state of public health is good. Supply of canal water is deficient. No inundations.

### 5.—Ambala District.

Rainfall insufficient. The fall of 30th May benefited the standing extra rabi and cane crops in Jagádhri, Naráingarh and Rúpar Tahsils. The condition of standing extra rabi sugarcane crops on the irrigated land is average and on unirrigated land below average. Yield of extra rabi crops average. Cattle are generally in good condition. Fodder stocks and water supply insufficient. Public health good. Western Jumna Canal flowed continually though water was inadequate for irrigation purposes. No river inundation or torrent floods. Prices fell down in the beginning of the month, but have again risen to the close of the month.

### 6.—Simla District.

Rainfall during the month was insufficient. Maize, mash and other crops were sown to some extent. Yield in the Simla Tahsil is as follows:—

| | | *Irrigated per acre.* | *Unirrigated per acre.* |
|---|---|---|---|
| Wheat | ... | 410 seers | 350 seers |
| Barley | ... | ... | 175 seers. |

Condition of cattle good. Fodder and grazing sufficient. Public health good. Water in hill streams insufficient.

### 7.—Kangra District.

Rainfall during the month was generally below the average. It was not enough for ploughing and sowing on unirrigated tracts nor for irrigated lands. Some area, nearly one-fourth was sown with rice, maize, cotton and sugarcane, etc. Rabi crops were reaped during the month, except in Gahri (snowy tracts in Kulu and Pálampur). Cotton and sugarcane crops are in need of rains. Yield of the rabi crops is average on irrigated lands, while it is much

below the average in barani areas. Fodder is not sufficient in Dhera and Hamírpur Tahsils; in other tahsils it was available. Public health was good, water in streams and kuhls insufficient for irrigation. But the recent rains have made up the deficiency to some extent.

8.—Hoshiarpur District.

No sowings were effected during the month. Extra rabi crops are suffering for want of rain. Mango crop which has already been considerably damaged by *tela* has been further damaged by storms. Fodder sufficient. Public health generally good. Shah Nahr Canal continued to work during the month.

9.—Jullundur District.

No rain. Sowings of cotton and extra rabi crops finished and were normal. Condition of irrigated crops is good and of unirrigated average. The yield of irrigated rabi crop is average and of unirrigated poor. Cattle in good condition. Fodder sufficient. Public health good.

10.—Ludhiana District.

Rainfall in the tahsils of Samrála and Jagráon was too slight to be beneficial to the standing crops. Sowings of *chari* and *moth* in progress in some places. Condition of standing crops on irrigated area good; on unirrigated area average. Condition of cattle is satisfactory. Bhusa available; green fodder scanty. Irrigation from canals satisfactory.

No floods reported. Prices of foodstuff nearly stationary.

11.—Ferozepore District.

Rainfall on the 9th and 10th was too slight to be beneficial to standing crops. The rainfall on the 30th, though not universal, was received with entire satisfaction. In a few places of Fazilka Tahsil extra rabi crops and green fodder were sown. The condition of standing extra rabi crops is good. The outturn of wheat and barley was 16 annas on irrigated area, from 10 to 12 annas in Bet barani, and from 4 to 8 annas on unirrigated land. The outturn of gram crops was from 12 to 16 annas per rupee on irrigated, from 8 to 10 annas on sandy unirrigated and from 4 to 8 annas on other kind of unirrigated soil. The condition of cattle is satisfactory. Green grass is not available, but fodder is sufficient for the present. Public health is generally good. The flow of Sirhind Canals was satisfactory. The prices of food-grains remained stationary, but in the last week of the month prices of wheat and barley fell owing to new harvest having been brought to the market.

12.—Lahore District.

The 'falls were of isolated nature. Some benefit was done to standing crops. Cotton, chari and moth were being sown, the area sown is normal. Condition of standing crops was good on irrigated lands. Harvesting of wheat, gram and barley continued. The expected yield on irrigated area was normal and on unirrigated poor. Condition of cattle was average. Fodder was sufficient. General health good. The supply of water in inundation canals was comparatively short on account of absence of rain. Perennial canals worked satisfactorily. There were no floods in the river.

13.—Amritsar District.

Cotton and chari were sown. Standing crops on irrigated area average and on unirrigated bad. Yield expected to be average on irrigated, and bad on unirrigated areas. Condition of cattle average. Public health is generally good, canals working by rotation. No complaint of supply. There were no floods.

14.—Gurdaspur District.

The rainfall during the month was average. Rice sowing commenced. The condition of cane and cotton on irrigated and sailab lands is good, and on unirrigated lands average. Wheat and barley crops were threshed. The outturn of irrigated, low-lying and sailab crops is average to good, and of other unirrigated crops below average. Grain is full and of good quality. Condition of cattle generally good. Fodder is sufficient. Public health generally good. River and Government canals are flowing. Prices almost stationary.

15.—Sialkot District.

Sowings of cotton, sugarcane and fodder crops continued on irrigated area. Condition of standing crops is good on irrigated, and poor on unirrigated tracts. Yield of wheat average on irrigated, and poor on unirrigated areas. Dry fodder sufficient. Public health generally good. Raya Branch of the canal opened at the close of the month. Water in Aik stream sufficient. No jhallari irrigation from Aik.

16.—Gujranwala District.

Practically no rainfell during the month. Sowings of cotton and fodder being made. The condition of kharif and extra rabi crops is fair. Extra rabi crops were slightly damaged by hailstorm in a few villages of Khangáh Dográn Tahsil. The yield of irrigated crops has been estimated to be normal and of unirrigated below normal. The condition of cattle good. Fodder sufficient. Public health generally good. Canals working by turns. Raya Branch opened during this month.

17.—Gujrat District.

Light showers were received in certain parts of the district. More rain is badly wanted. Sowings of cotton, jowar and some fodder crops were made on some Bar land irrigated by Upper Jhelum Canal recently opened. Condition of crops on irrigated land fair, and on barani crops generally poor. Threshing of wheat already finished. Harvesting of extra rabi crops in progress. Estimated yield below average. Cattle in good condition. Fodder sufficient, but in some parts it is getting scarce. Public health good. Canal flowing.

18.—Shahpur District.

There were practically only two showers of rain during the month which helped sowing of extra spring crops, but on the other hand rather delayed garnering and spoiled cotton sowing in Bhera Tahsil. The condition of extra rabi crops is normal on irrigated area and poor elsewhere. Threshing of wheat was done early in May but garnering is still in progress. The yield of wheat was 7 to 16 maunds per acre on irrigated area and to 8 maunds elsewhere. The condition of cattle is fair except in Khusháb Tahsil where there is a continued serious scarcity of fodder and water; bhusa being available on irrigated area only. The state of public health was good. The Lower Jhelum and Inundation Canals continued to flow with sufficient supply of water.

19.—Jhelum District.

More rain badly wanted. No fresh sowings made during the month. Standing extra rabi crops are in fair condition on irrigated and sailab lands and poor elsewhere. Yield is expected to be below average. Condition of cattle generally good. Fodder and water scarce in Thal *ilaka*. Public health generally good. Pind Dádan Khan Canal began to flow late owing to opening of Upper Jhelum Canal.

20.—Rawalpindi District.

Rainfall in Murree and Kahuta below average, in Gujar Khan and Ráwalpindi slightly above average. It was beneficial to extra rabi crops, and slightly assisted the kharif sowings. In the last few days rain in the Murree *ilaka* must have been beneficial for kharif sowings, and more rain looks likely. Condition of standing extra rabi crops and kharif crops average. Rain wanted. Harvesting of rabi finished, yield below average. Condition of cattle good. White bhusa still available, but selling dear. Public health good.

21.—Attock District.

Rainfall which was above average in all tahsils except Talágang, led to some sowings of bajra, moth and chari on unirrigated lands. Maize was sown on irrigated area. The condition of extra rabi crops is generally good. The condition of cattle is fair. Fodder is available. Public health good. Water is sufficient. Prices generally stationary.

22.—Mianwali District.

Extra rabi crops were sown in Miánwáli and Isákhel Tahsils to normal extent. Kharif crops (bajra, jowar and moth) were also sown in Miánwali Tahsil. Standing crops and their expected outturn were average to good on irrigated and poor to average on unirrigated areas. Rain is badly wanted. Cattle in bad condition owing to scarcity of fodder. Public health is good. The Kurram is watering lands sufficiently in Isákhel Tahsil. The Nammal Canal watered the Miánwáli Civil Station lands to restricted extent. There was no flood in the Indus River. No floods from hill torrents.

23.—Montgomery District.

Cotton, chari, maize and moth sowings continued during the month. Condition of standing crops average. Rain wanted. Average yield expected. Cattle healthy. Green fodder is scarce. Bhusa is available. It is hardly sufficient. General health good. No water in the Ravi River. Lower Bari Doab Canal is flowing. Sutlej Canals dry. General condition average.

### 24—Lyallpur District.

Rainfall insufficient. Cotton, melons, chari, fodder and moth were sown. Condition of standing crops is average. Wheat threshing in progress. Yield per acre is about 11-12 maunds, which is below average. Gram harvesting finished. Its yield is 8 maunds per acre, which is below average. Cattle are in good condition. Dry fodder is ample, but green is scarce. Public health good. Canal works by rotational closures and water supply was normal. Crops in 15 villages of Lyallpur Tahsil damaged by hail stone.

### 25.—Jhang District.

Rainfall in Shorkot and Jhang Tahsils below average but in Chiniot Tahsil above average. Cotton, moth, maize and chari, etc., are being sown. Standing crops are in average condition. Wheat harvested during the month. Bhusa is available in sufficient quantity, but green fodder is scarce. Public health good. Canals flowing. Water in rivers increasing, but there was no inundation. Prices stationary.

### 26.—Multan District.

Rainfall was useful to the extra rabi crops. No progress in sowings with rain water. Rain badly wanted. The condition of extra rabi crops on well irrigated areas was average and that on irrigated sailab areas below average. Barley, gram, and wheat harvested, the out-turn on well irrigated areas average and that on unirrigated areas below average. Condition of cattle fair. Fodder sufficient for the present. Health of people good. Sidhnai and all inundation canals are generally dry. Prices of food grains specially wheat rising. Stocks of old wheat still available.

### 27.—Muzaffargarh District.

There though very little rainfall has proved beneficial to the standing crops. Cotton, jawar and indigo sown. The condition of crops average. Wheat crop is still being removed from the threshing floor. Average yield on irrigated land 6 maunds and on unirrigated 2 maunds. Condition of cattle generally good. Fodder available. Public health generally good. No floods. Indus canals running. The Chenab Canals still dry.

### 28.—Dera Ghazi Khan District.

Rainfall during the month was below average in the two southern tahsils and above it in the northern. It did good to the kharif crops sown during month and proved useful for the zaid rabi crop as well. Condition of zaid rabi crops average. The produce of rabi harvest has been average. Condition of cattle is on the whole fair. Fodder is scarce in most part of the district. Public health good. Canals are running exceptionally well with a very low river. Most of the hill torrents have brought down some water. Prices are stationary.

MAHBUB SHAH, Supdt.,

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 3rd June 1916, there were 878 births registered in the 38 large municipal towns (425 males and 453 females), giving a birth rate of 38 *per mille* of population, and 779 deaths were registered (380 males and 399 females), giving a death rate of 34 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 31 against 45 in the corresponding week of the previous year ; Amritsar 37 against 53, and Multán 22 against 13.

There were 3 deaths reported from plague in Ráwalpindi. Of the 5 deaths from small-pox, 2 were registered in Ludhiána, and 1 each in Shahabad, Amritsar and Lyallpur. There were 7 deaths recorded from cholera in Rohtak.

Sanitary Commissioner's Office,
Lahore :
*The* 13*th June* 1916.

W. H. MILLS, Supdt.,
for *Sanitary Commissioner, Punjab.*

Bajra, 10½ seers. Maize, 14¼ to 15 seers. Prices generally between warning and scarcity rates. | Condition of irrigated extra spring crops average and unirrigated below average. | Rain wanted. Sowings of maize and other crops continue in parts and are timely and normal. Standing irrigated crops average and unirrigated below average. |
| 12 | Miánwáli ... | ... | 1. Scarce ... 2. (b) Kurram and Nammal canals flowing; supply sufficient. 3. Bad. | Wheat, 10½ to 11¼ seers. Barley, 11 seers. Gram, 12 seers. Bajra, 8 seers. Prices between warning and scarcity rates or at above scarcity rates. | Standing irrigated extra spring crops average to good and unirrigated average except in Miánwáli and Isa Khel tahsils where crops are under water owing to floods. Except in above tahsils outturn is average. | ... |
| 13 | Lyallpur ... | ... | 1. Green grass insufficient; dry fodder sufficient. 2. (b) Canals working by rotational closures; supply normal. 3. Good. | Wheat, 13½ seers... Gram, 12¼ seers. Maize, 18 seers. Barley, 14½ seers. Prices generally between normal and warning rates or between warning or scarcity rates. | ... | Sowings of fodder and moth continue, and are normal. Standing crops average. |
| 14 | Multán ... | 0·09 at Mailsi ... | 1. Insufficient. 2. (b) Canals flowing; supply sufficient. 3. Generally fair. | Wheat, 12½ seers... Gram, 12 seers. Maize, 15½ seers. Bajra, 12¼ seers. Prices between normal and warning rates or between warning and scarcity rates. | Tobacco being harvested. Yield average, standing extra spring crops average. | Sowings of cotton, jowar, maize, rice and indigo continue on irrigated area and are below normal. Condition of irrigated standing crops below average. |

*GENERAL REMARKS.*

Light or moderate rain was received in parts of the south-east and submontane tracts. Elsewhere weather was generally dry. Rain, though beneficial to standing crops, was generally insufficient for sowings and more is wanted everywhere. Sowings of cotton, fodder and other autumn crops continue and are restricted in parts of the south-east and west and normal elsewhere. Condition of standing extra spring and autumn crops is average to good on irrigated area and generally below average on unirrigated area. Extra spring crops being harvested in some districts. Yield generally normal. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder and over-work. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from parts of the south-east. Prices are generally stationary, and in case of wheat range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Râwalpindi 10¾, Ambála, Ferozepore, and Lahore 12 and Lyallpur 13½ seers per rupee.

There was more than the normal amount of rain in the area defined by Multán, Montgomery and Khusháb, but elsewhere the weather was unusually dry.

As compared with the corresponding month of the previous year there was an increase of 231 births or 0·15 per 1,000 of population which affected the Ambála and
he divisions of the province and was most marked (8·96) in the Lahore Division.

As compared with the corresponding month of the previous year there was a decrease of 49·18 *per mille* in the death rate for the month under report which was noticed

As compared with the previous month, however, there was an increase of 1·23 *per mille* of population which was noticed in every division of the province except

There were 11 deaths (including 3 in towns) from cholera recorded during the month under review ... in the corresponding month of

of 20,000 *or upwards) in the Punjab for the month of April* 1916.

...arks.

...Multán divisions only and was most marked (3·40) in the Multán Division. Compared with the previous month there was a decrease of 6·27 *per mille* which was shared ...

... all the divisions in the province and was entirely due to the diminution in the mortality from plague.

...Multán and under every head of mortality except Respiratory affections.

...the previous year and one in March 1916.

W. H. MILLS, ...

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 10th June 1916, there were 996 births registered in the 38 large municipal towns (526 males and 470 females), giving a birth rate of 43 *per mille* of population, and 886 deaths were registered (457 males and 429 females), giving a death rate of 39 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 37 against 41 in the corresponding week of the previous year ; Amritsar 49 against 52, and Multán 33 against 24.

There were 3 deaths reported from plague in Ráwalpindi. Of the 6 deaths from small-pox, 3 were registered in Amritsar, 2 in Ludhiána and 1 in Jhelum.

Sanitary Commissioner's Office,
Lahore :
*The* 20*th June* 1916.

## PART I.

## STATISTICAL.

### Weather, health and crop report for week ending 8 A.M., Tuesday, the 27th June 1916.

[ Fourteen out of 23 districts are dealt with. ]

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring. | Autumn. |
| 1 | Hissar ... | ... | 1. Scarce; being imported.<br>2. (b) Canals running; supply insufficient.<br>3. Getting lean. | Wheat, 11 seers ...<br>Gram, 12½ seers.<br>Bajra, 11 seers.<br>Bejhar, 12½ seers.<br>Prices of wheat between normal and warning rates, and of other grains between warning and scarcity rates. | Standing extra spring crops in fair condition. Tobacco, onions and melons being harvested. Yield 12 annas in a rupee. | Sowings of irrigated cotton and fodder continue and are below normal owing to shortage of canal water. Sowings on unirrigated area very little. Rain urgently wanted. |
| 2 | Rohtak ... | 0·29 at Gohána ...<br>0·25 at Jhajjar.<br>0·82 at Sámpla.<br>0·34 at Beri.<br>0·14 at Salháwas.<br>0·98 at Sonepat.<br>More or less at other places. | 1. Being imported, except in Sonepat Tahsil<br>2. (a) Village ponds have received rain-water.<br>(b) Adequate.<br>3. Fair | Wheat, 10½ seers ...<br>Gram, 13 seers.<br>Barley, 14½ seers.<br>Jowar, 14 seers.<br>Bejhar, 13½ seers.<br>Prices generally between warning and scarcity rates. | Condition of extra spring crops fair to good. Yield fair. | Sowings of irrigated cotton and indigo and unirrigated cotton, jowar, bajra maize, etc., continue in parts, and are timely, but below normal. Standing crops fair to good. |

| No. | Reporting station. | Rain. | 1. Supply of fodder.<br>2. Water-supply for—<br>(a) Drinking.<br>(b) Canal irrigation.<br>3. Condition of cattle. | Prices in seers per rupee. | Prospects of Spring. | Prospects of Autumn. |
|---|---|---|---|---|---|---|
| 3 | Gurgaon ... | 0·47 at Sadr ...<br>0·05 at Rewári.<br>0·27 at Nuh.<br>0·03 at Fírozpur.<br>0·27 at Palwal.<br>0·51 at Ballabgarh. | 1. Scarce ...<br>2. (b) Sufficient.<br>3. Very poor. | Wheat, 9¾ to 11 seers.<br>Barley, 12½ to 14½ seers<br>Gram, 10 to 12½ seers.<br>Jowar, 8 to 13 seers.<br>Bajra, 8 to 11 seers.<br>Maize, 10 to 13 seers.<br>Prices generally between warning and scarcity rates. | Condition of irrigated extra spring crops fairly good. | Rain was insufficient for sowings. Sowings of millets and cotton continue and are restricted on unirrigated area. Condition of irrigat cotton and germination of unirrigated crops fairly good. |
| 4 | Ambála ... | 3·96 at Jagádhri...<br>4·36 at Naráingarh.<br>0·53 at Kharar.<br>0·22 at Rúpar.<br>3·52 at Kasauli. | 1. Green fodder sufficient.<br>2. (a) Sufficient ...<br>(b) Do.<br>3 Generally good. | Wheat, 12 seers ...<br>Gram, 13 seers.<br>Barley, 14 seers.<br>Maize, 16 seers.<br>Bajra, 10 seers.<br>Prices at normal rates or between warning and scarcity rates. | Extra spring crops good. Yield normal. | More rain wanted in Ambála and Kharar Tahsils. Rain was useful for sowings and for sugarcane crop. Sowings continue and are normal. Sowing of cotton nearly finished. Condition of sugarcane and germination of other crops good. |
| 5 | Jullundur ... | ... | 1. Sufficient ...<br>2. (a) Do.<br>3. Average. | Wheat, 12¼ seers...<br>Barley, 14 seers.<br>Gram, 12¾ seers.<br>Maize, 17½ seers.<br>Jowar, 11 seers.<br>Bajra, 8¾ seers.<br>Prices generally between warning and scarcity rates. | Standing extra spring crops good. Yield normal. | Rain urgently needed. Condition of sugarcane and cotton good. |
| 6 | Ferozepore ... | ... | 1. Sufficient ...<br>2. (a) Do.<br>(b) Canals flowing; supply satisfactory.<br>3. Generally good. | Wheat, 12½ seers...<br>Gram, 13 seers.<br>Prices between normal and warning rates or between warning and scarcity rates. | Tobacco and onions being reaped. Yield normal. | Sowings of irrigated fodder, moth and cotton continue. Standing irrigated crops satisfactory and unirrigated below average. |
| 7 | Lahore ... | ... | 1. Sufficient<br>2. (a) Do.<br>(b) Do.<br>3. Good. | Wheat, 12 seers ...<br>Gram, 13 seers.<br>Barley, 14 seers.<br>Prices at warning or scarcity rates. | Condition of irrigated extra spring crops average. | Sowings of irrigated cotton, fodder and moth continue, and are normal. Condition of standing cotton and sugarcane crops average. |
| 8 | Amritsar ... | ... | 1. Sufficient ..<br>2. (b) Canals working by rotations; supply sufficient.<br>3. Average. | Wheat, 12½ seers<br>Gram, 12¾ seers.<br>Barley, 15¼ seers.<br>Jowar, 12½ seers.<br>Maize, 16$\frac{1}{16}$ seers.<br>Bajra, 10½ seers.<br>Prices generally between warning and scarcity rates. | Condition of standing irrigated crops average and unirrigated bad. | Rain wanted. Sowings of irrigated rice and fodder continue, and are below normal. Standing irrigated crops average and unirrigated bad. |
| 9 | Siálkot ... | 1·69 at Sadr ...<br>2·51 at Zafarwál.<br>1·22 at Pasrur.<br>0·39 at Raya.<br>2·38 at Daska. | 1. Green grass scarce; dry fodder sufficient.<br>2. (a) Sufficient.<br>(b) Bajwat and Aik streams flowing; supply sufficient.<br>3. Weak owing to hard work. | Wheat, 11 to 12 seers.<br>Barley, 12½ to 13 seers.<br>Gram, 11 to 11¼ seers.<br>Prices between normal and warning rates or between warning or scarcity rates. | Condition of irrigated extra spring crops good and of unirrigated poor. | More rain wanted. Sowings of fodder continue. Standing irrigated crops good and unirrigated poor. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prosrects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring. | Autumn. |
| 10 | Shahpur ... | 0·46 at Sadr ...<br>0·79 at Bhera.<br>0·20 at Khushâb. | 1. Sufficient, except in Khushâb Tahsil.<br>2. (b) Canals flowing; supply sufficient.<br>3. Fair except in Khushâb Tahsil. | Wheat, 12 to 14½ seers.<br>Barley, 14 to 15 seers.<br>Gram, 11½ to 12½ seers.<br>Jowar, 9 to 10 seers.<br>Bajra, 10 to 10½ seers.<br>Maize, 12 to 15 seers.<br>Prices between warning and scarcity rates or at above scarcity rates. | ... | Sowings of jowar and bajra continue, and are normal. Standing irrigated crops good and unirrigated average. |
| 11 | Rávalpindi ... | 1·58 at Sadr ...<br>2·86 at Gujar Khan.<br>2·40 at Kahúta.<br>2·88 at Murree. | 1. Sufficient ...<br>2. (a) Insufficient in parts of Gujar Khan, Kahúta and Murree Tahsils.<br>3. Good. | Wheat, 11 seers ...<br>Barley, 14½ seers.<br>Gram, 12 seers.<br>Bajra, 10½ seers.<br>Maize, 14 to 15 seers.<br>Prices generally between warning and scarcity rates. | Condition of irrigated extra spring crops average and unirrigated below average. | Rain was almost sufficient and beneficial. Standing irrigated crops average and unirrigated below average. Sowings continue and are timely, and normal. |
| 12 | Miánwáli ... | ... | 1. Scarce ...<br>2. (b) Kurram and Nammal Canals flowing; supply sufficient.<br>3. Bad. | Wheat, 10¼ to 10½ seers.<br>Barley, 12½ seers.<br>Gram, 12 seers.<br>Bajra, 8 seers.<br>Prices between warning and scarcity rates or at above scarcity rates. | Standing irrigated extra spring crops average to good and unirrigated average, except in Miánwáli, Isa Khel and Bhakkar Tahsils, where crops are under water owing to floods. Outturn is average, except in above tahsils | Rain badly wanted. No sowings. |
| 13 | Lyallpur ... | 0·60 at Sadr ...<br>0·08 at Jaránwála. | 1. Green grass insufficient; dry sufficient.<br>2. (b) Canals working by rotational closures; supply normal.<br>3. Good. | Wheat, 13 seers ...<br>Gram, 13½ seers.<br>Maize, 18 seers.<br>Barley, 15 seers.<br>Prices between normal and warning rates or between warning or scarcity rates. | ... | Sowings of moth and fodder continue, and are normal. Standing crops average. |
| 14 | Multán ... | 0·68 at Lodhrán ... | 1. Available ...<br>2. (b) Canals flowing; supply sufficient.<br>3. Fair. | Wheat, 12½ seers...<br>Gram, 12½ seers.<br>Jowar, 11½ seers.<br>Bajra, 12½ seers.<br>Maize, 15 seers.<br>Prices between normal and warning rates or between warning and scarcity rates. | Condition of standing extra spring crops average | Rain was useful for standing crops in Lodhrán, but more is badly wanted everywhere. Sowings of fodder, rice, cotton, jowar, maize continue to a small extent. Standing irrigated crops below average owing to late running of inundation canals. |

## *GENERAL REMARKS.*

RAINFALL fairly heavy in submontane districts and light in parts of the south-east and west. The central tract remained dry. R... was beneficial for sowings and for standing crops, but more is badly wanted everywhere. Sowings of cotton, fodder and other autumn crops continue and are generally normal, except in parts of the south-east, where they are restricted. Condition of standing extra spring and autumn crops is average to good on irrigated area and generally below average on unirrigated area. Extra spring crops being harvested in the south-east. Yield generally normal. Cattle are generally healthy, but are weak in some districts owing to scarcity of fodder and over-work. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from Hissar. Prices are generally stationary, and in case of wheat range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Ráwalpindi 11, Ambála and Lahore 12, Ferozepore 12¼, and Lyallpur 13 seers per rupee.

(a) = Mean of 22 days.

*Not reduced to sea-level.

(b) Aneroid.

Several disturbances of the cold weather type affected the weather in the course of the month, but they were of small vitality and in the absence of a flow of damp air from the Bay to supplement their activity failed to produce any unusual snowfall or rainfall. They were, however, partly responsible for the abnormally large number of thunderstorms and duststorms recorded during the month.

*Pressure and Winds.*—Pressure was in defect in the plains and nearly normal at the level of the hill stations. Winds over the Punjab were on the whole of the average strength, but were somewhat more northerly than usual in the south-western districts.

*Temperature.*—At most stations in the Punjab maximum temperature approximated closely to the normal, but minimum temperature was appreciably higher than usual. The highest temperature recorded during the month was 110° at Khushab on the afternoon of the 17th.

The following table shows for each day of the month the departure from the normal of the mean temperature of the Punjab and the North-West Frontier Province, with the highest maximum temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. |

| " 16th ... | +1·4 | 103·7 | Do. | | | | |

*Humidity and Cloud.*—The air was drier than usual in the northern and eastern parts of the Punjab. The amount of cloud was above normal generally in the North-West Frontier Province and the north of the Punjab.

*Rainfall.*—In the Punjab the rainfall of the month was deficient except in the area represented by Montgomery, Multán and Khusháb ; hardly any rain fell at Ludhiána, while the total fall at Murree was nearly two inches below normal. In the North-West Frontier Province the defect was restricted to Dera Ismáil Khan and Cherát.

The following table gives the rainfall data for the Punjab and the North-West Frontier Province stations for April 1916. :—

| Station. | Actual rainfall in April 1916. | Normal rainfall in April. | Departure from normal in April 1916. | Station. | Actual rainfall in April 1916. | Normal rainfall in April. | Departure from normal in April 1916. |

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 17th June 1916, there were 899 births registered in the 38 large municipal towns (502 males and 397 females), giving a birth rate of 39 *per mille* of population, and 671 deaths were registered (336 males and 335 females), giving a death rate of 29 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 29 against 29 in the corresponding week of the previous year; Amritsar 33 against 38, and Multán 29 against 26.

There were 3 deaths reported from plague in Ráwalpindi. Of the 7 deaths from small-pox, 3 were registered in Batála, 2 in Amritsar, and 1 each in Lyallpur and Multán.

*Erratum* :—Weekly return of births and deaths registered in the 38 large municipal towns in the Punjab during the week ending Saturday, the 3rd June 1916, published at pages 418 and 419 in the Supplement to *Punjab Gazette*, June 16th, 1916 :—

1. Serial No. 38, Multán town, in Multán District, instead of *nil* in sub-column 11 *read* "1" and *for* "10" in sub-column 18 *read* "9".
2. Grand total, instead of "7" in sub-column 11 *read* "8" and *for* "286" in sub-column 18 *read* "285".
3. *Add* "and 1 in Multán" after the word "Rohtak" in the last sentence of remarks by the Sanitary Commissioner, Punjab.

Sanitary Commissioner's Office,
Lahore :
*The 27th June* 1916.

W. H. MILLS, Supdt.,
for *Sanitary Commissioner, Punjab.*

Prices between normal and warning rates or between warning and scarcity rates. | Condition of irrigated extra spring crops average and of unirrigated below average. | Rain though insufficient was beneficial. Standing irrigated crops average and unirrigated below average. Sowings continue and are timely, and normal. |
| 12 | Miánwáli ... | 0·37 at Sadr ... 0·17 at Bhakkar. | 1. Scarce ... 2. (b) Nammal and Kurram streams flowing. 3. Bad. | Wheat, 10¼ to 10¾ seers. Barley, 12½ seers. Gram, 12 seers. Bajra, 8 seers. Prices between warning and scarcity rates or at above scarcity rates. | Condition of irrigated extra spring crops average to good and of unirrigated average. Yield average. | Sowings continue to normal extent. |
| 13 | Lyallpur ... | 0·94 at Samundri... 0·21 at Toba Tek Singh. | 1. Green grass insufficient. 2. (b) Canals working by rotational closures; supply normal. 3. Good. | Wheat, 12½ seers... Gram, 13¼ seers. Maize, 18 seers. Barley, 14¾ seers. Prices at normal or warning rates. | Condition of extra spring crops average. | Sowings of fodder, &c., continue, and are normal. |
| 14 | Multán ... | ... | 1. Available ... 2. (b) Canals flowing; supply sufficient. 3. Fair. | Wheat, 12½ seers ... Gram, 12¼ seers. Maize 15½ seers. Jowar, 11½ seers. Bajra, 11¼ seers. Prices at normal rates or between warning and scarcity rates. | Condition of extra spring crops average. Harvesting in progress. Yield average. | Sowing of rice, cotton and indigo completed, and of jowar and maize, &c., continue, and are normal on irrigated area. Standing irrigated crops below average owing to late running of inundation canals. |

## *GENERAL REMARKS.*

Light rain has fallen in parts of all reporting districts except Hissar, Shahpur and Multan. Though beneficial it was still insufficient for sowings, and more rain is badly wanted everywhere. Sowings of cotton, fodder and other autumn crops continue and are generally normal, except in parts of the south-east, where they are restricted. Condition of standing extra spring and autumn crops is average to good on irrigated area and generally below average on unirrigated area. Crops have slightly been damaged by locusts and strong winds in parts of the south-east. Extra spring crops being harvested. Yield generally normal. Cattle are generally healthy, but are suffering seriously in the south-east owing to scarcity of fodder and over-work. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from parts of the south-east. Prices are generally stationary, and in case of wheat range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat :—Ráwalpindi 11, Lahore 11¾, Ambála and Ferozepore 12, and Lyallpur 12½ seers per rupee.

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring. | Autumn. |
| 10 | Shahpur ... | 1·75 at Sadr ... 1·36 at Bhera. 0·85 at Shahpur. 0·31 at Khushâb. | 1. Sufficient, except in Khushâb Tahsil. 2. (b) Canals flowing; supply sufficient. 3. Fair, except in Khushâb Tahsil. | Wheat, 11½ to 13 seers. Barley, 13 to 14 seers. Gram, 11½ to 12½ seers. Jowar, 10 to 12 seers. Bajra, 10 to 11½ seers. Maize, 10 to 14 seers. Prices between normal and warning rates or between warning and scarcity rates. | Condition of irrigated extra spring crops good, and of unirrigated average. | Sowings of jowar and bajra continue to normal extent. Standing irrigated crops good and unirrigated average. |
| 11 | Ráwalpindi ... | 0·47 at Sadr ... 1·48 at Gujar Khan. 0·86 at Kahúta. 3·60 at Murree. | 1. Sufficient, except in Gujar Khan Tahsil. 3. Good. | Wheat, 10¾ seers... Barley, 14 seers. Gram, 11 seers. Bajra, 11 seers. Maize, 14 seers. Prices between normal and warning rates or between warning and scarcity rates. | Condition of extra spring crops average. | Rain, though insufficient at Ráwalpindi and Kahúta, was beneficial to crops which are in average condition. Sowings in progress and are normal. |
| 12 | Miánwáli ... | 0·50 at Sadr ... 1·35 at Isa Khel. | 1. Scarce ... 2. (b) Nammal and Kurram Canals flowing. 3. Bad. | Wheat, 10½ to 10¾ seers. Barley, 12½ seers. Gram, 12¼ seers. Bajra, 8 seers. Prices between warning and scarcity rates or at above scarcity rates. | Condition of irrigated extra spring crops average to good, and of unirrigated average. Yield average. | Sowings continue and are normal. |
| 13 | Lyallpur ... | 1·00 at Sadr ... 0·06 at Toba Tek Singh. 1·50 at Samundri 0·87 at Jaránwála. | 1. Green grass insufficient; dry sufficient. 2. (b) Canals working by rotational closures; supply normal. 3. Good. | Wheat, 12 seers ... Gram, 12¼ seers. Maize, 17½ seers. Barley, 14¼ seers. Prices at normal or warning rates. | Condition of extra spring crops average. | Sowings of moth and fodder continue, and are normal. |
| 14 | Multán ... | ... | 1. Available 2. (b) Canals flowing; supply sufficient 3. Fair. | Wheat, 12 seers ... Gram, 12¼ seers. Maize, 15½ seers. Jowar, 11¾ seers. Bajra, 11¾ seers. Prices at normal rates or between warning and scarcity rates. | Condition of extra spring crops average. Harvesting of tobacco and onions in progress. Yield average. | Rain badly needed. Sowings of maize, fodder, millets and rice continue, and are normal. Standing crops below average owing to late running of canals. |

*GENERAL REMARKS*

Light or moderate rain has fallen in almost all the reporting districts. Though insufficient, it was beneficial for standing crops and for sowings. More is wanted everywhere. Sowings of cotton, fodder and other autumn crops continue and are generally normal, except in parts of the south-east, where they are restricted. Condition of standing extra spring and autumn crops is average to good on irrigated area and generally below average to average on unirrigated area. Extra spring crops being harvested. Yield generally normal. Cattle are generally healthy, but are suffering seriously in the south-east owing to scarcity of fodder and over-work. Water for drinking and irrigation generally sufficient, but shortage of canal water is reported from parts of the south-east. Prices are generally stationary, but have risen slightly in some districts. In case of wheat they range between normal and warning rates and in other cases between warning and scarcity rates. Prices of wheat:—Ráwalpindi 10¾; Ambála, Ferozepore, Lahore and Lyallpur 12 seers per rupee.

MAHBUB SHAH, SUPDT.,

for *Director of Land Records, Punjab.*

*Not reduced to sea-level.
‡ = Mean of 27 days.
† Aneroid,
(a) = Indeterminate.
(b) = Mean of 28 days.
(c) = Mean of 29 days.

Several disturbances of the winter type affected the weather but they were of small vitality and produced rain chiefly in the North-West Frontier Province. In the Punjab thunderstorms and duststorms, mainly attributable to these disturbances, gave occasional showers of rain, but except at a few places the total rainfall of the month was short of the average.

*Pressure and Winds.*—Atmospheric pressure was distinctly above normal almost everywhere. The direction of wind was very abnormal in the south-east and the south-west of the Punjab where the usual southerly component was replaced by a northerly element. The velocity was high in the submontane Punjab.

*Temperature.*—The 7th and the 29th were the only days on which the mean temperature in the plains of the Punjab and the North-West Frontier Province was appreciably above normal. On the other hand the temperature was in defect by 4° or more from the 1st to the 5th, the 9th to the 13th and again on the 15th, 16th and the 31st. The highest maximum temperature observed during the month was 115° at Multán on the afternoon of the 28th.

The mean temperature of the month agreed with the normal within 1° at Ambála, Simla and Ludhiána, and was in defect over the rest of the Punjab as well as in the North-West Frontier Province. The defect amounted to 4° at Siálkot and Murree, 5° at Montgomery and Paráchinar and 8° at Cherát and Drosh.

The following table shows for each day of the month the departure from the normal of the mean temperature of the Punjab and the North-West Frontier Province, with the highest maximum temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. |

| " 16th ... | −4·4 | 106·7 | Do. | | | | |

*Humidity and Cloud.*—Humidity was low in the east Punjab and about the average elsewhere. Skies were on the whole clouded to about the customary extent.

*Rainfall.*—In the Punjab there was an excess at Hissar, Khusháb, Ráwalpindi and Multán, and a defect at the other observing stations. In the North-West Frontier Province the fall was equal to the normal at Pesháwar, deficient at Dera Ismáil Khan, and above the average at the hill stations.

The following table gives the rainfall data for the Punjab and the North-West Frontier Province stations for May 1916. :—

| Station. | Actual rainfall in May 1916. | Normal rainfall in May. | Departure from normal in May 1916. | Station. | Actual rainfall in May 1916. | Normal rainfall in May. | Departure from normal in May 1916. |

Standing crops average. |
| 9 | Siálkot ... | 13·0 at Sadr ...<br>11·03 at Zafarwál.<br>10·28 at Pasrúr.<br>9·13 at Raya.<br>9·90 at Daska. | 1. Insufficient ...<br>2. (a) Sufficient.<br>(b) Canals flowing. Aik, Degh, Chenab, Ravi flooded.<br>3. Weak. | Wheat, $10\frac{1}{2}$ seers ..<br>Barley, $12\frac{1}{2}$ seers.<br>Gram, $11\frac{1}{4}$ seers.<br>Maize, 11 seers.<br>Rice, 6 to $6\frac{1}{2}$ seers.<br>Prices generally between warning and scarcity rates. | Extra spring crops in good condition. | Standing crops good. Fodder and cotton on lowlying lands in Siálkot Tahsil damaged by floods in Chenab. |

| No. | Reporting station. | Rain. | 1. Supply of fodder. 2. Water-supply for— (a) Drinking. (b) Canal irrigation. 3. Condition of cattle. | Prices in seers per rupee. | Prospects of | |
|---|---|---|---|---|---|---|
| | | | | | Spring. | Autumn. |
| 10 | Shahpur ... | 2·65 at Sadr ... 5·03 at Bhera. 0·65 at Shahpur. 0·36 at Khusháb. | 1. Sufficient, except in Khusháb Tahsil. 2. (b) Canals flowing; supply sufficient. 3. Fair, except in Khusháb Tahsil. | Wheat, 11 to 13 seers. Barley, 13½ to 14 seers. Gram, 11½ to 12 seers. Jowar, 10 to 12 seers. Bajra, 10 to 10½ seers. Maize, 10 to 13 seers. Prices generally between warning and scarcity rates. | Condition of irrigated extra spring crops good, and of unirrigated average. | Sowings of jowar and bajra continue, and are normal. Standing irrigated crops good and unirrigated average.. Jhelum river flooded and proved beneficial to standing crops. |
| 11 | Ráwalpindi ... | 1·63 at Sadr ... 5·77 at Gujar Khan. 8·56 at Kahúta. 3·94 at Murree. | 1. Insufficient in Gujar Khan Tahsil. 3. Good. | Wheat, 10¼ seers... Barley, 13¾ seers. Gram, 11½ seers. Bajra, 11 seers. Maize, 14 to 14½ seers. Prices between normal and scarcity rates. | Condition of extra spring crops good. | Rain was sufficient and beneficial. Sowings continue and are normal. Standing crops good. |
| 12 | Miánwáli ... | 0·50 at Sadr ... 0·96 at Bhakkar. 1·35 at Isa Khel. | 1. Scarce ... 2. (a) Procurable. (b) Nammal and Kurram Canals flowing; supply sufficient. 3. Bad. | Wheat, 10½ seers ... Barley, 12½ seers. Gram, 12¼ seers. Bajra, 8 seers. Except for wheat prices close to scarcity rates. | ... | Sowings of irrigated jowar, bajra and moth continue, and are normal. |
| 13 | Lyallpur ... | 0·52 at Sadr ... 0·78 at Toba Tek Singh. 0·61 at Samundri 2·12 at Jaranwála. | 1. Dry sufficient; green insufficient. 2. (b) Canals working by rotation; supply normal. 3. Good. | Wheat, 11 seers ... Gram, 12 seers. Barley, 13 seers. Maize, 17½ seers. Prices generally between warning and scarcity rates." | Extra spring crops average. | Sowings of chari and moth, &c., in progress. |
| 14 | Multán ... | 0·57 at Sadr ... 0·70 at Shujabad. 0·37 at Lodhrán. 0·57 at Mailsi. 0·27 at Kabírwála. | 1. Available ... 2. (b) Canals flowing; supply sufficient. 3. Fair. | Wheat, 11½ seers... Barley, 12½ seers. Gram, 12 seers. Jowar, 11¾ seers. Bajra, 11¾ seers. Prices between warning and scarcity rates. | Harvesting of tobacco and onions continues. Yield normal. | Rain was useful for standing crops. Sowings of millets, pulses, rice and sesamum continue, and are normal. Standing crops average. |

## *GENERAL REMARKS.*

VERY heavy rain fell in the submontane and central districts and flooded low lands in places. Elsewhere the fall was also good, except in south-western districts, where only light rain was received and more is still wanted. Rainfall proved very beneficial for sowings and for standing crops which are now good on irrigated area and average on unirrigated area. Sowings of autumn crops in progress, and are generally normal. Cattle are generally healthy, but are weak in the south-east owing to scarcity of fodder. Water for drinking and irrigation sufficient. Prices are generally stationary, but are rising in a few districts. In case of wheat they are close to normal rates, but in other cases they range between normal and scarcity rates. Prices of wheat :—Ráwalpindi 10¼, Lyallpur 11, Lahore 11¼, and Ambála and Ferozepore 12 seers per rupee.

P. J. BOYD,

*Director of Land Records, Punjab.*

rain-gauge station.

MAHBUB SHAH, SUPERINTENDENT,
*Office of Director of Land Records, Punjab.*

# Notes on the condition and prospects of crops, etc., in each district of the Punjab during the month of June 1916.

## 1.—HISSAR DISTRICT.

Rainfall has not been general. Sowings of barani autumn crops below normal for want of rain. Sowings of cotton and chari on irrigated land continue. Area sown below normal owing to insufficient supply of canal water. Extra rabi crops being harvested: estimated outturn twelve annas in a rupee. Cattle getting lean; fodder scarce and being imported by rail. Water supply in perennial and inundation canals insufficient. Grain stock sufficient for local requirements. General health good.

## 2.—ROHTAK DISTRICT.

Rainfall below average and very localized. More rain is badly wanted. Sowings of unirrigated jowar, bajra, mung and maize took place in parts of the district where sufficient rain had fallen, but the area sown is restricted. Sowings of irrigated cotton, fodder and indigo continued, but area sown is below normal. Standing kharif and extra rabi crops fair to good except in Rohtak Tahsil, where it is below average on irrigated areas and very poor on unirrigated areas. Crops damaged to some extent by strong winds and also by locusts in parts of Tahsil Rohtak. Yield of extra rabi generally average. Cattle in poor condition and getting worse except in Sonepat Tahsil where they are in fair condition. Some fodder is being imported by rail except in Sonepat Tahsil, but the supply is insufficient. Health of people generally good. Supply of canal water was not generally adequate. Water is scarce in village ponds.

## 3.—GURGAON DISTRICT.

Rain was insufficient for kharif sowings except in Tahsils, Ballabgarh and Palwal, where too it was not general. Sowings commenced in some villages of other tahsils too but the strong westerly winds and scarcity of rain damaged the standing crops to a great extent. Area sown was much below normal. Condition of the standing crops on irrigated area is fairly good and that on unirrigated fair Cattle in very poor condition, and many are dying. Fodder scarce. Stocks exhasuted. Health of the people good. Canal was running. Supply of water sufficient.

## 4.—KARNAL DISTRICT.

Good rain fell on 19th and 20th June 1916 which was beneficial to standing crops and sowings. Sowings of jowar, bajra, maize, cotton are in progress. The condition of crops is good except in Kaithal and Thanesar Tahsils where unirrigated crops are very poor. The yield of irrigated crops is average and of unirrigated mostly below average. Fodder and water generally sufficient. The state of public health is good. The Western Jumna Canal is working. Supply normal. The Sarusti Canal also ran.

## 5.—AMBALA DISTRICT.

Rainfall sufficient except in Kharar and Rupar Tahsils. Sowings of kharif crops in Jagádhri, Ambála and Naraingarh are above average and those in Kharar and Rúpar average Crops are germinating well. The condition of standing sugarcane crop good. Yield of standing crops is expected to be good. Cattle generally are in good condition. Fodder and water supply sufficient. Public health good. Western Jumna Canal flowed continually. No river inundation of torrent floods. Prices stationary.

## 6.—SIMLA DISTRICT.

Rainfall sufficient. In Simla Tahsil maize and in Kotkhai Tahsil koda, bathu, china and maize were sown to the extent of half the normal. The condition of crops in Simla Tahsil good and in Kotkhai Tahsil average. Outturns in Kotkhai were as follows :—

| | *Irrigated.* | *Unirrigated.* |
|---|---|---|
| | Seers per acre. | Seers per acre. |
| Wheat ... ... | 264 | 240 |
| Barley ... ... | 450 | 380 |

General condition of cattle good. Fodder and grazing sufficient. Public health good. Water supply from hill streams sufficient.

7.—KANGRA DISTRICT.

The rainfall during the month was above the average. About three-fourths of the total area has been sown with rice, maize, til, mash, &c. The excessive rains prevented the full area being sown. Kharif crops are in good condition at present. Cattle healthy except in Kángra Proper. Public health is generally good. Water in kuhls was sufficient for irrigation purposes.

8.—HOSHIARPUR DISTRICT.

Rain badly wanted. Maize and jowar sown to some extent. Condition of standing crops—sugarcane, cotton and vegetables—good. Estimated outturn of tobacco average. Condition of cattle generally good. Public health generally good. Irrigation resorted to from wells and the Shah Nahr Canal. Prices stationary.

9.—JULLUNDUR DISTRICT.

The rainfall is much below average in the whole district. More rain is badly needed. Sowings of chari (fodder) were made to some extent in the irrigated lands, and were below normal. Standing irrigated extra rabi crops, cotton and sugarcane are in average condition. Yield of the standing crops is expected to be average. Outturn of extra rabi crops average. Cattle in average condition and fodder sufficient. Public health good.

10.—LUDHIANA DISTRICT.

Rainfall in Samrala and Jagraon Tahsils was average and in Ludhiana below average, and was not evenly distributed. It benefitted the standing crops to some extent. Sowings of chari, cotton and rice in progress. More rain is wanted. Condition of crops on irrigated area above average, and on unirrigated area average. Condition of cattle satisfactory. Green and dry fodder available. Public health generally good. Irrigation from canals satisfactory.

11.—FEROZEPORE DISTRICT.

The rainfall was too slight to be beneficial for sowing purposes. It is now anxiously awaited. Sowing of kharif crops were undertaken in irrigated areas. Condition of standing rabi crops is good. Condition of cattle is satisfactory. Fodder sufficient. Public health is generally good. The flow of Sirhind and Gray Canals is satisfactory. Prices of food grains stationary.

13.—LAHORE DISTRICT.

No rain of importance. Some isolated and scattered showers were received here and there. Cotton, chari and moth were sown to normal extent. Condition of standing crops is quite satisfactory so far, but the rain is now badly needed. Condition of cattle good. Fodder is quite sufficient, but is dear. Public health is good. Both perennial and inundation canals ran. Supply sufficient.

13.—AMRITSAR DISTRICT.

Rice and chari were sown. Standing crops of irrigated area average and unirrigated bad. Condition of cattle average. Public health is generally good. Canals are working by rotation. No complaints of supply. Flood in rivers Ravi and Beas ordinary.

14.—GURDASPUR DISTRICT.

The monsoon rains began in the beginning of June, but were much below the average in Tahsils Batála and Gurdáspur. Kharif sowings restricted owing to want of rainfall. Rain is badly wanted. The condition of cane and cotton in irrigated sailab land average and in unirrigated lands somewhat below it. Cattle generally in good condition. Fodder is sufficient. Public health generally good. Rivers and Government canals are flowing. No flood. Prices stationary.

15.—SIALKOT DISTRICT.

Sowings of maize and fodder crops continued. Condition of standing crops good in irrigated, but poor in unirrigated areas. Cattle healthy, but weak owing to scarcity of green fodder. Dry fodder sufficient. Public health generally good. Certain tract was irrigated from Canal Raya Branch. Water in Aik sufficient. Jhallari irrigation from Aik continued. The Ravi, Degh and Aik flooded twice.

### 16.—GUJRANWALA DISTRICT.

Fair rain fell in Tahsil Wazírabád, while in other tahsils it was insufficient for sowing. Jowar, bajra, moth and chari being sown. The general progress in sowings is below average. The general condition of crops in nahri tracts is good, elsewhere it is average. The yield of extra rabi crops is estimated at normal. The condition of cattle is good. Fodder sufficient. Public health generally good. Canals working by rotational turns.

### 17.—GUJRAT DISTRICT.

Rainfall in June good, but not evenly distributed and was rather early. Sowings of kharif commenced. Sugar-cane improved by recent rain, and is in good condition. Harvesting of extra rabi crop is in progress. Yield estimated to be average. Cattle are in fair condition. Prospects for green fodder good. Public health good. Canal irrigation begun. Floods in river and hill torrents proved beneficial to dry lands.

### 18.—SHAHPUR DISTRICT.

The rainfall was of great use to the standing crops, and helped in sowings of jowar, bajra, maize and chari crops. The condition of standing crops was good on irrigated area, and normal elsewhere. The harvesting of wheat crop was finished during the month. The outturn of extra rabi crops expected to be good. The condition of cattle was fair. Fodder sufficient except in Khusháb Tahsil. The state of public health was good. The Lower Jhelum Canal and the Inundation Canals continued to flow with sufficient supply of water. The river Jhelum flooded once to a considerable extent.

### 19—JHELUM DISTRICT.

Rainfall during the month allowed further kharif sowings. More rain badly required The condition of crops is not satisfactory. Expected yield of extra rabi crops is on the whole average. Cattle healthy, but fodder is scarce. Public health good. Pind Dadan Khan Canal is working.

### 20—RAWALPINDI DISTRICT.

Rainfall above average and timely for kharif sowings. Condition of standing extra rabi and kharif crops average. Condition of cattle good. White bhusa very dear, but available. Public health good.

### 21.—ATTOCK DISTRICT.

No rainfall at the Fatehgang Tahsil head-quarters, but slight showers were received in some of its villages. In the rest of the district the rains led to some sowings of the kharif crop. Owing to want of rains the growth of kharif crops is not satisfactory. Yield is expected to be fair only. The condition of cattle is fair only. Fodder is scarce. Public health good. Water in wells is growing less in some parts of the district owing to the insufficiency of rains. Prices have fallen slightly.

### 22—MIANWALI DISTRICT.

Rain was not plentiful. Sowings of kharif crops were carried on to a small extent in the Miánwáli Tahsil. No sowings were made elsewhere and rain is badly wanted. The condition of extra rabi crops is average to good on irrigated lands and average to poor on unirrigated areas. Outturn of standing crops as above. Condition of cattle is bad owing to scarcity of fodder. Public health is good. The Kurram is watering lands sufficiently in Isa Khel Tahsil and the Nammal Canal is watering Miánwáli Civil Station only. There was a great flood in the river Indus which damaged the extra rabi crops.

### 23.—MONTGOMERY DISTRICT.

Sowings of chari, jowar, rice, &c., and some cotton continued during the month. Condition of standing crops average. Yield expected to be average, but rain is badly wanted. Cattle healthy though lean for want of green fodder. General health good. Ravi river is flowing. Sutlej river is in ordinary flood. Canals are flowing. General condition average. Prices stationary.

### 24.—LYALLPUR DISTRICT.

Rain insufficient though it was in isolated parts of the district. Chari and moth, &c., were sown. Standing crops are in the normal condition. Wheat thrashing finished. Yield 12 maunds an acre on the whole. Cattle were in good condition. Fodder sufficient. Public health good. Canals worked well. Floods came in the Ravi.

25.—JHANG DISTRICT.

Rainfall was far above the average in Tahsils Shorkot and Jhang, but below average in Tahsil Chiniot. Cotton and the fodder crops of rawan and chari have been sown. Maize is being sown in the Chiniot Tahsil. The crops are in an average condition. Wheat was harvested, yielding an average outturn. Cattle healthy. Public healthgood. The canals are flowing. The rivers are rising and inundations were reported from the Jhang and Shorkot Tahsils. Prices stationary.

26.—MULTAN DISTRICT.

The rainfall during the month is normal and has proved beneficial to the standing crops as well as to the sowings. The condition of crops on irrigated and unirrigated areas average. Rain is badly wanted. The outturn of wheat and tobacco harvested was average on irrigated lands and below average on unirrigated lands. Condition of cattle fair. Bhusa and green chari available as fodder. Health of people good. All inundation canals and Sidhnai Canal commenced running and water is sufficient. Prices of wheat stationary.

27.—MUZAFFARGARH DISTRICT.

Rainfall has proved very useful to the standing crops. Rice, moth, jowar, bajra and cotton were sown during the month. The condition of crops is average. Wheat crop was removed at some places from the thrashing floor. The average yield per acre was irrigated 8 maunds, unirrigated 2 maunds. Condition of cattle good in Sanáwan and fair elsewhere. Fodder available. Public health generally good. Canals working but started late. The rivers flooded. Prices of food grains still high.

28—DERA GHAZI KHAN DISTRICT.

Rainfall during the month average and was useful to the sown crops. Condition of standing crops average. The produce of zaid rabi crops average. The condition of cattle is on the whole fair. Fodder generally scarce. Public health on the whole good. Canals are running exceptionally well on account of flood in the river. There has been slight floods in hill torrents. Prices are stationary.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 8th July 1916, there were 1,109 births registered in the 38 large municipal towns (520 males and 589 females), giving a birth rate of 48 *per mille* of population, and 699 deaths were registered (349 males and 350 females), giving a death rate of 30 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 31 against 33 in the corresponding week of the previous year ; Amritsar 42 against 35, and Multán 21 against 42.

There were 10 deaths recorded from cholera in Amritsar and 1 in Batála.

*Erratum.*—Weekly return of births and deaths registered in the 38 large municipal towns in the Punjab during the week ending Saturday, the 24th June 1916, published at page 462 in the Supplement to *Punjab Gazette* for July 7th, 1916—

Against "Simla" (Hill Station) in sub-column 15 *for* "3" *read* "*nil*" and in sub-column 16 *for* "*nil*", *read* "3."

Gram, 12½ seers. Maize, 17½ seers. Barley, 13 seers. Prices generally between warning and scarcity rates. | Condition of extra spring crops good. | Sowings of maize, moth and fodder continue. |
| 14 | Multán ... | ... | 1. Available ... 2. (b) Canals flowing; supply sufficient. 3. Fair. | Wheat, 11½ seers... Barley, 12½ seers. Gram, 12 seers. Jowar, 11½ seers. Bajra, 11½ seers. Prices between warning and scarcity rates. | ... | Sowings of maize, millet, fodder, pulses and sesamum continue, and are normal. Standing crops average. |

*GENERAL REMARKS.*

Moderate to heavy rain was received in all the reporting districts, except in parts of the south-east and south-west, where the fall was light and insufficient and more rain is still required. Rainfall was very useful for sowings and standing crops which are good on irrigated area and average on unirrigated area. Sowings of autumn crops continue, and are generally normal, except in parts of the south-east where they are below normal. Cattle are generally healthy, but are weak in parts of the south-east owing to scarcity of fodder. Water for drinking and irrigation sufficient. Prices are generally stationary. In case of wheat they are close to normal rates, but in other cases they range between normal and scarcity rates. Prices of wheat :—Ráwalpindi 10½, Lahore 11½, Ambála and Lyallpur 11½, and Ferozepore 12 seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 15th July 1916, there were 1,098 births registered in the 38 large municipal towns (59 males and 507 females), giving a birth rate of 48 *per mille* of population, and 647 deaths were registered (348 males an 299 females), giving a death rate of 28 *per mille* of population. The death rates registered in the three largest towns wer as follows :—Lahore 26 against 34 in the corresponding week of the previous year; Amritsar 39 against 47, and Multán 1 against 26.

Of the 2 deaths from small-pox, 1 each was registered in Ambála and Batála. There were 5 deaths recorded fro cholera in Gujránwála and 2 in Chiniot.

Sanitary Commissioner's Office,
Lahore:
*The 25th July* 1916.

Standing crops average. |

## GENERAL REMARKS.

Light or moderate rain has fallen in nearly all the reporting districts, and has been beneficial. More, however, is still wanted in parts of the south-east and south-west of the Province. Condition of standing crops good on irrigated area and average on unirrigated area. Sowings of autumn crops continue, and are generally normal. Cattle are improving in the south-east; elsewhere they are healthy. Water for drinking and irrigation purposes sufficient. Prices are generally stationary or rising slightly. In case of wheat they are close to normal rates, but in other cases they range between normal and scarcity rates. Prices of wheat—Ferozepore, Ráwalpindi and Lyallpur 10½, Lahore 11, and Ambála 11¼ seers per rupee.

*Remarks by the Sanitary Commissioner, Punjab.*

During the week ending 22nd July 1916, there were 1,186 births registered in the 38 large municipal towns (619 males and 567 females), giving a birth rate of 52 *per mille* of population, and 638 deaths were registered (312 males and 326 females), giving a death rate of 28 *per mille* of population. The death rates registered in the three largest towns were as follows :—Lahore 23 against 28 in the corresponding week of the previous year; Amritsar 28 against 37, and Multán 24 against 26.

Of the 2 deaths from small-pox, 1 each was registered in Batála and Multán. There were 2 deaths recorded from cholera in Ferozepore and 1 each in Amritsar, Gujrát, Bhera and Chiniot.

Sanitary Commissioner's Office,
Lahore :
*The* 31*st July* 1916.

Standing crops good. |
| 12 | Miānwāli ... | 0·61 at Sadr ...<br>4·80 at Bhakkar. | 1. Procurable in Kacha and scarce in Thal tracts.<br>2. (b) Nammal Canal flowing.<br>3. Fair. | Wheat, 10½ seers...<br>Barley, 12¾ seers.<br>Gram, 11¾ seers.<br>Bajra, 8 seers.<br>Except for wheat, prices are close to or at above scarcity rates | ... | Sowings of jowar, bajra and moth continue and are normal. Standing crops average. |
| 13 | Lyallpur ... | 0·17 at Sadr ...<br>0·23 at Toba Tek Singh.<br>1·22 at Samundri.<br>3·65 at Jaranwála. | 1. Sufficient ...<br>2. (b) Canals working by rotational closures; supply normal.<br>3. Good. | Wheat, 10½ seers ...<br>Gram, 12 seers.<br>Maize, 16 seers.<br>Barley, 13 seers.<br>Prices between warning and scarcity rates. | Condition of extra spring crops average. | Sowings of rice, maize, moth and fodder continue. |
| 14 | Multán ... | 1·85 at Sadr ...<br>3·25 at Shujabad.<br>6·40 at Lodhrán.<br>1·55 at Mailsi.<br>2·26 at Kabírwála. | 1. Available ...<br>2. (b) Canals flowing; supply sufficient.<br>3. Fair. | Wheat, 10¾ seers...<br>Maize, 15½ seers.<br>Gram, 11½ seers.<br>Jowar, 11¾ seers.<br>Bajra, 11¾ seers.<br>Prices between warning and scarcity rates. | ... | Rain was generally useful. Sowings of millets, pulses, maize and sesamum continue, and are normal. Standing irrigated crops good and unirrigated average. |

## GENERAL REMARKS.

FAIRLY heavy and well distributed rain fell in all the reporting districts. The fall has been sufficient, except in parts of the south-west, where more rain is still wanted. It has immensely benefited the standing crops which are good on irrigated area and average on unirrigated area. Sowings of autumn crops continue, and are generally normal. Cattle are improving in the south-east; elsewhere they are healthy. Water for drinking and irrigation purposes sufficient. Prices of wheat has risen slightly and range between normal and warning rates; in other cases they range between normal and scarcity rates. Prices of wheat:—Lyallpur 10½, Ráwalpindi 10½, Lahore 10¾, and Ambála and Ferozepore, 11 seers per rupee.

Sowings of jowar, maize, pulses and sesamum continue on lands free from floods, and are normal. Standing irrigated crops good and unirrigated average. |

*GENERAL REMARKS.*

MODERATE or fairly heavy rain fell in all the reporting districts, except in parts of the west, where the fall was light. It has been generally beneficial, but more is not required for the present. Condition of standing crops is good on irrigated area and average on unirrigated area, but in parts of the south-east crops on low lands have slightly been damaged by excessive rains and floods. Sowings of autumn crops continue, and are generally normal. Cattle are improving in the south-east; elsewhere they are healthy. Water for drinking and irrigation purposes sufficient. Prices of wheat have risen slightly and range between normal and warning rates; in other cases they range between normal and scarcity rates. Prices of wheat :—Lyallpur 10, Râwalpindi 10, Ferozepore 10¼, Lahore 10½, and Ambála 11 seers per rupee.

MAHBUB SHAH, SUPDT.,
for *Director of Land Records, Punjab.*

# SUMMARY OF METEOROLOGICAL CONDITIONS PREVAILING OVER THE PUNJAB AND THE NORTH-WEST FRONTIER PROVINCE DURING JUNE 1916.

*Not reduced to sea-level.
(a) = Mean of 20 days.
(b) = Mean of 29 days.
(c) = Aneroid.
(f) = Mean of 28 days.

Rainfall due to temporary incursions of the monsoon occurred, chiefly in and near the hills, from the 9th to the 11th, the 16th to the 18th and on the 21st and 22nd, but in the rest of the month apart from a few thunderstorms the weather was dry.

It may be noted that in most years the first burst of monsoon rainfall in the Punjab occurs near the end of June.

*Pressure and Winds.*—Barometric pressure was in decided defect of the normal everywhere. Winds were fairly normal as regards direction, but at most of the observing stations in the east and north Punjab their velocity was high.

*Temperature.*—In the plains of the Punjab and of the North-West Frontier Province the mean temperature was appreciably higher than usual from the 7th to the 9th, on the 17th and 18th, and again during the last three days of the month; it was in defect by 6° on the 1st, by 4° on the 2nd and 13th, by 9° on the 11th and by 7° on the 12th, and was approximately normal on all other days.

The highest maximum temperature recorded during the month was 119° at Multan on the afternoon of the 8th. On the mean of the whole month temperature conditions differed to no great extent from the normal except at Ambala and Simla where the maximum was upwards of 5° in defect.

The following table shows for each day of the month the departure from the normal of the mean temperature of the Punjab and the North-West Frontier Province, with the highest temperature registered and the name of the station recording it :—

| Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. | Date. | Departure from normal of mean temperature of the Punjab and the N.-W. Frontier Province during the previous 24 hours. | Highest maximum temperature recorded during the previous 24 hours. | Station at which registered. |

| " 16th ... | +2·7 | 111·2 | Montgomery. | | | | |

*Humidity and Cloud.*—Over the greater part of the Punjab the air was damper and the sky more cloudy than usual.

*Rainfall.*—The month's rainfall in the Punjab was unevenly distributed: it was above normal in the hill districts and also at Ambála, Rawalpindi and Khusháb ; and was deficient at the remaining recording stations. Absolutely no rain fell at Montgomery and Multán ; while on the other hand the aggregate fall measured at Simla exceeded the normal by 11½ inches or 169 per cent.

In the North-West Frontier Province there was a defect at Cherát and Drosh, and an excess elsewhere.

The following table gives the rainfall data for the Punjab and the North-West Frontier Province stations for June 1916. :—

| Station. | Actual rainfall in June 1916. | Normal rainfall in June. | Departure from normal in June 1916. | Station. | Actual rainfall in June 1916. | Normal rainfall in June. | Departure from normal in June 1916. |
